ALA Glossary of Library and Information Science, Fourth Edition Apr 28 2022 The only things
librarians seem to encounter more often than acronyms are strings of jargon and arcane
technical phrases—and there are so many floating around that even just reading an article in
a professional journal can bewilder experienced librarians, to say nothing of those new to
the profession! Featuring thousands of revised and brand new entries, the fourth edition of
ALA Glossary of Library and Information Science presents a thorough yet concise guide to the
specific words that describe the materials, processes and systems relevant to the field of
librarianship. A panel of experts from across the LIS world have thoroughly updated the
glossary to include the latest technology- and internet-related terms, covering metadata,

licensing, electronic resources, instruction, assessment, readers' advisory, and electronic workflow. This book will become an essential part of every library's and librarian's reference collection and will also be a blessing for LIS students and recent graduates.

Learn Library of Congress Subject Access (International Edition) Jul 08 2020 "Learn Library of Congress subject access" covers the skills necessary for a subject cataloger in a library or information agency, whether at a professional or a paraprofessional level. It is suitable for use by librarianship students, and for those studying subject cataloging by themselves as part of their continuing professional development. Since most catalogs provide some subject access, it is important for all library students and most library staff to be familiar with at least the basics of subject cataloging. This book introduces students to the concepts of subject analysis and subject description. It provides practical guidance on identifying important topics and allocating appropriate terms to describe them. Since Library of Congress subject headings (LCSH) is the most widely used subject headings list worldwide, the main focus of the book is on effectively using this scheme. A mastery of Library of Congress subject headings will assist catalogers using any subject headings scheme. This first international edition of Learn Library of Congress subject access builds on previous Australian and North American editions, with a broader range of exercises and more information on chronological, geographic and name headings. A new chapter explains the features of Library of Congress' online product, Classification Web, and how it can be used for efficiently searching LCSH. Throughout the text there are exercises to practise and test new skills, with answers for self-checking at the back of the book. You may not always agree completely with the answers given, and it is useful to check them with a teacher or experienced cataloger. Always bear in mind that there is often room for more than one interpretation or emphasis, particularly in the area of subject analysis. LCSH is continually updated to include new concepts and incorporate revisions to existing headings. Answers to exercises reflect current practices as recorded in the 37th (2015) edition of Library of Congress subject headings and the online version of the Subject headings manual. Your answers may vary slightly if other editions of the scheme are used. Throughout the text, references have been made to relevant sections of the Subject headings manual by way of the section numbers—e.g., Free-Floating Subdivisions (H 1095). "Note on Spelling and Capitalization" This book is used in North America, Europe and Australasia, across countries that employ different spelling conventions for English words. For consistency, American spelling has been adopted for the text. Titles included in the text are capitalized according to standard library cataloging practice—that is, apart from names, only the first word of the title has a capital letter. This is intended to accustom library students and staff to this style.

The Library of the Unwritten Aug 28 2019 Age range 14+ 'Elaborate world-building, poignant and smart characters, and a layered plot...An ode to books, writing, and found families.' -- Library Journal, Starred Review 'Hackwith writes a fast-paced, suspenseful story set in an intriguing world where storytellers can duel with words and souls are not what they seem.' -- Booklist Join the library and raise hell in the first book of a stunning new fantasy series, where books unfinished by their authors reside within the Unwritten Wing of the devil's own library, and restless characters will emerge from out of their pages... Many years ago, Claire was named Head Librarian of the Unwritten Wing -- a neural space in hell where all stories unfinished by their authors reside. Her job consists mainly of repairing and organising books, but also of keeping an eye on restless stories that risk materialising as characters and escaping the library. When a Hero escapes from his book and goes in search of his author, Claire must track and capture him with the help of former muse and current assistant Brevity and nervous demon courier Leto. But what should have been a simple retrieval goes horrifyingly wrong when the terrifyingly angelic Ramiel attacks them, convinced that they hold the Devil's Bible. The text of the Devil's Bible is a powerful weapon in the power struggle between Heaven and Hell, so it falls to the librarians to find a book with the power to reshape the boundaries between Heaven, Hell...and Earth. 'Clever,

charming, full of intricate word-building and delightful characters, The Library of Unwritten is the first book in your new favorite series.' -- Christina Henry, author of The Girl in Red 'A muse, an undead librarian, a demon, and a ghost walk into Valhalla...what follows is a delightful and poignant fantasy adventure that delivers a metric ton of found-family feels and reminds us taht the hardest stories to face can be the ones we tell about ourselves.' -- New York Times best-selling author Kit Rocha 'A baroquely imagined and totally unexpected original take on such well-worn topics as Hell, libraries, and the difference between what never was and what never will be.' -- Meg Elison, author of the The Road to Nowhere series 'A wry, high-flying, heartfelt fantasy, told with sublime prose and sheer joy even at its darkest moments (and there are many). I want this entire series on my shelf yesterday.' -- Tyler Hayes, author of The Imaginary Corpse
