Given the short time frame of the projects, as well as the interruptions due to the COVID-19, a number of recommendations are made in order to sustain the results achieved thus far, but which still require investment.

Natural Resource Management Strategy

Apr 02 2020 Arable land, deserts, mountains, forests, rivers, and coastal zones characterize the diverse regions in Eastern Europe and Central Asia (ECA). As varied as the geography is so are the policy directions taken by the region's governments concerning natural resource management. A lack of conservation measures, misuse, and poor management have impaired many of the natural resources now available in these countries. Although the pressure on natural resources in ECA is less than in other regions and the area has more abundant resources, the accessibility and utility of those resources belie the figures. Where there is arable land, the growing season is short. Where there are immense forests, the climate is harsh. To assist the Bank's client countries in ECA with sustainable use of natural resources, this volume identifies the various challenges, provides a history of the Bank's regional natural resource strategy, outlines a strategic framework, and proposes new strategies and policy instruments to implement them. Natural resources in this publication refer to "non-mineral" resources, such as, forests, rivers, and land.

1990. The aim of the workshop was to identify concepts and techniques used both in implementation of programming languages, regardless of the underlying programming paradigm, and in logic programming. The intention was to bring together researchers working in these fields. The volume includes 26 selected papers falling into two categories. Papers in the first category present certain ideas from the point of view of a particular class of programming languages, or even a particular language. The ideas presented seem to be applicable in other classes of languages. Papers in the second category directly address the problem of integration of various programming paradigms. The proceedings of the predecessor workshop PLILP '88, held in Orléans, France, May 16-18, 1988, are available as Lecture Notes in Computer Science, Vol. 348.
