Gravel Roads Sep 22 2019 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

HEAPREC Oct 04 2020 The U.S. Bureau of Mines report presents the documentation for HEAPREC. a methodology for calculating reclamation performance bonds for cyanide heap leach operations. HEAPREC is a template developed for use with Lotus 1-2-3 release 2.01 or newer software. The report is presented in step-by-step "user's manual" format. Appendixes contain detailed background and reference material on performance bonding, cyanide detoxification regulation, cyanide detoxification methods, general mine reclamation procedures, and an example bond calculation.

User's Manual Oct 16 2021 This manual provides the information needed to use coarse anthracite and bituminous wastes in highway embankment construction. It has 2 parts. Part 1 contains wide ranging data needed for an

understanding of coal-mine refuse (CMR) properties, its origins, and regulations governing its disposal. Case histories of highway embankments with CMR are included. Part 2--the user's portion of the manual--sets forth the procedures to follow from planning through construction of highway embankments with CMR.
