Social Capital in Eastern Europe Nov 23 2021 Katarzyna Lasinska deals with the consequences of democratic transitions in Middle and Eastern Europe. By selecting specific sets of countries according to the main explanations such as Catholic tradition, transformation process and communist legacies, the author identifies key factors explaining particular findings in Poland. Thank to systematically used comparative research strategy the pitfalls of idiosyncratic argumentation are successfully avoided. Through inclusion of religious tradition as an explanative factor the results go beyond the commonly used East-West comparisons. The author presents a comprehensive picture of complex conditions and different processes for social capital building across Eastern European societies.

Young minds in social worlds May 18 2021 Katherine Nelson re-centers developmental psychology with a revived emphasis on development and change, rather than foundations and continuity. Nelson argues that a child's entrance into the community of minds is a gradual process with enormous consequences for child development, and the adults that they become.

Business goals and social commitment. Shaping organisational capabilities. – Colombia's Fundación Social, 1984-2011 Apr 16 2021 Corporations, business groups and other business organizations are increasingly concerned about social challenges that directly impact the future of capitalism. Colombia's Fundación Social (FS) a century-old Latin American business group has from its start operated under two different but closely intertwined rationales: as a market, profit-seeking player; and as a civil society organization practicing solidarity. Social aims are at the core of FS mission, and business firms are instrumental. Remarkably, despite decades of growth as a ranking business group, FS underlying objective remained grounded in concern for the poor: To fight the structural causes of poverty.

The International Social Survey Programme 1984-2009 Jan 02 2020 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations. The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically-sophisticated mass attitude surveys across the globe. Starting in 1984 with five nations, it now encompasses forty-five nations spread over five continents, each administering an identical annual survey to a random sample of their population. Analyses of the data or descriptions of the methodology already appear in over 3,000 publications. This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents, nations and over time. Subjects range from inequality and the role of the state; ethnic, national and global identities; the changing relevance of religion, beliefs and practices; gender roles, family values and work orientations; household and society. Some chapters focus on methodological issues; others focus on substantive findings. This book sets new standards for cross-cultural research.

Society and Social Pathology Aug 09 2020 This book offers one of the most comprehensive studies of social pathology to date, following a cross-disciplinary and methodologically innovative approach. It is written for anyone concerned with understanding current social conditions, individual health, and how we might begin to collectively conceive of a more reconciled postcapitalist world. Drawing reference from the most up-to-date studies, Smith crosses disciplinary boundaries from cognitive science and anthropology to critical theory, systems theory and psychology. Opening with an empirical account of numerous interlinked crises from mental health to the physiological effects of environmental pollution, Smith argues that mainstream sociological theories of pathology are deeply inadequate. Smith introduces an alternative critical conception of pathology that drills to the core of how and why society is deeply ailing. The book concludes with a detailed account of why a progressive and critical vision of social change requires a "holistic view" of individual and societal transformation. Such a view is grounded in the awareness that a sustainable transition to postcapitalism is ultimately a many-sided (social, individual, and structural) healing process.

Social Casework Sep 29 2019 This is a basic book in social casework. Its thesis is that among all the complexities within the subject matter and operations of casework there are certain constant elements, forces, and processes which give coherence and unity to its practice. Mrs. Perlman identifies and analyzes these constants and views them within the logical framework of problem-solving. In turn, problem-solving as a casework process is examined in its likeness to normal human problem-solving efforts. The result is an approach to learning and thinking about casework which is at once organized, synthesized, and imaginative. The book's usefulness is enhanced by the author's lucid and pointed style.

The Practice of Macro Social Work Aug 21 2021 Intended for those who want to make a difference in today's modern society, this comprehensive book explores the theory and methods in nine arenas of macro social work at the community, organizational, societal, and global levels of practice. THE PRACTICE OF MACRO SOCIAL WORK, Fourth Edition, challenges readers to use their concern, values, and critical thinking skills to

assist those who struggle and have been excluded from making decisions that affect their lives--and to empower these less fortunate individuals to reclaim a healthy social environment for themselves and their children. The book's generalist orientation provides an organizational framework as well as history, biographical material on leading macro social workers, illustrative contemporary examples, and factual data that offers real life detail. Most important is the depth and wealth of practical information that assists readers in understanding how to help people engage in solving social problems, and in influencing social change to bring about a more just society and humane global civilization. Qualitative Research in Social Work Jun 26 2019 In this volume, progressive experts survey recent trends in qualitative study, which relies on small sample groups and interview data to better represent the context and complexity of social work practice. Chapters address different approaches to qualitative inquiry, applications to essential areas of research and practice, integration of qualitative and quantitative methods, and epistemological issues. This second edition brings even greater depth and relevance to social work qualitative research, including new material that tackles traditional research concerns, such as data quality, ethics, and epistemological stances, and updated techniques in data collection and analysis. To increase the usefulness for students and researchers, the editors have reorganized the text to present basic principles first and then their applications, and they have increased their focus on ethics, values, and theory. New and revised illustrative studies highlight more than ever the connection between effective research and improved social functioning among individuals and groups. The collection continues to feature scholars and practitioners who have shaped the social work research practice canon for more than twenty years, while also adding the innovative work of up-and-coming talent.
