Decolonizing Methodologies Aug 26 2019 'A landmark in the process of decolonizing imperial Western knowledge.' Walter D. Mignolo, Duke University

To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

Making a Good Script Great May 16 2021 "Making a good script great is not just a matter of having a good idea. Nor is it a matter of just putting that good idea down on paper. In scriptwriting, it's not just the writing but also the rewriting that counts. [This book] focuses on the rewriting process and offers specific methods to help you craft tighter, stronger, and more workable scripts. While retaining all the valuable insights that have made the first edition one of the all-time most popular screenwriting books, this expanded, second edition adds new chapters that take you through the complete screenwriting process, from the first draft through the shooting draft. If you're writing your first script, this book will help develop your skills for telling a compelling and dramatic story. If you're a veteran screenwriter, this book will articulate the skills you know intuitively. And if you're currently stuck on a rewrite, this book will help you analyze and solve the problems and get your script back on track."--Back cover.

Teaching Mathematics Creatively Nov 21 2021 This revised and updated third edition offers a range of strategies, activities and ideas to bring mathematics to life in the primary classroom. Taking an innovative and playful approach to maths teaching, this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge, understanding and enjoyment of the subject. In the creative classroom, mathematics becomes a tool to build confidence, develop problem solving skills and motivate children. The fresh approaches explored in this book include a range of activities such as storytelling, music and construction, elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way. Key chapters of this book explore: •

Learning maths outdoors - make more noise, make more mess or work on a larger scale • Everyday maths - making sense of the numbers, patterns, shapes and measures children see around them • Music and maths – the role of rhythm in learning, and music and pattern in maths Stimulating, accessible and underpinned by the latest research and theory, this is essential reading for trainee and practising teachers who wish to embed creative approaches to maths teaching in their classroom.

Urbanization Nov 29 2019 *Urbanization: An Introduction to Urban Geography, Third Edition* captures the changes in the nature and outcomes of urbanization processes for people, as well as the development of new ways of thinking about urban geography. Unraveling the interlocking processes of urbanization, Knox and McCarthy present a vivid and meaningful explanation of constantly changing urban geographies and urban life. This framework supports the discussion of recent changes while addressing much of the “traditional” subject matter of urban geography. The book's dynamic approach also allows for integration of both theories and facts, where key concepts and theories are presented in relation to prior events and ideas—providing a coherent and comprehensive introduction to urban geography that offers a historical and process-oriented approach. With a U.S. focus that also offers global context and comparative international perspectives, the authors examine urban trends and their outcomes in both developed and less-developed countries to understand, analyze, and interpret the landscapes, economies, and communities of towns and cities around the world.

Making a Good Script Great Mar 02 2020 Making a good script great is more than just a matter of putting a good idea on paper. It requires the working and reworking of that idea. This book takes you through the whole screenwriting process—from initial concept through final rewrite—providing specific methods that will help you craft tighter, stronger, and more saleable scripts. While retaining the invaluable insights that placed its first two editions among the all-time most popular screenwriting books, this expanded, revised, and updated third edition adds rich and important new material on dialogue, cinematic images, and point of view, as well as an interview with screenwriter Paul Haggis. If you are writing your first script, this book will help develop your skills for telling a compelling and dramatic story. If you are a veteran screenwriter, it will help you articulate the skills you know intuitively. And if you are currently stuck on a rewrite, this book will help you analyse and solve your script's problems and get it back on track.
