Achieving the Circular Economy Oct 23 2021 Urbanisation and climate change are pushing cities to find novel pathways leading to a sustainable future. The urban context may be viewed as a new experimentation space to accelerate the transition to a circular economy. Urban symbiosis and the circular economy are emerging concepts attracting more and more attention within the urban context.

Moreover, new business models are emerging around sharing and peer-to-peer practices, which are challenging existing roles of actors in society. These developments are having an important impact on the flows of resources and the use of the city infrastructure, and each research area has taken a different perspective in the analysis of such impacts. This Special Issue aims to explore what a "circular city" could constitute and how and why cities engage in circularity. This Special Issue includes seven high-quality papers on the theories and practices of circular cities. Actors, concepts, methods, tools, the barriers to and enablers of circular cities are discussed and a solid base and inspiration for the future development of circular cities are provided.

Pricing Decisions in Small Business May 18 2021 These studies, which originated from research on approximately 100 firms earned on at the University of Kentucky under a grant from the Small Business Administration, are an empirical examination of decision making in the small firm. The practices revealed by the investigation have been analyzed within the theoretic framework of managerial economics. The studies make suggestions for improvements that take into account the limited resources of small firms. A third study, *Investment Decisions in Small Business* by Martin B. Solomon, will be published at a later date. *Pricing Decisions in Small Business* points out that pricing is more flexible but that competition is more limited than economists have assumed. Though he already makes some adjustment of prices according to the market, the businessman could profit from greater flexibility in his thinking, especially in the consideration of relative changes in costs and revenues.

Narrative and Discursive Approaches in Entrepreneurship Aug 09 2020 . . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, *International Journal of Entrepreneurial Behaviour and Research* The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, *Scandinavian Journal of Management* . . . the contributors in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, *International Small Business Journal* In their edited book *Narrative and Discursive Approaches in Entrepreneurship*, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, *University of North Carolina at Chapel Hill, US* Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should

Run Your Shop Without It Running You Jul 08 2020 A Practical Guide to Efficient Shop Management, Run Your Shop Without It Running You offers jewelers useful advice to managing their shop. Take-In Procedures, Setting-Up a Shop, Pricing Repairs, and Productivity in the Shop are just a few of the subjects covered. With over one hundred and fifty pages of information, illustrations, and worksheets, this is the most comprehensive book on Shop Management available today. This Valuable Guide Is A Must In Every Jewelry Store Learn a variety of methods to improve profitability of the jewelry shop. Including; how to set correct prices, improve scrap material management, and avoiding costly mistakes at the take-in counter. Learn methods of increasing productivity without sacrificing quality. Including; organizing and scheduling jobs, shop design, organizing the bench, motivating the bench jeweler, and many other topics. Run Your Shop Without It Running You will show you how you can have a shop that is efficient and profitable. In the ever-changing business environment, retail jewelers are compelled to make every aspect of their business profitable. If a store is to survive in the future, not only can it not support a loss in the shop; the shop must contribute to the profits of the store. In the years ahead, the shop may very well be the most important asset for the independent retail jeweler. It Is Now More Important Than Ever To Operate The Shop Professionally And Profitably. The business environment has changed over the years, and business practices must change along with it. No longer can the shop be the Necessary Evil, the Achilles Heel of the retail jewelry industry. The shop must be able to stand on its own and provide its share of profits to the store. Then, the store will not just survive in the future, it will THRIVE. In 1999 Bench Media first published Run Your Shop Without It Running You and is the Best Selling book on Jewelry Shop Management. Here is what other has said about this book: "All in all, the book is a no-nonsense guide to running a tight repair shop – It's A Must Read."INSTORE Magazine "For too many years jewelry storeowners have believed the fallacy the shop can't be a profit center. Brad Simon destroys that notion step-by-step with a practical book that shows owners and shop mangers the keys to profitability."Professional Jeweler Magazine "This is the best book on setting up and running a shop that I have ever seen. It is a must for every jewelry store and every jeweler should read it."Andy 'The Tool Guy' Kroungold "Brad is one of the few people who understand how to make a profit in the shop and how to set prices. If you have a shop or are going to install one, you should buy this book. It's great on setting things up in an orderly fashion for best efficiency, which speeds things up and lowers cost. Buy this book; it's a good one."David Geller "This is going to be one of those classic books that comes to mind whenever someone asks about going into the trade or gets serious about making their shop profitable. There is a lot of practical business sense and many bench tips."John Caro "Brad Simon reviews much that should be common sense, but unfortunately is often overlooked. It is good to see it laid out and explained for a bench jeweler's perspective. Thanks Brad for such an informative manual."Tony Baldwin "Brad Simon has taken a potentially boring subject and made it interesting to read. His years at the bench are obvious from the detailed descriptions of what goes on in the shop." David Lantz "Very well done. An excellent reference guide and tool for jewelers. Jewelers will definitely benefit from this book. I recommend it to all."Arthur Gordon
