Lipstick Jihad Jul 25 2019 As far back as she can remember, Azadeh Moaveni has felt at odds with her tangled identity as an Iranian-American. In suburban America, Azadeh lived in two worlds. At home, she was the daughter of the Iranian exile community, serving tea, clinging to tradition, and dreaming of Tehran. Outside, she was a California girl who practiced yoga and listened to Madonna. For years, she ignored the tense standoff between her two cultures. But college magnified the clash between Iran and America, and after graduating, she moved to Iran as a journalist. This is the story of her search for identity, between two cultures cleaved apart by a violent history. It is also the story of Iran, a restive land lost in the twilight of its revolution. Moaveni's homecoming falls in the heady days of the country's reform movement, when young people demonstrated in the streets and shouted for the Islamic regime to end. In these tumultuous times, she struggles to build a life in a dark country, wholly unlike the luminous, saffron and turquoise-tinted Iran of her imagination. As she leads us through the drug-soaked, underground parties of Tehran, into the hedonistic lives of young people desperate for change, Moaveni paints a rare portrait of Iran's rebellious next generation. The landscape of her Tehran — ski slopes, fashion shows, malls and cafes — is populated by a cast of young people whose exuberance and despair brings the modern reality of Iran to vivid life.

Engineering Fundamentals: An Introduction to Engineering, SI Edition Jul 29 2022 Develop strong problem-solving skills and the solid foundation in fundamental principles needed to become an analytical, detail-oriented and creative engineer with Moaveni's ENGINEERING FUNDAMENTALS: AN INTRODUCTION TO ENGINEERING, SI Edition, 6th Edition. This reader-friendly presentation opens with an overview of what engineers do today and offers behind-the-scenes glimpses into various areas of specialization. Candid, straight-forward discussions examine what engineers truly need to succeed in today's times. This edition covers basic physical concepts and laws most important for engineering studies and on-the-job success. Readers learn how these principles relate to engineering in practice as Professional Profiles highlight the work of successful engineers around the globe. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Model Validation and Uncertainty Quantification, Volume 3 Mar 01 2020 Model Validation and Uncertainty Quantification, Volume 3. Proceedings of the 33rd IMAC, A Conference and Exposition on Balancing Simulation and Testing, 2015, the third volume of ten from the Conference brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Structural Dynamics, including papers on: Uncertainty Quantification & Model Validation Uncertainty Propagation in Structural Dynamics Bayesian & Markov Chain Monte Carlo Methods Practical Applications of MVUQ Advances in MVUQ & Model Updating

Engineering Fundamentals: An Introduction to Engineering, SI Edition Mar 13 2021 Specifically designed as an introduction to the exciting world of engineering, ENGINEERING FUNDAMENTALS: AN INTRODUCTION TO ENGINEERING encourages students to become engineers and prepares them with a solid foundation in the fundamental principles and physical laws. The book begins with a discovery of what engineers do as well as an inside look into the various areas of specialization. An explanation on good study habits and what it takes to succeed is included as well as an introduction to design and problem solving, communication, and ethics. Once this foundation is established, the book moves on to the basic physical concepts and laws that students will encounter regularly. The framework of this text teaches students that engineers apply physical and chemical laws and principles as well as mathematics to design, test, and supervise the production of millions of parts, products, and services that people use every day. By gaining problem solving skills and an understanding of fundamental principles, students are on their way to becoming analytical, detail-oriented, and creative engineers. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Energy, Environment, and Sustainability Sep 06 2020 Gain a better understanding of the connections among earth's finite resources and the environmental, social, ethical, technical and economical impacts of your daily decisions with Moaveni's ENERGY, ENVIRONMENT, AND SUSTAINABILITY, 2nd Edition. As climate change has an increasing influence on today's world, you learn how to evaluate energy and environmental footprints to make environmentally sound decisions and help preserve natural resources. Become more aware of your own energy consumption as you study how much energy is required to manufacture, transport, use and dispose of common products. A new chapter highlights evidence-based analysis and how this systematic approach to sustainability can lead to more reliable decisions. Relevant, everyday examples bring concepts to life, while hands-on problems give you experience in analyzing information, preparing reports and presentations and working within teams. You learn how to make the world a better place, beginning with your own personal changes. The Empress and I Dec 10 2020 How a unique alliance between two women in the 1970s led to the acquisition of a treasure trove of modern art now worth billions In the 1970s, American curator Donna Stein served as the art advisor to Empress Farah Diba Pahlavi, the Shahbanu of Iran. Together, Stein and Pahlavi generated an art market in Iran, as Stein encouraged Pahlavi's patronage of the Tehran Museum of Contemporary Art. Today, the contemporary section of the Iranian National Collection--most of which continues to languish in storage--is considered one of the most significant collections of modern art outside of Europe and the United States. The Empress and I is a vivid account of Stein's experience at the helm of this storied intercultural initiative. In crafting her highly readable narrative, Stein cites a number of previously confidential documents, including private correspondence with artists and dealers. This text explores the relationship between two women united by their shared passion for the arts and the continued legacy of their partnership in today's art world.

Iran Awakening Jun 23 2019 In This Remarkable Book, Shirin Ebadi, Iranian Human Rights Lawyer And Activist, And Nobel Peace Prize Laureate, Tells Her Extraordinary Story. Dr Ebadi Is A Tireless Voice For Reform In Her Native Iran, Where She Argues For A New Interpretation Of Islamic Law In Harmony With Vital Human Rights Such As Democracy, Equality Before The Law, Religious Freedom And Freedom Of Speech. She Is Known For Defending Dissident Figures, And For The Establishment Of A Number Of Non-Profit Grassroots Organisations Dedicated To Human Rights. In 2003 She Became The First Muslim Woman, And The First Iranian, To Be Awarded The Nobel Peace Prize. She Chronicles Her Childhood And Upbringing Before The Revolution, Her Education And Student Years At The University Of Tehran, Her Marriage And Its Challenges, Her Religious Faith, And Her Life As A Mother And As An Advocate For The Oppressed. As A Human Rights Campaigner, In Particular For Women, Children And Political Prisoners In Iran, Her Book Is A Must-Read For Anyone Fascinated By The Life Story And Beliefs Of A Courageous And Unusual Woman, As Well As Those Interested In Current Events (Especially Those Of The Middle East), And Those Who Want To Know The Truth About The Position Of Women In A Muslim Society.

Energy, Environment, and Sustainability Mar 25 2022 Everyone wants to make the world a better place, but how and where do you start? Leo Tolstoy, a Russian novelist and philosopher, once said, "Everyone thinks of changing the world, but no one thinks of changing oneself." Moaveni's ENERGY, ENVIRONMENT, AND SUSTAINABILITY helps readers understand what energy, environment and sustainability issues mean and why they are important considerations today. Increasingly, because of worldwide socioeconomic trends, environmental concerns, and earth's finite resources, more is expected of each individual. The book helps students to understand the connections among earth's finite resources and the environmental, social, ethical, technical, and economical factors impacted by daily decisions. This book teaches students how to evaluate these important issues and make environmentally sound decisions. Between the Middle East and the Americas Aug 06 2020 Perceptions of the Middle East in conflicting discourses from North America, South America, and Europe

Life Stories: A Guide to Reading Interests in Memoirs, Autobiographies, and Diaries Apr 01 2020 Memoirs, autobiographies, and diaries represent the most personal and most intimate of genres, as well as one of the most abundant and popular. Gain new understanding and better serve your readers with this detailed genre guide to nearly 700 titles that also includes notes on more than 2,800 read-alike and other related titles. • A list of subjects and suggested "read-alikes" accompany each title • Appendixes cover awards, websites, and resources • Detailed indexes provide further points of access

Guest House for Young Widows Aug 30 2022 An intimate, deeply reported account of the women who made a shocking decision: to leave their comfortable lives behind and join the Islamic State. In early 2014, the Islamic State clinched its control of Raqqa in Syria. Baghdadi, the leader of ISIS, urged Muslims around the world to come join the caliphate. Having witnessed the brutal oppression of the Assad regime in Syria, and being moved to fight for justice, thousands of men and women heeded his call. At the heart of this story is a cast of unforgettable young women who responded. They include Emma, from Germany; Sharmeena, from Bethnal Green, London; and Nour, from Tunis. These were women — some still in school — from urban families, some with university degrees and bookshelves filled with novels by Jane Austen and Dan Brown; many with cosmopolitan dreams of travel and adventure. But instead of finding a land of justice and piety, they found themselves trapped within the most brutal terrorist regime of the twenty-first century, a world of chaos and upheaval and violence. What is the line between victim and collaborator? How do we judge these women who both suffered and inflicted intense pain? What role is there for Muslim women in the West? In what is bound to be a modern classic of narrative nonfiction, Moaveni takes us into the school hallways of London, kitchen tables in Germany, coffee shops in Tunis, the caliphate's OB/GYN and its 'Guest House for Young Widows' — where wives of the fallen waited to be remarried — to demonstrate that the problem called terrorism is a far more complex, political, and deeply relatable one than we generally admit.

Finite Element Analysis: Theory and Application with ANSYS, Global Edition Sep 30 2022 For courses in Finite Element Analysis, offered in departments of Mechanical or Civil and Environmental Engineering. While many good textbooks cover the theory of finite element modeling, Finite Element Analysis: Theory and Application with ANSYS is the only text available that incorporates ANSYS as an integral part of its content. Moaveni presents the theory of finite element analysis, explores its application as a design/modeling tool, and explains in detail how to use ANSYS intelligently and effectively. Teaching and Learning Experience This program will provide a better teaching and learning experience-for you and your students. It will help: *Present the Theory of Finite Element Analysis: The presentation of theoretical aspects of finite element analysis is carefully designed not to overwhelm students. *Explain How to Use ANSYS Effectively: ANSYS is incorporated as an integral part of the content throughout the book. *Explore How to Use FEA as a Design/Modeling Tool: Open-ended design problems help students apply concepts.

Control Configuration Selection for Multivariable Plants Jun 15 2021 Control of multivariable industrial plants and processes has been a challenging and fascinating task for researchers in this field. The analysis and design methodologies for multivariable plants can be categorized as centralized and decentralized design strategies. Despite the remarkable theoretical achievements in centralized multivariable control, decentralized control is still widely used in many industrial plants. This trend in the beginning of the third millennium is still there and it will be with us for the foreseeable future. This is mainly because of the easy implementation, maintenance, tuning, and robust behavior in the face of fault and model uncertainties, which is reported with the vast number of running decentralized controllers in the industry. The main steps involved in employing decentralized controllers can be summarized as follows: • Control objectives formulation and plant modeling. • Control structure selection. • Controller design. • Simulation or pilot plant experiments and Implementation. Nearly all the textbooks on multivariable control theory deal only with the control system analysis and design. The important concept of control structure selection which is a key prerequisite for a successful industrial control strategy is almost unnoticed. Structure selection involves the following two main steps: • Inputs and outputs selection. • Control configuration selection or the input-output pairing problem. This book focuses on control configuration selection or the input-output pairing problem, which is defined as the procedure of selecting the appropriate input and output pair for the design of SISO (or block) controllers.

Fusion: Integrated Reading and Writing Sep 18 2021 FUSION: INTEGRATED READING AND WRITING, Book 2 is a developmental English book for reading and writing at the essay level. It connects the reading and writing processes so that they are fully reciprocal and reinforcing, using parallel strategies that guide students in analyzing reading to generate writing. FUSION teaches critical reading strategies in conjunction with the shared writing traits, such as main idea, details, and organization, and teaches the types of writing (including research) that students will encounter in their future courses. Grammar instruction is integrated in authentic writing, using high-interest professional and student models. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Robust Monitoring, Diagnostic Methods and Tools for Engineered Systems Jul 05 2020 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Seismic Structural Health Monitoring Nov 28 2019 This book includes a collection of state-of-the-art contributions addressing both theoretical developments in, and successful applications of, seismic structural health monitoring (S2HM). Over the past few decades, Seismic SHM has expanded considerably, due to the growing demand among various stakeholders (owners, managers and engineering professionals) and researchers. The discipline has matured in the process, as can be seen by the number of S2HM systems currently installed worldwide. Furthermore, the responses recorded by S2HM systems hold great potential, both with regard to the management of emergency situations and to ordinary maintenance needs. The book's 17 chapters, prepared by leading international experts, are divided into four major sections. The first comprises six chapters describing the specific requirements of S2HM systems for different types of civil structures and infrastructures (buildings, bridges, cultural heritage, dams, structures with base isolation devices) and for monitoring different phenomena (e.g. soil-structure interaction and excessive drift). The second section describes available methods and computational tools for data processing, while the third is dedicated to hardware and software tools for S2HM. In the book's closing section, five chapters report on state-of-the-art applications of S2HM around the world.

Muslim Women, Transnational Feminism and the Ethics of Pedagogy Feb 21 2022 Following a long historical legacy, Muslim women's lives continue to be represented and circulate widely as a vehicle of intercultural understanding within a context of the "war on terror." Following Edward Said's thesis that these cultural forms reflect and participate in the power plays of empire, this volume examines the popular and widespread production and reception of Muslim women's lives and narratives in literature, poetry, cinema, television and popular culture within the politics of a post-9/11 world. This edited collection provides a timely exploration into the pedagogical and ethical possibilities opened up by transnational, feminist, and anti-colonial readings that can work against sensationalized and stereotypical representations of Muslim women. It addresses the gap in contemporary theoretical discourse amongst educators teaching literary and cultural texts by and about Muslim Women, and brings scholars from the fields of education, literary and cultural studies, and Muslim women's studies to examine the politics and ethics of transnational anti-colonial reading

practices and pedagogy. The book features interviews with Muslim women artists and cultural producers who provide engaging reflections on the transformative role of the arts as a form of critical public pedagogy.

Underground Nov 08 2020 How Iranians forged a vibrant, informal video distribution infrastructure when their government banned all home video technology in 1983. In 1983, the Iranian government banned the personal use of home video technology. In *Underground*, Blake Atwood recounts how in response to the ban, technology enthusiasts, cinephiles, entrepreneurs, and everyday citizens forged an illegal but complex underground system for video distribution. Atwood draws on archival sources including trade publications, newspapers, memoirs, films, and laws, but at the heart of the book lies a corpus of oral history interviews conducted with participants in the underground. He argues that videocassettes helped to institutionalize the broader underground within the Islamic Republic. As Atwood shows, the videocassette underground reveals a great deal about how people construct vibrant cultures beneath repressive institutions. It was not just that Iranians gained access to banned movies, but rather that they established routes, acquired technical knowledge, broke the law, and created rituals by passing and trading plastic videocassettes. As material objects, the videocassettes were a means of negotiating the power of the state and the agency of its citizens. By the time the Ministry of Culture and Islamic Guidance lifted the ban in 1994, millions of videocassettes were circulating efficiently and widely throughout the country. The very presence of a video underground signaled the failure of state policy to regulate media. Embedded in the informal infrastructure--even in the videocassettes themselves--was the triumph of everyday people over the state.

Topics in Model Validation and Uncertainty Quantification, Volume 5 Jan 23 2022 Topics in Model Validation and Uncertainty Quantification, Volume : Proceedings of the 31st IMAC, A Conference and Exposition on Structural Dynamics, 2013, the fifth volume of seven from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Structural Dynamics, including papers on: Uncertainty Quantification & Propagation in Structural Dynamics Robustness to Lack of Knowledge in Design Model Validation

Dislocation, Writing, and Identity in Australian and Persian Literature Oct 08 2020 This study aims to foreground key literary works in Persian and Australian culture that deal with the representation of exile and dislocation. Through cultural and literary analysis, *Dislocation, Writing, and Identity in Australian and Persian Literature* investigates the influence of dislocation on self-perception and the remaking of connections both through the act of writing and the attempt to transcend social conventions. Examining writing and identity in David Malouf's *An Imaginary Life* (1978), Iranian Diaspora Literature, and Shahnush Parsipur's *Women Without Men* (1989/ Eng.1998), Hasti Abbasi provides a literary analysis of dislocation, with its social and psychological manifestations. Abbasi reveals how the exploration of exile/dislocation, as a narrative that needs to be investigated through imagination and meditation, provides a mechanism for creative writing practice.

Studyguide for Engineering Fundamentals Jun 03 2020 Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Reading Autobiography Jul 17 2021 projects, and an extensive bibliography. --Book Jacket.

Hydro-Environmental Analysis Jan 11 2021 Focusing on fundamental principles, *Hydro-Environmental Analysis: Freshwater Environments* presents in-depth information about freshwater environments and how they are influenced by regulation. It provides a holistic approach, exploring the factors that impact water quality and quantity, and the regulations, policy and management methods that are necessary to maintain this vital resource. It offers a historical viewpoint as well as an overview and foundation of the physical, chemical, and biological characteristics affecting the management of freshwater environments. The book concentrates on broad and general concepts, providing an interdisciplinary foundation. The author covers the methods of measurement and classification; chemical, physical, and biological characteristics; indicators of ecological health; and management and restoration. He also considers common indicators of environmental health; characteristics and operations of regulatory control structures; applicable laws and regulations; and restoration methods. The text delves into rivers and streams in the first half and lakes and reservoirs in the second half. Each section centers on the characteristics of those systems and methods of classification, and then moves on to discuss the physical, chemical, and biological characteristics of each. In the section on lakes and reservoirs, it examines the characteristics and operations of regulatory structures, and presents the methods commonly used to assess the environmental health or integrity of these water bodies. It also introduces considerations for restoration, and presents two unique aquatic environments: wetlands and reservoir tailwaters. Written from an engineering perspective, the book is an ideal introduction to the aquatic and limnological sciences for students of environmental science, as well as students of environmental engineering. It also serves as a reference for engineers and scientists involved in the management, regulation, or restoration of freshwater environments.

Let the Swords Encircle Me Apr 13 2021 NO OTHER COUNTRY SO DOMINATES THE HEADLINES: Iran is portrayed as a nuclear threat, a terrorist nation, a charter member of the Axis of Evil bent on the destruction of Israel. But behind those headlines—and the fierce rhetoric of Iran's most hard-line leaders—is a proud nation with a 2,500-year history of Persian poetry, art, and passion. Based on more than thirty extended reporting trips to Iran, including the turbulent aftermath of the disputed June 2009 election, Scott Peterson's portrait is the definitive guide to this enigmatic nation, from the roots of its incendiary internal struggles to the rise and slide of Iran's earthshaking 1979 Islamic Revolution. This prize-winning American journalist with unparalleled experience in Iran takes us there, inside a country where an educated and young population is restlessly eager to take its place in the world: where martyrs of the "sacred" Iran-Iraq War are still mourned with tears of devotion; where the cultural and religious forces of light and darkness are locked in battle. Peterson brings stunningly alive the diversity within Iran—from the hard-liners who shout "Death to America" to the majority who comprise the most pro-American population in the Middle East. *Let the Swords Encircle Me* gives voice to Iranians themselves—the clerics and the reformers, the filmmakers and the journalists, the True Believers and their Westernized and profane brethren—to understand the complexities of Iran today. Through dedicated and in-depth reporting, Peterson shows how every word, image, and sensibility in Iran is often deliciously unexpected and counterintuitive. Ideology matters. So does "resistance." And azadi: freedom. Peterson deftly holds a mirror up to both sides of the U.S.-Iran conflict. Americans and Iranians, he writes, share a belief in their own exceptionalism and "manifest destiny" (which for Iran includes its nuclear ambitions) and frequent need of an "enemy" in political discourse. The same elements that have locked the United States and Iran in the most vicious of struggles—stretching back to the 1953 CIA coup in Tehran and the 1979 U.S. Embassy hostage saga—are the same ones that could one day make Iran and the United States the most "natural" allies in the region. In this critical and personal account, Peterson illumines the latest episodes of Iran's century-old quest for democracy and freedom. He explains how the Islamic Revolution—launched as a beacon of justice and resistance for Iranians and all the world's Muslims—has not lived up to its ambitious promise. He shows how the violence of 2009 damaged the regime's legitimacy and marks the start of an irreversible decline. *Let the Swords Encircle Me* takes us into the minds and hearts of Iranians today, and will be a

crucial guide as Americans and Iranians attempt to overcome their bitter estrangement.

Modernity, Sexuality, and Ideology in Iran Jan 29 2020 For more than a century Iran's social, political, and cultural history has been defined by a struggle toward or away from modernity. In this book Talatoff makes a compelling argument that, despite revolutionary upheaval, the ideals of modernity remain remote due to the absence of a modern notion of sexuality. He illustrates his assertion through the life of Shahrzad, a celebrated stage and screen actress, dancer, journalist, and published poet who eventually became imprisoned and later homeless in the streets of Tehran. Tracing her career along with other pre-revolutionary women artists, Talatoff explores the relationship between gender, sexuality, media, and modernity in Iran.

Going Places: A Reader's Guide to Travel Narrative Aug 18 2021 Successfully navigate the rich world of travel narratives and identify fiction and nonfiction read-alikes with this detailed and expertly constructed guide.

Female Bodies and Sexuality in Iran and the Search for Defiance Oct 27 2019 This book uses storytelling as an analytical tool for following wider social attitude changes towards sex and female sexuality in Iran. Women born in 1950s Iran grew up during the peak of secularization and modernization, whereas those born in the 1980s were raised under the much stricter rules of the Islamic Republic. Using extensive ethnographic research, the author juxtaposes narratives of body and sexuality shared by these different generations of women, showing the intricate ways in which women construct and convey meanings and communicate their emotions about the unspoken aspects of their lives.

Finite Element Analysis May 03 2020 Intended for courses in Finite Element Analysis, this text presents the theory of finite element analysis. It explores its application as a design/modeling tool, and explains in detail how to use ANSYS intelligently and effectively.

Studyguide for Engineering Fundamentals Nov 20 2021 Never HIGHLIGHT a Book Again Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanies: 9780872893795. This item is printed on demand.

Plantwide Control Dec 30 2019 The use of control systems is necessary for safe and optimal operation of industrial processes in the presence of inevitable disturbances and uncertainties. Plant-wide control (PWC) involves the systems and strategies required to control an entire chemical plant consisting of many interacting unit operations. Over the past 30 years, many tools and methodologies have been developed to accommodate increasingly larger and more complex plants. This book provides a state-of-the-art of techniques for the design and evaluation of PWC systems. Various applications taken from chemical, petrochemical, biofuels and mineral processing industries are used to illustrate the use of these approaches. This book contains 20 chapters organized in the following sections: Overview and Industrial Perspective Tools and Heuristics Methodologies Applications Emerging Topics With contributions from the leading researchers and industrial practitioners on PWC design, this book is key reading for researchers, postgraduate students, and process control engineers interested in PWC.

Iranian and Diasporic Literature in the 21st Century Jun 27 2022 The most populous Islamic country in the Middle East, Iran is rife with contradictions, in many ways caught between the culture and governments of the Western—more dominant and arguably imperialist—world and the ideology of conservative fundamentalist Islam. This book explores the present-day writings of authors who explore these oppositional forces, often finding a middle course between the often brutal and demonizing rhetoric from both sides. To combat how the West has falsely generalized and stereotyped Iran, and how Iran has falsely generalized and stereotyped the West, Iranian and diasporic writers deconstruct Western caricatures of Iran and Iranian caricatures of the West. In so doing, they provide especially valuable insights into life in Iran today and into life in the West for diasporic Iranians.

Honeymoon in Tehran May 27 2022 BONUS: This edition contains a Honeymoon in Tehran discussion guide. Azadeh Moaveni, longtime Middle East correspondent for Time magazine, returns to Iran to cover the rise of President Mahmoud Ahmadinejad. Living and working in Tehran, she finds a nation that openly yearns for freedom and contact with the West but whose economic grievances and nationalist spirit find an outlet in Ahmadinejad's strident pronouncements. And then the unexpected happens: Azadeh falls in love with a young Iranian man and decides to get married and start a family in Tehran. Suddenly, she finds herself navigating an altogether different side of Iranian life. As women are arrested for "immodest dress" and the authorities unleash a campaign of intimidation against journalists, Azadeh is forced to make the hard decision that her family's future lies outside Iran. Powerful and poignant, Honeymoon in Tehran is the harrowing story of a young woman's tenuous life in a country she thought she could change.
