My House in Damascus Jan 28 2022 The ongoing conflict in Syria has made clear just how limited the general knowledge of Syrian society and history is in the West. For those watching the headlines and wondering what led the nation to this point, and what might come next, this book is a perfect place to start developing a deeper understanding. Based on decades of living and working in Syria, *My House in Damascus* offers an inside view of Syria's cultural and complex religious and ethnic communities. Diana Darke, a fluent Arabic speaker who moved to Damascus in 2004 after decades of regular visits, details the ways that the Assad regime, and its relationship to the people, differs from the regimes in Egypt, Tunisia, and Libya—and why it was thus always less likely to collapse quickly, even in the face of widespread unrest and violence. Through the author's firsthand experiences of buying and restoring a house in the old city of Damascus, which she later offered as a sanctuary to friends, Darke presents a clear picture of the realities of life on the ground and what hope there is for Syria's future.

The Mandela Revolution Dec 03 2019 On 27 April 1994 South Africa went to the polls and delivered the first black government in the country's history. This was the Mandela Revolution. This is not the story of how the Rainbow Nation was formed, but it tells a story of one part of the revolution; a vital part, that had to occur to give legitimacy to the new South Africa both at home and abroad. It highlights the political necessity that drove a process and the seemingly inevitable failure that it became. Not a failure of the process itself, but a failure that had to occur to permit acceptability; it resulted in the end of South Africa as a hegemony. This account focuses on how the military forces supporting the Apartheid regime and those committed to its overthrow came together to form a new national force, reflecting the new multi-racial, multi-faith democracy. The process appeared unacceptable in some measure to all sides, but the political instruction in 1994 was that there was to be the integration of the South African defense Force and the armed wings of the African National Congress and the Pan Africanist Congress to form the South African National defense Force. Within this revolution, there was a small detachment from the British armed forces that were charged with assisting this transition. They were required to oversee and assist a process that had never been done before and often had to operate alone. It is a story of highs and lows, of sudden death, breakdowns and ultimately of hope. This is a personal account of three years spent in the middle of this staggering transitional experiment. It was Security Sector Reform and Disarmament, Demobilisation and Reintegration (DDR) before such processes were coined by the United Nations and arguably it was considerably more successful than any such venture attempted by the United Nations. It is a book that demonstrates how success and failure can occur simultaneously.

Not a Gentleman's War Jan 16 2021 A combat veteran of the Vietnam War draws on oral histories, after-action reports, diaries, letters, and other archival sources to debunk the view that the junior officers who served in Vietnam were poorly trained, unmotivated soldiers typified by Lt. William Calley of My Lai infamy.

First to Fight Jun 20 2021 Deftly blending history with autobiography, action with analysis, the legendary Marine general Victor "Brute" Krulak offers here a riveting insider's chronicle of U.S. Marines--their fights on the battlefield and off, and their extraordinary esprit de corps. He not only takes a close look at the Marine experience during World War II, Korea, and Vietnam--wars in which Krulak was himself a participant--but also examines the foundation on which the Corps is built. In doing so, he helps answer the question of what it means to be a Marine and how the Corps has maintained such a consistently outstanding reputation.

The Horseshoe Table Feb 14 2021 "In this unique, unprecedented and intimate account, Chinmaya Gharekhan takes us through the meetings of the Security Council as it debated such issues as emergency situations during the first Gulf War, Iraq's WMD programme and the work of the special commission set up to eliminate them, the beginnings of the Oil-for-Food programme, the Balkan War of the early 1990s, the Rwanda genocide, and the Lockerbie disaster involving Libya."--BOOK JACKET.

The German Army on the Eastern Front Aug 11 2020 Histories of the German army on the Eastern Front generally focus on battlefield exploits on the war as it was fought in the front line. They tend to neglect other aspects of the army's experience, particularly its participation in the racial war demanded by the leadership of the Reich. This ground-breaking book aims to correct this incomplete, often misleading picture. Using a selection of revealing extracts from a wide range of wartime documents, it looks at the totality of the Wehrmacht's war in the East. The documents have previously been unpublished or have never been translated into English, and they offer a fascinating inside view of the army's actions and attitudes. Combat is covered, and complicity in Hitler's war of annihilation against the Soviet Union. There are sections on the conduct of the war in the rear areas logistics, medical, judicial and the army's tactics, motivation and leadership. The entire text is informed by the latest research into the reality of the conflict as it was perceived and understood by those who took part.

Corporate E-Learning Apr 18 2021 Corporate e-learning has become increasingly important in the contemporary universal-access business world, and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face-to-face learning programs. However, most of the books that are written about e-learning do not describe in detail how corporate e-learning is actually implemented within a specific company. Corporate E-Learning fills that gap by describing in depth how e-learning programs are developed and instituted, and how their effectiveness is measured, from the perspective of practicing e-learning professionals at IBM, an early and liberal user of e-learning technologies to train their global workforce. Drawing on a wealth of in-person interviews of numerous e-learning professionals at IBM, as well as recent e-learning literature, Tai discusses how IBM has significantly contributed to the evolution of corporate e-learning. In the course of doing so, he makes useful comparisons with other companies and industries, and draws conclusions that are applicable to any company considering utilizing e-learning. Companies should be careful, concludes Tai, to use e-learning only when it makes strategic and economic sense, not simply because the technology is available. In addition, e-learning should always be used along with other more traditional means of learning, and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished, and how e-learning programs might improve in the future. Corporate E-Learning is designed for classroom use in technology management courses, and will also appeal to corporate professionals who are involved in training, human resources development, and performance improvement.

Tragedy & Challenge Jul 22 2021 Having worked within the UK engineering industry for many years and chaired 15 companies, including stock market quoted, private equity backed, and university spin offs, Tom Brown offers a unique insight into the challenges facing engineering companies, as well as the impact this has on the economy, people's working lives, and society. Tragedy & Challenge will appeal to readers interested in economics and politics, business management, investing, and our changing society - including those who enjoyed Evan Davis's Made in Britain and Peter Marsh's The New Industrial Revolution. This book examines existing data on UK manufacturing in order to demonstrate how badly our engineering has fared compared with international competitors, especially Germany. The author also recounts his varied early experiences in the industry from night shift manager to Managing Director and the life-changing lessons he gained from working in a German-speaking company. Tragedy & Challenge analyses the causes of the decline in UK engineering, considering its poor leadership, original analysis of the detrimental effects of government economic policy, and the destructive influence of the City including an insider's uninhibited view of fund managers, analysts, and private equity. Tom Brown concludes that, while some decline was inevitable due to global factors, the example of Germany shows it did not need to be nearly so precipitate; some responsibility lies with management and unions, but ultimately poor governments, the City, and decaying social

attitudes were to blame, and now Brexit makes the prognosis even more daunting.

Private Pictures Nov 25 2021 Snapshots taken by American soldiers of Iraqi prisoners stripped naked, humiliated and tortured shocked the world in 2004 but, as this remarkable book relates, soldiers have taken photographs of the gruesome or sociable, shocking or mundane aspects of war for more than 100 years. Now, with the twenty-first century shift to simple digital photography and internet communications, a glut of highly disturbing images -- videos and stills -- is being posted on the internet by western forces in Iraq and Afghanistan, with alarming results. Private Pictures traces this unacknowledged genre of photography from the origins of popular photography in the Boer War through the two World Wars, to the digital age. It discusses how the images have been used and it asks: what effect might the wider appreciation of soldiers' pictures have on the popular perception of war?

Thinking Strategically in Turbulent Times: An Inside View of Strategy Making Sep 04 2022 An emergent approach to organizational strategy making assumptions that few organizations actually realize the goal of deliberative, top-down strategic planning, and that effective strategy making occurs on a continual basis and is a shared activity of the entire organization. This innovative book provides the first in-depth look at how real organizations are formulating and implementing strategic change under this new paradigm. The authors have dug deep into three large and varied organizations (Hewlett-Packard, the California State University system, and the County of Los Angeles) and identified each one's efforts to develop a new strategic planning process better-suited to match the current pace of change and environmental unpredictability. The book is filled with vignettes, quotes, and real-world examples that illustrate the trend toward faster, more adaptive strategic planning processes. It is relevant for a wide range of business, governmental, and non-profit settings, and should be required reading in any course on strategic planning.

[Where Do We Go From Here?](#) Mar 06 2020 Where Do We Go From Here? is a first-hand account of life in a psychiatric hospital. From the good to the bad and the ugly, every bit of life in the hospital is exposed. Whilst narrating her experience, Bethany explores the challenging reality of battling depression and mental illness, while trying to find the strength to fight. Where Do We Go From Here? is a poignant story of hope, which shares a slightly humorous look into the brain of a seemingly "normal" girl.

View From the Top Jun 28 2019 Learn leadership from the best—proven insights from the power elite in business, government, and beyond View from the Top brings readers inside the corridors of power and relates the personal stories and powerful findings from the Platinum Study, a groundbreaking study of 550 elite American CEOs, senior government leaders, and nonprofit executives based on ten years of research. The largest study of its kind, the Platinum Study delves into the domains of the elite with stories that illustrate both the use and misuse of power across the landscape of prominent American institutions such as AT&T, Harvard University, Under Armour, JP Morgan Chase, Bain & Company, and the White House. The book explores not only how leaders wield power, but it also provides readers with insight into applying the strategies of the successful in their own lives. In the United States, only a few thousand individuals make the decisions that influence the lives of over 300 million people. Whether in the government, business, higher education, or the arts, these individuals direct policy and set the terms of national debates, yet remain virtually unknown. View from the Top explores the real lives of the elite and the social worlds they inhabit, revealing lessons about influence at the top, and the seven principles that shape those in power. The results of the Platinum Study include unexpected truths such as: Being born into wealth is a poor

Beyond the Grip of Craniosynostosis Mar 18 2021 Both a memoir and a medical study, this unique work explores the extensive and tragic reach of craniosynostosis, the premature fusing of the cranial sutures in infants. The author—born with craniosynostosis in 1975—documents his and his family's struggles, weaving his story into a broader view of this birth defect. Included are interviews with respected craniofacial surgeons, neurosurgeons and pediatric anesthesiologists, an explanation of the major types of craniosynostosis, and a summary of the modern medical history of cranial sutures, as well as ancient treatments dating to the time of Hippocrates. The experiences of 11 American families affected by craniosynostosis are chronicled, demonstrating the uniqueness of each case and each treatment. Their stories illustrate the surgical techniques now being used to release cranial sutures, allowing the brain to grow naturally—though not every story ends this way.

Breaking Kola: An Inside View of African Customs Nov 01 2019 When Catherine arrived in Nigeria as an idealistic Peace Corps volunteer, she had no idea of the wealth of customs and traditions she would come to love. With her marriage to a Nigerian electrical engineer, senior manager in the country's power industry, she became part of his family, clan, and village. She learned to speak the Igbo language and not only adapted to, but adopted, some of the customs of his people. In this intimate portrayal of family members, she reveals the secrets of the ties that bind her to his community. Through the striking accounts of her husbands' parents in their youth and with nods to customs from other tribes and countries, she paints an unforgettable picture of African life in times past. She evokes the atmosphere of the village market, the religious rituals, and the ceremonies that accompany life's major events. The author also reveals the challenges between the Christianity adopted by her husband's family and the traditions they sometimes abandon and sometimes preserve. The reader is brought into an African village with its richness of music, dance, ritual, and mystery. Throughout the book, the importance of family is stressed. She demonstrates the importance of showing respect for elders, honoring the ancestors, and caring for children communally. She contrasts this sense of community to the individualism experienced by people in the West. With her vivid descriptions of Igbo names and religious beliefs, she adds to the readers' understanding of an African society. How she found her own community is revealed in the last chapters of this intriguing book. She has taken her message of the importance of family and community to many venues. Four sermons she has presented are included in the appendix. Suggested discussion questions for book groups are also provided.

Private Pictures Dec 27 2021 Snapshots taken by American soldiers of Iraqi prisoners stripped naked, humiliated and tortured shocked the world in 2004 and more have followed from the conflict in Afghanistan, but whether the public have been horrified by the soldiers' conduct or the fact they have taken pictures has not been clear. In fact, as this remarkable book reveals and relates, soldiers have taken photographs of war and its atrocities for more than 100 years. But their pictures are private, intended mainly for the soldiers themselves, as mementoes or as attempts to make sense of the chaos, brutality and boredom of war. They can be gruesome or sociable, shocking or mundane and they are seldom regarded as serious contributions to a visual culture of war, which since 1939 has been dominated by professional war photography. But with the 21st-century shift to simple digital photography, transmission by the internet available to all, and a new 'citizen journalism', soldiers' pictures are acquiring a new resonance. "Private Pictures" traces this unacknowledged genre of photography from the origins of popular photography in the Boer War through to the present day; it discusses how the images have been used and it asks: what effect might the wider appreciation of soldiers' pictures have on the popular perception of war?
