Public-Private Partnerships in Infrastructure Mar 06 2020 The book provides readers with a clear understanding of infrastructure challenges, how Public-Private Partnerships (PPP) can help, and their use in practice. Infrastructure bottlenecks are generally considered the most important constraint to growth in many countries worldwide. Historically, infrastructure projects have been financed and implemented by the state. However, owing to the fiscal resource crunch, time and cost over-runs, and the general poor quality of publicly provided infrastructure, many emerging market governments, including India, have increasingly adopted PPPs with billions of dollars of investment riding on them. The results have been varied – from spectacular airports like the Delhi International Airport Limited with the associated controversy over land use, to the renegotiation of contracts as in the case of Tata Mundra Ultra Mega Power Project. Illustrating concepts with relevant case studies, the book makes the challenges of PPPs understandable to industry and management practitioners as well as students of management, public policy and economics. It is useful to practitioners wishing to avoid the pitfalls in the tricky terrain of PPPs and policymakers wanting guidance in crafting proper incentives. It also helps students gain a holistic and “applied” understanding of this increasingly important and popular model. “Public Private Partnerships (PPPs) in India are currently under stress. A comprehensive treatment of the subject by a long-time and erudite practitioner and a management academic, this book should be useful to students trying to learn the basics, while also being valuable to professionals and policy makers. The book suggests that the Government should hold bidders accountable to their submitted bids, thereby preserving sanctity of contract. This will discourage aggressive bidding which has become a serious and endemic problem. The book also suggests the use of better bidding criteria to mitigate traffic risk in transport projects. Policy makers should pay heed to these suggestions as they consider improvements in the PPP policy regime going forward.”—Arvind Subramanian, Chief Economic Adviser, India/div “For a fast-growing India, infrastructure creation and operation is a great challenge and opportunity. This excellent book combines theory and practice on PPPs, and is very useful for professionals and students alike. With case studies and current developments, the authors bring out issues in India with global experiences as well. A must-read for infrastructure practitioners.”—Shailesh Pathak, Chief Executive (Designate), L&T Infrastructure Development Projects Limited “India’s program of private participation in infrastructure attracted worldwide attention as it became one of the largest programs in emerging markets. As well as the volumes of finance mobilized, it garnered interest because of some of the innovative approaches developed, such as Viability Gap Funding. The Indian PPP story is well captured in this book, which also makes the point that India is seeing project cancellations and failures rise. The authors analyze the factors behind this and point the way to a more robust PPP market that learns from the experiences of the past.”—Clive Harris, Practice Manager, Public-Private Partnerships, World Bank/div

Inside the Church of Almighty God Feb 14 2021 Branded as “the new Falun Gong” by local authorities, The Church of Almighty God is the most persecuted religious movement in China today. Thousands of police officers are deployed full time to identify and arrest its members. Hundreds of thousands of its devotees are in jail. Authorities claim, perhaps hyperbolically, that it has some four million members and accuse the group of serious crimes. Yet, the movement continues to grow. In this ground-breaking study, Massimo Introvigne offers an inside look at this once-elusive movement, sharing interviews with hundreds of members and the Chinese police officers who hunt them down. The story of The Church of Almighty God is one of rapid growth, dramatic persecution, and the struggle of believers to seek asylum in countries around the world. In his telling of the story, Introvigne reconstructs the Church’s idiosyncratic theology, centered in the belief that Jesus Christ has returned in our time in the shape of a Chinese woman, worshipped as Almighty God, to eradicate the sinful nature of humans, and that we have entered the third and final time period in the history of humanity: the Age of Kingdom. A major book from one of the world’s leading scholars of new religious movements, Inside The Church of Almighty God is a critical addition to the scholarship of Chinese religion.

The Land Governance Assessment Framework Feb 03 2020 Increased global demand for land posits the need for well-designed country-level land policies to protect long-held rights, facilitate land access and address any constraints that land policy may pose for broader growth. While the implementation of land reforms can be a lengthy process, the need to swiftly identify key land policy challenges and devise responses that allow the monitoring of progress, in a way that minimizes conflicts and supports broader development goals, is clear. The Land Governance Assessment Framework (LGAF) makes a substantive contribution to the land sector by providing a quick and innovative tool to monitor land governance at the country level. The LGAF offers a comprehensive diagnostic tool that covers five main areas for policy intervention: Legal and institutional framework; Land use planning, management and taxation; Management of public land; Public provision of land information; and Dispute resolution and conflict management. The LGAF assesses these areas through a set of detailed indicators that are rated on a scale of pre-coded statements (from lack of good governance to good practice). While land governance can be highly technical in nature and tends to be addressed in a partial and sporadic manner, the LGAF posits a tool for a comprehensive assessment, taking into account the broad range of issues that land governance encompasses, while enabling those unfamiliar with land to grasp its full complexity. The LGAF will make it possible for policymakers to make sense of the technical levels of the land sector, benchmark governance, identify areas that require further attention and monitor progress. It is intended to assist countries in prioritizing reforms in the land sector by providing a holistic diagnostic review that can inform policy dialogue in a clear and targeted manner. In addition to presenting the LGAF tool, this book includes detailed case studies on its implementation in five selected countries: Peru, the Kyrgyz Republic, Ethiopia, Indonesia and Tanzania.

Not Just an Accountant Oct 25 2021 Not just an accountant is an incisive, no-holds-barred account of India’s eleventh comptroller and auditor general and a symbol of the anti-corruption movement, Vinod Rai. Through a narrative, rich in anecdote and inside information, Rai sheds light on the major scams that shook the country. Among the case studies—chosen for the diversity of failures they highlight are - the procedural irregularities in the issuance of licenses for second generation spectrum allotment, the last minute quick-fixes in the conduct of the XIX commonwealth games, the loss of national resources while allocating coal blocks, the flouting of systems and the clear display of crony capitalism in the exploration of hydrocarbon and the tragic tale of civil aviation in India. Through these illustrations, Rai wishes to not only expose government malfeasance, but also probe the mandate of the CAG as a watchdog. Equally, he hopes to push for long-term solutions to corruption and bring home the urgent need for ethics—for the pursuit of excellence, accountability, probity and transparency within governments, the bureaucracy, corporate enterprises and public life. Interesting facts A blow-by-blow, explosive, yet thoughtful account that sheds new light on the scams that shook India - 2G, coalgate, civil aviation, the conduct of the XIX commonwealth games and hydrocarbon contracts. Explodes the myth of accountability in contemporary Indian governance. Written by the eleventh CAG of India and a symbol of the anti-corruption movement, Vinod Rai. Presents long-term solutions for the future, so as to contain procedural irregularities within the government and corporate enterprises. Provides a roadmap for good governance, important for the growth of the nation. Exhorts younger professionals / administrators to strive for excellence.

Incentives and Institutional Reform in Tax Enforcement Apr 06 2020 In developing countries, structural reform of income tax that neglects the reform of the tax administration has rarely proved successful. The authors argue that the enforcement dimension of tax administration is central to the issue. The first part of the book constructs a theoretical framework that helps to analyse the Indian experience. The second part examines the reform experiences of other developing countries in Asia and Latin America.

Cases on Consumer-Centric Marketing Management May 08 2020 As marketing strategies remain an essential tool in the success of an organization or business, the study of consumer-centered behavior is valuable in the improvement of these strategies. Cases on Consumer-Centric Marketing Management presents a collection of case studies highlighting the importance of customer loyalty, customer satisfaction, and consumer behavior for marketing strategies. This comprehensive collection provides fundamental research for professionals and researchers in the fields of customer relations, marketing communication, consumer research, and marketing analytics for insights into practical aspects of marketing in any organization. State Finances and Regional Development in India Jul 22 2021

The Somme Oct 13 2020 In the heat of May in 1916, the First World War has entered something of a stalemate. The Allies have found themselves making little ground around the River Somme in France, despite hatching an action plan that seemed guaranteed to lead them to an easy victory. Those high up in the chain of command have become increasingly worried that their orders have found their way into the hands of the Bosch, who are always ready for their offensive manoeuvres. Needing to get to the bottom of why their attacks keep getting undermined by the enemy, Major Horace McCracken, a member of the recently-established MI6, is called into France to discover the source of the leaks. Having proven his mettle infiltrating those responsible for the uprisings in Ireland, if there really is someone - or maybe even a group of traitors - leaking military tactics to the enemy, he's the man capable enough to find them out. However, the realities of the Western Front don't offer the best conditions for an operation of this magnitude, and McCracken is forced to face the disturbing inhumanity of the conflict head on. Picardy might have once been this idyllic French getaway, but the ravages of fire and brimstone have rendered that image all but a distant memory. But, for McCracken and the Allies, it's a memory worth dying for.

The Transportation of Alaskan Natural Gas Mar 18 2021

PUBLIC ADMINISTRATION IN INDIA Sep 04 2022 The book presents an updated analysis of the public administrative system existing in India, covering different administrative structures as well as functions at the Central, State, district and local levels of our country. **NEW TO THE SECOND EDITION** • A thorough discussion on the structure of the civil services • Functions and roles of the— President, Prime Minister, Council of Ministers, Finance, Home and External Affairs Ministries, and Central Secretariat • Roles of the State administration with special emphasis on the—Governor, Chief Minister, Chief Secretary, State Secretariat, and District Collector • Thorough analysis of the local self governments at the rural and urban areas of India • Women's participation in the rural local self government. • Explain financial administration, welfare administration, citizens and administration, and major Indian committees and commissions • Discusses issues such as Personnel Administration, Administration of Law and Order, Information Technology, Human Rights, Globalisation and Civil Society, etc. • Detailed analyses of Kolkata Municipal Corporation, Changing Nature of Planning—NITI Aayog, MGNREGA, Sarva Shiksha Abhiyan (SSA), NRHM, Gender and Administration • A new chapter on 'Some Recent Developments in the Concept of Administration' (Chapter 16). **TARGET AUDIENCE** Ø B.A. Political Science Ø M.A. Political Science Ø Civil Services Aspirants

Apart from paying attention to theories, sheer focus is given to the topics & trends of Questions provided in previous years' civil services exams, Chapterwise practice questions are also mentioned to help students in easy remembrance and quick revision and lastly, Subjectwise detailed explanations of previous civil services exams. Including topical coverage of syllabus and previous years' questions with more than 3000 MCQs, this Magbook of Indian Polity & Governance is a must for civil services (Pre) Examination, state PCS and other competitive exams. **TOC** Constitutional Development, Salient Features of Indian Constitution, The Preamble, The Union and Its Territory, Citizenship, Fundamental Rights, Directive Principles of State Policy, Union Executive, Parliament, The Judiciary, State Government, Centre State Relations, Elections, Politician Parties and Pressure Groups, Public Service Commissions, Official Languages, Emergency Provinces, Schedule and Tribal Areas, Local Government, Constitutional, Statutory Institutions, Governance, Public Policy in India, Rights Issues in India, Amendment of the Constitution, Constitutional Provisions Regarding UTs, States and Special Status and Tribunal, Glossary, Practice Sets (1-5), Previous Years' Solved Papers Set 1, Previous Years' Solved Papers Set 2.

Beyond Kolkata Aug 03 2022 This book examines the politics behind, and the socio-economic and ecological repercussions of, the making of a new township, variously called New Town, Megacity or Jyoti Basu Nagar, in Rajarhat near Kolkata. Conceived by the West Bengal state government in the mid-1990s, in pandering to the vision of urban planners of creating a hi-tech town beyond an unruly, crowded Kolkata, and feeding the hunger of realtors and developers, the city is built on the foundations of coercive, even violent, land acquisition, state largesse and corruption — and at the cost of erasing a self-sufficient subsistence economy and despoiling a fragile environment. Yet, after its completion and departure of construction labour, the new town appears as a necropolis, a ghost city, that belies its promised image of an urban utopia, even as the displaced locals lead a precarious, mobile existence as 'transit labour', engaged in odd and informal jobs. Written on the basis of intensive fieldwork, government documents, court records, and chronicles of public protests, this book broadly analyses the politics and economics of urbanisation in the age of post-colonial capitalism, particularly the paradoxical combination of neoliberal and primitive modes of capital accumulation upon which the global emergence of 'new towns' is based. Departing from the dominant styles of urban studies that focus on cultural or spatial analysis of cities, the authors show the links between changes in space, technology, political economy, class composition, and forms of urban politics which give concrete shape to a city. It will immensely interest those in sociology, political science, economics, development studies, urban studies, policy and governance studies, and history.

Development of Environment Laws in India Jan 16 2021 Presents dynamic interactions between the judiciary, executive and parliamentary structures in shaping environment law in neoliberal India.

Development, Environment and Migration Jan 28 2022 This book brings the discourses around social justice and sustainable development back into focus by looking at India's mining sector and the state's frameworks for economic development. The chapters in this volume analyse mining practices in the mineral-rich areas of eastern India through various case studies and highlight their immense human and environmental costs. This volume critically analyses selected mining projects in India that have resulted in large-scale displacements, impoverishment and environmental degradation. It identifies the gaps in policy, its implementation, and the lack of safeguards which threaten the socio-economic and ecological ways of life and the livelihoods of the local communities. Based on documents, reports, interviews and field observations, this book engages with the issues surrounding the mining sector, e.g., land acquisition, land use and degradation, the politics of compensation, policies, agitation and social mobilisation, health and agriculture, livelihood and gender. It further provides an assessment of local political economies and offers suggestive frameworks for inclusive growth in this sector. This book will be of interest to students and researchers exploring the disciplines of development studies, sociology, law and governance, human ecology and economics.

India's Approach to Border Management Aug 30 2019 This book attempts to provide a comprehensive understanding of the circumstances which have shaped India's approach towards its international borders and the framework it has developed to better manage its borders. The book argues that persistence of various cross-border threats and challenges and an absence of robust intra-regional trade among its neighbouring countries forced India to employ a security-centric and unilateral approach to border management with emphasis on hardening the borders to cross-border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats. Besides discussing the threats and challenges that India faces along the borders, the book aims to develop an understanding of India's border management practices by analysing various programmes and initiatives such as the raising of border guarding forces; building of physical and electronic fences; the establishment of modern facilities for smoothening legitimate cross-border travel; the development of the border areas through special programmes; and increasing trade and connectivity as well as other cooperative bilateral mechanisms. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan).

The SJIORI Cross-Border Region Nov 01 2019 Twenty-five years ago, the governments of Singapore, Malaysia, and Indonesia agreed to jointly promote the city-state, the state of Johor in Malaysia, and the Riau Islands in Indonesia. Facilitated by common cultural references, a more distant shared history, and complementary attributes, interactions between the three territories developed quickly. Logistics networks have proliferated and production chains link firms based in one location with affiliates or transport facilities in the other territories. These cross-border links have enabled all three locations to develop their economies and enjoy rising standards of living. Initially economic in nature, the interactions between Singapore, Johor, and the Riau Islands have multiplied and grown deeper. Today, people cross the borders to work, go to school, or avail of an increasing range of goods and services. New political, social, and cultural phenomena have developed. Policymakers in the various territories now need to reconcile economic imperatives and issues of identity and sovereignty. Enabled by their proximity and increasing opportunities, families have also begun to straddle borders, with resulting questions about citizenship and belonging. Using the Cross-Border

Region framework - which seeks to analyse these three territories as one entity simultaneously divided and bound together by its borders - this book brings together scholars from a range of disciplines. Its 18 chapters and more than 20 maps examine the interaction between Singapore, Johor, and the Riau Islands over the past quarter-century, and seek to shed light on how these territories could develop in the future.

Disaster Management for 2030 Agenda of the SDG Oct 05 2022 This book shows how specifically each goal of Sustainable Development Goals could be incorporated in country wise developmental programmes set to transform the world. It highlights how a combination of initiatives on mitigation of disasters and a robust progress could build a resilient society. The book discusses multidimensional processes such as administrative, financial and social challenges which can mitigate disasters and help in an advancement towards SDG Goals. It highlights the embeddedness of SDGs in disaster mitigation as they tend to be linked and interdependent. By linking sustainable development to disaster mitigation one gets a strong justification for investment into preparedness as a guarantee or insurance against loss and damages due to unforeseen disasters.

Indian Economy : Current Affairs Yearbook 2020 Jun 28 2019 Must Read Book UPSC Civil Services Examination – 2020 General Studies Paper (Prelims and Mains) Indian Economy Important Topics In General studies paper of UPSC Civil services Examination, Economy is one of the most important sections of the Prelims as well as mains exam. One can easily expect 15 – 20 questions from Economy syllabus in UPSC Prelims General Studies Paper I. The material covers all trending, important and relevant facts and material required to be studied by aspirants in a single booklet, important topics for the UPSC civil services exam. This helps to ease their preparation and provides consolidated and complete UPSC notes at one place. IAS aspirants need a single-source material that is a complete guide for their preparation in the UPSC CSE Prelims examination for Indian Economy. This source is brought to them to aid them to achieve success in this very attempt; Indian Economy for UPSC Prelims and Mains Exam 2020 We have covered only those topics which were in news/trend in last 1/1.5 year and will add more topics time to time, High chance to ask the questions from these topics in civil services preliminary and mains exam 2020.

What the CAG's Audit Reports Say Nov 06 2022

Infrastructure, PPP and Law for Executives Jul 10 2020 PPP (public-private partnership) is a buzzword, especially in growing economies like India where it takes a partnership between the government and a private entity to establish successful infrastructural projects. However, PPPs in India face many hurdles that lead to either long delays or surprisingly, sometimes early completion of PPP projects, but with quality getting compromised. This book will take readers inside the world of PPPs and show how the legal, regulatory and political environments have facilitated or obstructed the speedy enforcement of plans for the creation of requisite infrastructure in India. With the help of various case studies, the book discusses the legal and regulatory issues in different sectors of infrastructure in India such as power, telecom, rail, air, road and sea. In addition to discussing challenges faced by them, the book emphasizes that a proper legal framework with effective regulations is necessary to monitor and regulate the creation and management of public goods. From funding to legal issues, Infrastructure, PPP and Law for Executives shows what it takes for the safe sailing for PPPs in India. Written primarily from a managerial perspective, the book will be of interest to business managers, lawyers, government executives and anyone with serious interest in infrastructure development in India.

Land and Disaster Management Strategies in Asia Oct 01 2019 This book focuses on land and disaster governance in Asian countries. The Asian region has become increasingly vulnerable to natural disasters, including floods, cyclones, storms, earthquakes, drought, typhoons and tsunamis. Further, as a result of unsustainable changes being made in patterns of land use, catchment and coastal zones, increasing population density, migration patterns, and the spread of consumer culture across countries, the impact of natural disasters has increased manifold. The book addresses two major concerns in this field. Firstly, it discusses topics intended to raise awareness among all stakeholders of the critical aspects of disaster management in the context of Asia. Secondly, it calls upon policymakers, researchers, academics, practitioners, private enterprises and civil society organizations, as well as all those who have been, are and will be affected by natural disasters to search for innovative and novel approaches to reducing risk and managing disasters.

Solved Papers are provided form [2020-2017] to understand the paper pattern 3. 25 practice Sets are given for thorough practice 4. Level of Preparedness can be checked after every practice sets 5. Well detailed answers are provided to understand concepts The revised and updated edition of "WBCS CRACKER 25 Practice sets 2022" is, specially designed to serve as a complete test series for the candidates who aspire to crack West Bengal state Preliminary Examination in their first attempt. For the latest exam pattern, this book provides Previous Years' Solved Papers [2021-2017] right in the beginning of the book. Enclosed with 25 practice papers, it ensures that aspirants get to touch with every topic and question. After practicing each practice sets, you can easily check your level of preparation as each set has been designed by the expert team analysis. Strictly based on the latest pattern along with detailed explanation of question, this book proves to be a must have practice package before exam. TOC Solved Papers [2021-2017], Practice Sets (1-25)

Social Sector Development in North-East India Jun 20 2021 Social Sector Development in North-east India is the first comprehensive book that makes a strong case for people-centric social sector development of North-east India. This book argues that human capital formation through social sector development should be the strategic goal of development of this region, as the prospect for service sector development is much higher compared to that of the primary and secondary sectors. This needs a course correction in the erstwhile approaches of development, which has been driven by political and strategic considerations such as national security and the territorial integrity of India. This book advances an argument for a shift in approach of development policy from top-down, infrastructure-focused to bottom-up, people-centric and social sector development-focused. It also critiques the mainstream understanding of North-east India that treats it as a geographical entity and a monolithic socio-cultural society, ignoring its rich ethnic diversities, cultural pluralities and regional variations.

Free Medical Care to the Poor Apr 30 2022 Charitable Trust Hospitals get various benefits from the government such as land, electricity at subsidised rates, concessions on import duty and income tax, in return for which they are expected to provide free treatment to a certain number of indigent patients. In 2005, a scheme was instituted by the high court formalising that 20 per cent beds set aside for free and concessional treatment at these hospitals. In Mumbai, these hospitals have a combined capacity of more than 1600 beds. However, it has been brought to light both by the government and the media that these hospitals routinely flout their legal obligations. Considering that charitable hospitals are key resources for provisioning of health services to an already strained public health system it is vital to ensure their accountability. This study by CEHAT intended to look at the literature on the history of state aided charitable hospitals in Mumbai, and appraise the nature of engagement between the private sector and the state aided hospitals. It critically reviewed the data submitted by the state aided charitable hospitals of Mumbai to the Charity Commissioner on free and subsidised patients, to estimate the degree of compliance to by the hospitals and also to monitor them. The study found that a substantial number of state aided charitable hospitals do not comply with the scheme, and the degree of non compliance is quite high. Most state aided charitable hospitals never allotted the mandatory 20% beds for treating the poor and instead complained that they were treating too many patients. Data reported to the Charity Commission by the state aided charitable hospitals is inadequate, inconsistent and unsystematic. Charitable hospitals predominantly treat indigent or weaker section patients at the outpatient level because outpatient (OP) admissions can be passed off as inpatient (IP) admissions in the current scheme of things and frees an extra bed that can earn thousands of rupees per day. State aided charitable hospitals invariably underreported donations and bed numbers at the office of the Charity Commissioner. No matter how serious the allegations were, no kind of penalties were levied on the offending hospitals. There was not a single instance where disciplinary action was taken against an offending hospital in Mumbai. We hope that the findings of the study would be useful in making key recommendations for effective implementation of the high court scheme, especially for guaranteeing access to the poor to the 20% beds that are set aside.
