Pressed for Time May 03 2020 The technologically tethered, iPhone-addicted figure is an image we can easily conjure. Most of us complain that there aren't enough hours in the day and too many e-mails in our thumb-accessible inboxes. This widespread perception that life is faster than it used to be is now ingrained in our culture, and smartphones and the Internet are continually being blamed. But isn't the sole purpose of the smartphone to give us such quick access to people and information that we'll be free to do other things? Isn't technology supposed to make our lives easier? In *Pressed for Time*, Judy Wajcman explains why we immediately interpret our experiences with digital

technology as inexorably accelerating everyday life. She argues that we are not mere hostages to communication devices, and the sense of always being rushed is the result of the priorities and parameters we ourselves set rather than the machines that help us set them. Indeed, being busy and having action-packed lives has become valorized by our productivity driven culture. Wajcman offers a bracing historical perspective, exploring the commodification of clock time, and how the speed of the industrial age became identified with progress. She also delves into the ways time-use differs for diverse groups in modern societies, showing how changes in work patterns, family arrangements, and parenting all affect time stress. Bringing together empirical research on time use and theoretical debates about dramatic digital

developments, this accessible and engaging book will leave readers better versed in how to use technology to navigate life's fast lane.

Real snails and frogs bring to life miniature scenes meticulously created by artists Aleia Murawski and Sam Copeland, inspired by moody, cinematic moments and nostalgic Americana. These dreamlike and often hilarious images evoke the melodrama of daily life: a snail alone in an apartment with one last box to move; two snails getting slime all over grandma's plastic-covered armchairs; a frog doing karaoke in a heart-shaped hot tub. With hidden details to discover each time you flip through the pages, Snail World is a quirky celebration of the (very) little things in life. By Aleia Murawski and Sam Copeland. Britain B.C. Feb 09 2021
Traditionally, British history has been regarded as starting with the Roman Conquest. Yet this is to ignore half a million years of prehistory that still exert a profound influence on British and Irish life today. In Britain BC, Francis Pryor sets the record straight. Aided in recent years by aerial photography and coastal erosion (which has helped expose such sites as Seahenge), and by advances in scientific techniques such as radiocarbon dating and wood analysis, archaeologists have

discovered compelling evidence for a much more sophisticated life among the Ancient Britons than has been previously supposed. Far from being woad-painted barbarians, the earliest inhabitants of the British Isles had developed their own religions, laws, crafts, arts, trade systems, farms, and priesthood long before the Romans' brief occupation. Examining sites from the great ceremonial landscapes of Stonehenge, Avebury, and the Bend of the Boyne to small domestic settlements, and objects from precious ritual offerings to the tiny fragments of flint discarded by toolmakers, Francis Pryor, one of our leading archaeologists, has created a remarkable portrait of the life of our ancestors, in all its variety and complexity. His authoritative and radical re-examination of Britain and Ireland before the coming of the Romans makes us look afresh at the whole story of our islands.

However, just as he thinks that things cannot get possibly worse, they suddenly do. An eddy in the space-time continuum lands him, Ford Prefect, and their flying sofa in the middle of the cricket ground at Lord's, just two days before the world is due to be destroyed by the Vogons. Escaping the end of the world for a second time, Arthur, Ford, and their old friend Slartibartfast embark (reluctantly) on a mission to save the whole galaxy from fanatical robots. [Everyday Life in the Modern World](#) Apr 13 2021 When Lefebvre's book first appeared in the 1960s it was considered

a manifesto for a social movement that focused on the quality of life experienced by the individual--by the common man and woman. His emphasis on the quality of life will have even more appeal to those currently living with the problems of inflation, unemployment, and dwindling natural resources. Basing his discussions on everyday life in France, Lefebvre shows the degree to which our lived-in world and our sense of it are shaped by decisions about which we know little and in which we do not participate. He evaluates the achievements and shortcomings of applying various philosophical perspectives such as Marxism and Structuralism to daily life, studies the impact of consumerism on society, and looks at effects on society of linguistic phenomena and various kinds of terrorism communicated through mass media. In his new introduction to this edition, Philip Wander evaluates Lefebvre's ideas by relating many of them to current contexts. He discusses the political and economic aspects of daily life in the 1980s, the work environment, communications, and the world of science and technology.

The Death and Life of Great American Cities Oct 20 2021 In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written.

Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review [Your Life In My Hands - a Junior Doctor's Story](#) Jan 11 2021 'I am a junior doctor. It is 4 a.m. I have run arrest calls, treated life-threatening bleeding, held the hand of a young woman dying of cancer, scuttled down miles of dim corridors wanting to sob with sheer exhaustion, forgotten to eat, forgotten to drink, drawn on every fibre of strength that I possess to keep my patients safe from harm.' How does it feel to be spat out of medical school into a world of pain, loss and trauma that you feel wholly

ill-equipped to handle? To be a medical novice who makes decisions which - if you get them wrong - might forever alter, or end, a person's life? To toughen up the hard way, through repeated exposure to life-and-death situations, until you are finally a match for them? In this heartfelt, deeply personal account of life as a junior doctor in today's health service, former television journalist turned doctor, Rachel Clarke, captures the extraordinary realities of ordinary life on the NHS front line. From the historic junior doctor strikes of 2016 to the 'humanitarian crisis' declared by the Red Cross, the overstretched health service is on the precipice, calling for junior doctors to draw on extraordinary reserves of what compelled them into medicine in the first place - and the value the NHS can least afford to lose - kindness. Your Life in My Hands is at once a powerful polemic on the systematic degradation of Britain's most vital public institution, and a love letter of optimism and hope to that same health service and those who support it. This extraordinary memoir offers a glimpse into a life spent between the operating room and the bedside, the mortuary and the doctors' mess, telling powerful truths about today's NHS frontline, and capturing with tenderness and humanity the highs and lows of a new doctor's first steps onto the wards in the context of a health service at breaking point - and what it means to be entrusted with carrying another's life in your

hands. 'Eloquent and moving' - Henry Marsh 'There have been many books written by young doctors... but none comes close to Clarke's' - Sunday Times 'From the very heart of the NHS comes this brilliant insight into the continuing crisis in the health service. Rachel Clarke writes as the accomplished journalist she once was and as the leading junior doctor she now is - writing with humanity and compassion that at times reduced me to tears.' - Jon Snow, Channel 4 News 'Dr Clarke has written a blockbuster, a page-turner, a tear-jerker. This is a "from-the-heart" front-line account of the human cost of the wanton erosion of a magnificent ideal - healthcare free at the point of need, funded through public taxation, available to all - made real in the UK for near 70 years. It is a love-song for the wonderful National Health Service that has embodied - to an extent equalled nowhere in the world - the principle that healthcare is not a commodity but a great duty of state.' - Prof. Neena Modi, President of the Royal College of Paediatrics and Child Health 'A powerful account of life on the NHS frontline. If only Theresa May and Jeremy Hunt could see the passion behind the people in the NHS, they might stop treating them as the enemy, and understand that without them we don't have an NHS worth the name.' - Alastair Campbell *Life in the United Kingdom. The Culture of Narcissism: American Life in An Age of Diminishing Expectations

Sep 26 2019 The classic New York Times bestseller, with a new introduction by E.J. Dionne Jr. When *The Culture of Narcissism* was first published in 1979, Christopher Lasch was hailed as a "biblical prophet" (Time). Lasch's identification of narcissism as not only an individual ailment but also a burgeoning social epidemic was groundbreaking. His diagnosis of American culture is even more relevant today, predicting the limitless expansion of the anxious and grasping narcissistic self into every part of American life. *The Culture of Narcissism* offers an astute and urgent analysis of what we need to know in these troubled times.

Life in Crisis Jan 23 2022 *Life in Crisis* tells the story of Médecins Sans Frontières (Doctors Without Borders or MSF) and its effort to "save lives" on a global scale. Begun in 1971 as a French alternative to the Red Cross, the MSF has grown into an international institution with a reputation for outspoken protest as well as technical efficiency. It has also expanded beyond emergency response, providing for a wider range of endeavors, including AIDS care. Yet its seemingly simple ethical goal proves deeply complex in practice. MSF continually faces the problem of defining its own limits. Its minimalist form of care recalls the promise of state welfare, but without political resolution or a sense of well-being beyond health and survival. Lacking utopian certainty, the group struggles when the moral clarity of crisis

fades. Nevertheless, it continues to take action and innovate. Its organizational history illustrates both the logic and the tensions of casting humanitarian medicine into a leading role in international affairs.

My Life in the Sunshine Aug 25 2019 "Nabil traces the image of his father through song. With growing fascination and heartbreak, he draws out meaning from the shadow of absence, and ultimately redefines what it means to be a family." - Michelle Zauner, New York Times bestselling author of *Crying in H Mart* and Grammy nominated musician Japanese Breakfast A memoir about one man's journey to connect with his musician father, ultimately re-drawing the lines that define family and race. Throughout his adult life, whether he was opening a Seattle record store in the '90s or touring the world as the only non-white band member in alternative rock bands, Nabil Ayers felt the shadow and legacy of his father's musical genius, and his race, everywhere. In 1971, a white, Jewish, former ballerina, chose to have a child with the famous Black jazz musician Roy Ayers, fully expecting and agreeing that he would not be involved in the child's life. In this highly original memoir, their son, Nabil Ayers, recounts a life spent living with the aftermath of that decision, and his journey to build an identity of his own despite and in spite of his father's absence. Growing up, Nabil only meets his father a handful of times. But Roy's influence is strong, showing

itself in Nabil's instinctual love of music, and later, in the music industry—Nabil's chosen career path. By turns hopeful--wanting to connect with the man who passed down his genetic predisposition for musical talent—and frustrated with Roy's continued emotional distance, Nabil struggles with how much DNA can define a family... and a person. Unable to fully connect with Roy, Nabil ultimately discovers the existence of several half-siblings as well as a paternal ancestor who was enslaved. Following these connections, Nabil meets and befriends the descendant of the plantation owner, which, strangely, paves the way for him to make meaningful connections with extended family he never knew existed. Despite his father's absence, Nabil, through sheer will and a drive to understand his roots, re-draws the lines that define family and race.

The Life of Lines Oct 08 2020

To live, every being must put out a line, and in life these lines tangle with one another. This book is a study of the life of lines. Following on from Tim Ingold's groundbreaking work *Lines: A Brief History*, it offers a wholly original series of meditations on life, ground, weather, walking, imagination and what it means to be human. In the first part, Ingold argues that a world of life is woven from knots, and not built from blocks as commonly thought. He shows how the

principle of knotting underwrites both the way things join with one another, in walls, buildings and bodies, and the composition of the ground and the knowledge we find there. In the second part, Ingold argues that to study living lines, we must also study the weather. To complement a linealogy that asks what is common to walking, weaving, observing, singing, storytelling and writing, he develops a meteorology that seeks the common denominator of breath, time, mood, sound, memory, colour and the sky. This denominator is the atmosphere. In the third part, Ingold carries the line into the domain of human life. He shows that for life to continue, the things we do must be framed within the lives we undergo. In continually answering to one another, these lives enact a principle of correspondence that is fundamentally social. This compelling volume brings our thinking about the material world refreshingly back to life. While anchored in anthropology, the book ranges widely over an interdisciplinary terrain that includes philosophy, geography, sociology, art and architecture. **Life in the UK Test - Study and Practice** Apr 25 2022 **Death Without Weeping** Dec 10 2020 When lives are dominated by hunger, what becomes of love? When assaulted by daily acts of violence and untimely death, what happens to trust? Set in the lands of Northeast Brazil, this is an account of the everyday experience of

scarcity, sickness and death that centres on the lives of the women and children of a hillside "favela". Bringing her readers to the impoverished slopes above the modern plantation town of Bom Jesus de Mata, where she has worked on and off for 25 years, Nancy Scheper-Hughes follows three generations of shantytown women as they struggle to survive through hard work, cunning and triage. It is a story of class relations told at the most basic level of bodies, emotions, desires and needs. Most disturbing - and controversial - is her finding that mother love, as conventionally understood, is something of a bourgeois myth, a luxury for those who can reasonably expect, as these women cannot, that their infants will live.

Thomas-Mullers: The child who played with toy planes as an escape from domestic and sexual abuse, enduring the intergenerational trauma of Canada's residential school system; the angry youngster who defended himself with fists and sharp wit against racism and violence, at school and on the streets of Winnipeg and small-town British Columbia; the tough teenager who, at 17, managed a drug house run by members of his family, and slipped in and out of juvie, operating in a world of violence and pain. But behind them all, there was another Clayton: the one who remained immersed in Cree spirituality, and who embraced the rituals and ways of thinking vital to his heritage; the one who reconnected with the land during summer visits to his great-grandparents' trapline in his home territory of Pukatawagan in northern Manitoba. And it's this version of Clayton that ultimately triumphed, finding healing by directly facing the trauma that he shares with Indigenous peoples around the world. Now a leading organizer and activist on the frontlines of environmental resistance, Clayton brings his warrior spirit to the fight against the ongoing assault on Indigenous peoples' lands by Big Oil. Tying together personal stories of survival that bring the realities of the First Nations of this land into sharp focus, and lessons learned from a career as a frontline activist committed to addressing environmental injustice at a global scale, Thomas-Muller offers a narrative and vision of healing

Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies

Anne Stolaroff Cotsen Prize Life at Home in the Twenty-First Century cross-cuts the ranks of important books on social history, consumerism, contemporary culture, the meaning of material culture, domestic architecture, and household ethnoarchaeology. It is a distant cousin of Material World and Hungry Planet in content and style, but represents a blend of rigorous science and photography that these books can claim. Using archaeological approaches to human material culture, this volume offers unprecedented access to the middle-class American home through the kaleidoscopic lens of no-limits photography and many kinds of never-before acquired data about how people actually live their lives at home. Based on a rigorous, nine-year project at UCLA, this book has appeal not only to scientists but also to all people who share intense curiosity about what goes on at home in their neighborhoods. Many who read the book will see their own lives mirrored in these pages and can reflect on how other people cope with their mountains of possessions and other daily challenges. Readers abroad will be equally fascinated by the contrasts between their own kinds of materialism and the typical American experience. The book will interest a range of designers, builders, and architects as well as scholars and students who research various facets of U.S. and global consumerism, cultural history, and economic history.

Bread of Life in Broken Britain
Sep 18 2021 The return of Christian social service to the centre of British political life through the emergence of the foodbank movement has elicited a range of ecclesial responses. However, in their urgency and brevity these Church responses fail to systematically integrate political critique and social analysis, nor do they undertake a sustained integration of the recent gains in political theology with the realities of our current 'mixed economy of welfare'. Charles Pemberton

draws on interviews with foodbank users and volunteers to defend and advance a Christian vision of welfare beyond emergency food provision. He suggests that behind the day-to-day struggles of those using foodbanks there are wider much concerns about loneliness, marginalisation and the wholesale fragmentation of society.

One Day in the Life of Ivan Denisovich Jun 03 2020 "Stark . . . the story of how one falsely accused convict and his fellow prisoners survived or perished in an arctic slave labor camp after the war."—Time From the icy blast of reveille through the sweet release of sleep, Ivan Denisovich endures. A common carpenter, he is one of millions viciously imprisoned for countless years on baseless charges, sentenced to the waking nightmare of the Soviet work camps in Siberia. Even in the face of degrading hatred, where life is reduced to a bowl of gruel and a rare cigarette, hope and dignity prevail. This powerful novel of fact is a scathing indictment of Communist tyranny, and an eloquent affirmation of the human spirit. The prodigious works of Alexander Solzhenitsyn, including his acclaimed *The Gulag Archipelago*, have secured his place in the great tradition of Russian literary giants.
