Impact Evaluation in Practice, Second Edition Aug 28 2019 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

***Post-process Theory* Jun 18 2021** Breaking with the still-dominant process tradition in composition studies, post-process theory—or at least the different incarnations of post-process theory discussed by the contributors represented in this collection of original essays—endorses the fundamental idea that no codifiable or generalizable writing process exists or could exist. Post-process theorists hold that the practice of writing cannot be captured by a generalized process or a "big" theory. Most post-process theorists hold three assumptions about the act of writing: writing is public; writing is interpretive; and writing is situated. The first assumption is the commonsensical claim that writing constitutes a public interchange. By "interpretive act," post-process theorists generally mean something as broad as "making sense of" and not exclusively the ability to move from one code to another. To interpret means more than merely to paraphrase; it means to enter into a relationship of understanding with other language users. And finally, because writing is a public act that requires interpretive interaction with others, writers always write from some position or some place. Writers are never nowhere; they are "situated." Leading theorists and widely published scholars in the field, contributors are Nancy Blyler, John Clifford, Barbara Couture, Nancy C. DeJoy, Sidney I. Dobrin, Elizabeth Ervin, Helen Ewald, David Foster, Debra Journet, Thomas Kent, Gary A. Olson, Joseph Petraglia, George Pullman, David Russell, and John Schilb.

***A Textbook of Cost and Management Accounting, 11th Edition* May 30 2022** A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. The text of the subject matter has been presented in a student-friendly, simple and intelligible manner. Every discussion involving conceptual complexity is immediately illustrated by a numerical example. In addition, the book contains a liberal sprinkling of charts and diagrams so as to make the subject easily understandable and highlight its finer points. The subject matter has been organized on 'first things first' basis for its logical presentation that sustains interest. The approach of the book is examination oriented. Thus, a good number of problems and solutions have been included in its chapters. Theoretical and numerical questions have been mostly selected from various examinations. Objective type questions have been given to serve as self-test by students. This is an ideal book for self-study. An all-inclusive, ideal book for self-study, both for the students of Cost and Management Accounting as well as working professionals.

Beyond the Boundaries Feb 24 2022 In the past, African American aspirations for political office were assumed to be limited to areas with sizeable black population bases. By and large, black candidates have rarely been successful in statewide or national elections. This has been attributed to several factors: limited resources available to African American candidates, or identification with a black liberationist ideological thrust. Other factors have been a relatively small and spatially concentrated primary support base of black voters, and the persistent resistance of many white voters to support black candidates. For these reasons, the possibility of black candidates winning elections to national office was presumably just a dream. Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend. But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions. The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics. This volume is anchored by a symposium that focuses on new possibilities in African American politics. Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics. Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely. The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates.

***The Law of Public Communication, 11th Edition* Apr 16 2021** The eleventh edition of this classic textbook provides an overview of communication and media law that includes the most current legal developments. The Green Book Sep 21 2021 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Reporting Technical Information Apr 04 2020 *Reporting Technical Information* is a classic in the field of technical writing that has maintained its leadership position for over 30 years. It began as a book most often used in engineering departments, and it is known for its emphasis on the rhetorical nature of writing; it aims to help writers 1) understand their readers and the context in which their documents will be read and used; 2) define their purpose in writing; and 3) design documents with those issues as critical guideposts. The 11th edition takes a new and broader direction in its intent to prepare students in a wide variety of science, health, business, engineering, and technical majors to develop the kinds of documents they are most likely going to need to write in a work environment. In addition to choosing examples from a broader range of disciplines, the text will focus on the development of written and oral communications in terms of both online and hardcopy presentations. It will also make the line between business and technical communication less distinct, as that line has blurred in both curricula and businesses. Of

paramount importance will be the development of a better website for this edition, with clear integration to the text. Tebeaux and Dragga will ensure that revisions reflect contemporary business practices.

The Purpose Economy Feb 12 2021 A series of shifts are happening in our economy: Millennials are trading in conventional career paths to launch tech start-ups, start small businesses that are rooted in local communities, or freelance their expertise. We are sharing everything, from bikes and cars, to extra rooms in our homes. We now create, buy and sell handcrafted products in our local communities with ease. Globally recognized entrepreneur, founder of Taproot Foundation and CEO of Imperative, Aaron Hurst, argues in his latest book that while these developments seem unrelated at first, taken together they reveal a powerful pattern that points to purpose as the new driver of the American economy. Like the Information Economy, which has driven innovation and economic growth until now, Hurst argues that our new economic era is driven by connecting people to their purpose. It's an economy where value lies in establishing purpose for employees and customers through serving needs greater than their own, enabling personal growth and building community. Based on interviews with thousands of entrepreneurs, Hurst shows this new era is already fueling demand for a whole host of products and services and transforming how millennials view their careers. A new breed of startups like Etsy, Zaarly, Tough Mudder, Kickstarter, and Airbnb are finding new ways to create value by connecting us with our local communities. At the same time, companies like Tesla and Whole Foods are making the march from just appealing to affluent buyers to becoming mainstream brands. Hurst calls these companies, along with the pioneering entrepreneurs who founded them, the Purpose Economy's taste-makers. This book is at once a personal memoir of Aaron Hurst's own awakening as a purpose driven entrepreneur, when he left a well-paying tech job in 2001 to launch Taproot, creating a pathway for millions of professionals and Fortune 500 companies to volunteer for nonprofits. It's also a blueprint for a new economic era that is transforming companies, markets and our careers to better serve people and the world.

DeGarmo's Materials and Processes in Manufacturing Nov 11 2020 Now in its eleventh edition, DeGarmo's Materials and Processes in Manufacturing has been a market-leading text on manufacturing and manufacturing processes courses for more than fifty years. Authors J T. Black and Ron Kohser have continued this book's long and distinguished tradition of exceedingly clear presentation and highly practical approach to materials and processes, presenting mathematical models and analytical equations only when they enhance the basic understanding of the material. Completely revised and updated to reflect all current practices, standards, and materials, the eleventh edition has new coverage of additive manufacturing, lean engineering, and processes related to ceramics, polymers, and plastics.

The Edwardians and the Making of a Modern Spanish Obsession Sep 29 2019 What did the Edwardians know about Spain, and what was that knowledge worth? The Edwardians and the Making of a Modern Spanish Obsession draws on a vast store of largely unstudied primary source material to investigate Spain's place in the turn-of-the-century British popular imagination. Set against a background of unprecedented emotional, economic and industrial investment in Spain, the book traces the extraordinary transformation that took place in British knowledge about the country and its diverse regions, languages and cultures between the tercentenary of the Spanish Armada in 1888 and the outbreak of World War I twenty-six years later. This empirically-grounded cultural and material history reveals how, for almost three decades, Anglo-Spanish connections, their history and culture were more visible, more colourfully represented, and more enthusiastically discussed in Britain's newspapers, concert halls, council meetings and

schoolrooms, than ever before. It shows how the expansion of education, travel, and publishing created unprecedented opportunities for ordinary British people not only to visit the country, but to see the work of Spanish and Spanish-inspired artists and performers in British galleries, theatres and exhibitions. It explores the work of novelists, travel writers, journalists, scholars, artists and performers to argue that the Edwardian knowledge of Spain was more extensive, more complex and more diverse than we have imagined.

Alternative Initial Public Offering Models Jun 26 2019 The continuous search for improved methods of public equity financing has resulted in the derivation of alternative models for listing companies on stock exchanges through so-called shell companies. Since such an entity has no operations of its own, its sole purpose is to find an operating company it can ultimately be merged with through the use of proceeds acquired from the initial shell listing. Axel Moeller seeks to answer the questions pertaining to the practical implementation of such alternative listing models in Germany from a law and economics perspective. In light of the fact that a legal framework with regard to shell listings does not exist, the underlying legal analysis is based on the accumulation of general principles derived from German business and capital markets law. From an economic and financial perspective, the ensuing analysis demonstrates the potential efficiency gains of a shell listing for small and medium-sized German enterprises.
