New Perspectives on Irish English Jul 25 2019 This volume brings together current research by international scholars on the varieties of English spoken in Ireland. The papers apply contemporary theoretical and methodological approaches and frameworks to a range of topics. A number of papers explore the distribution of linguistic features in Irish English, including the evolution of linguistic structures in Irish English and linguistic change in progress, employing broadly quantitative sociolinguistic approaches. Pragmatic features of Irish English are explored through corpus linguistics-based analysis. The construction of linguistic corpora using written and recorded material form the focus of other papers, extending and analyzing the growing range of corpus material available to researchers of varieties of English, including diaspora varieties. Issues of language and identity in contemporary Ireland are explored in several contributions using both qualitative and quantitative methods. The volume will be of interest to linguists generally, and to scholars with an interest in varieties of English.

Early Modern English Dialogues May 15 2021 This book analyses speech-related genres in Early Modern English, providing ideas of what spoken interaction in earlier times might have been like.

Assessing Young Learners of English: Global and Local Perspectives Apr 13 2021 This volume documents international,

national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self- perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

The History of English in a Social Context Jul 17 2021 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields

such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.
