Virtual Product Creation in Industry Aug 30 2019 Today, digital technologies represent an absolute must when it comes to creating new products and factories. However, day-to-day product development and manufacturing engineering operations have still only unlocked roughly fifty percent of the "digital potential". The question is why? This book provides compelling answers and remedies to that question. Its goal is to identify the main strengths and weaknesses of today's set-up for digital engineering working solutions, and to outline important trends and developments for the future. The book concentrates on explaining the critical basics of the individual technologies, before going into deeper analysis of the virtual solution interdependencies and guidelines on how to best align them for productive deployment in industrial and collaborative networks. Moreover, it addresses the changes needed in both, technical and management skills, in order to avoid fundamental breakdowns in running information technologies for virtual product creation in the future.

Manuale di topografia Oct 13 2020 Questo Manuale di Topografia è frutto di una lunga esperienza professionale ed editoriale dell'Autore; esso si propone, pur nella sua sinteticità, come un valido riferimento per gli operatori del settore, esponendo gli argomenti più usuali come:- il rilievo topografico, attraverso la descrizione delle sue fasi e delle strumentazioni di impiego, quali il teodolite ottico-meccanico e elettronico, la stazione totale, il livello ottico-meccanico e digitale, il sistema di posizionamento GPS, precisando le tecniche operative;- il rilievo fotogrammetrico, con particolare riguardo all'aerofotogrammetria ed alle strumentazioni ad essa funzionali. Si fa cenno anche al Telerilevamento, nonché al Rilievo dei vicini e ai GIS. Le applicazioni topografiche, comprendenti l'Agrimensura e le Sistemazioni superficiali dei terreni (Spianamenti) sono trattate in maniera esauriente. Conclude il volume un breve Glossario di Topografia, per dare la possibilità di orientarsi nella "giungla" di parole e acronimi, ormai entrati nella normalità della comunicazione tecnica. Roberto D'Apostoli, ingegnere civile, è progettista, direttore lavori e collaudatore di opere pubbliche e private. Già docente di topografia e fotogrammetria, insegna nell'ambito della formazione professionale post-secondaria. Volumi collegati:- Tracciamenti di cantiere, R.
