The Peoples of Ancient Italy Jan 12 2021 Although there are many studies of certain individual ancient Italic groups (e.g. the Etruscans, Gauls and Latins), there is no work that takes a comprehensive view of each of them—the famous and the less well-known—that existed in Iron Age and Roman Italy. Moreover, many previous studies have focused only on the material evidence for these groups or on what the literary sources have to say about them. This handbook is conceived of as a resource for archaeologists, historians, philologists and other scholars interested in finding out more about Italic groups from the earliest period they are detectable (early Iron Age, in most instances), down to the time when they begin to assimilate into the Roman state (in the late Republican or early Imperial period). As such, it will endeavor to include both archaeological and historical perspectives on each group, with contributions from the best-known or up-and-coming archaeologists and historians for these peoples and topics. The language of the volume is English, but scholars from around the world have contributed to it. This volume covers the ancient peoples of Italy more comprehensively in individual chapters, and it is also distinct because it has a thematic section.

The Medieval Salento Nov 21 2021 Located in the heel of the Italian boot, the Salento region was home to a diverse population between the ninth and fifteenth centuries. Inhabitants spoke Latin, Greek, and various vernaculars, and their houses of worship served sizable congregations of Jews as well as Roman-rite and Orthodox Christians. Yet the Salentines of this period laid claim to a definable local identity that transcended linguistic and religious boundaries. The evidence of their collective culture is embedded in the traces they left behind: wall paintings and inscriptions, graffiti, carved tombstone decorations, belt fittings from graves, and other artifacts reveal a wide range of religious, civic, and domestic practices that helped inhabitants construct and maintain personal, group, and regional identities. The Medieval Salento allows the reader to explore the visual and material culture of a people using a database of over three hundred texts and images, indexed by site. Linda Safran draws from art history, archaeology, anthropology, and ethnohistory to reconstruct medieval Salentine customs of naming, language, appearance, and status. She pays particular attention to Jewish and nonelite residents, whose lives in southern Italy have historically received little scholarly attention. This extraordinarily detailed visual analysis reveals how ethnic and religious identities can remain distinct even as they mingle to become a regional culture.

Balkan and South Slavic Enclaves in Italy Jan 24 2022 This volume is a collection of new writings dealing with some of the Balkan linguistic varieties spoken in north-eastern, central and southern Italy. It brings together twenty-two papers, some of which investigate the mutual influences between each of these Balkan and South Slavic language varieties and their neighbouring Italian dialects. Other contributions study common tendencies which do not just pertain to local contacts, but which are of greater significance for the history of linguistic and cultural contacts in Italy. All of the chapters here present new empirical findings and reflect the breadth and diversity of current research in the fields of areal linguistics, language variation, Balkan dialectology, language contact, types of Balkan convergences, types of structure transfers, the borrowing of structural patterns, and directions of grammaticalisation.

The Sabaite Heritage in the Orthodox Church from the Fifth Century to the Present Jun 24 2019 St. Sabas (439-532 CE), was one of the principal leaders of Palestinian monasticism, that had flourished in the sixth century in the desert of Jerusalem. As an abbot he was the first in Palestine to formulate a monastic rule in writing, and his activity as an ecclesiastical leader bore upon the life of the entire Christian community in the Holy land. He and his monks were active in the theological disputes that affected the fate of the Christian Church of Palestine, and shaped it as a stronghold of Orthodoxy. But his activity has transcended his place and time. His largest monastery - the Great Laura (Mar saba), functioned from the sixth to the ninth century as the intellectual centre of the See of Jerusalem. The most distinguished among its authors were Cyril of Scythopolis, Leontius of Byzantium, John Moschus and Sophronius, Antiochus Monachos, John of Damascus, Cosmas the Hymnographer, Leontius of Damascus and Stephen Mansur. Their treatises on dogma, and prayer, shaped Orthodox theology, liturgy and hymnography in Palestine and beyond. This literary activity in Greek was complemented by scribal activity of copying and translating of Greek manuscripts into Arabic and Georgian. There was also original composition in Arabic by Theodore Abu Qurrah and others. Monastic life in Mar Saba, that continued under Muslim rule with only short intermissions, preserved the Sabaite tradition, and contributed to its reputation, parallel to that of Jerusalem. Sabaite monks were renown as paragons of monasticism and dogma, who had inspired monastic and ecclesiastical reformers in later centuries throughout the Orthodox world. Its fame spread far and wide, from Rome and North Africa in the west, to Serbia, Russia and Georgia in the east, affecting Christian dogma and liturgy therein. The thirty-one studies included in this volume, each written by an expert in his field, present the various facets of the Sabaite heritage in the Orthodox Church, from the sixth century to the present.

Instructions for the Netherworld Jun 16 2021 Orphic gold tables are key documents for the knowledge of rites and beliefs of Orphics, an atypical group that configured a highly original creed and that influenced powerfully over other Greek writers and thinkers. The recent discovery of some tablets has forced a noteworthy modification of some points of view and a review of the different hypothesis proposed about them. The book presents a complete edition of the texts, their translation and some fundamental keys for their interpretation, in an attempt at updating our current knowledge on Orphic ideas about the soul and the Afterlife stated in those texts. The work is improved with an appendix of iconographic annotations in which some plastic representations in drawings are reproduced related to the universe of tablets, selected and commented on by Ricardo Olmos.

Babylon, Memphis, Persepolis Nov 09 2020 At the distant beginning of Western civilization, according to European tradition, Greece stands as an insular, isolated, near-miracle of burgeoning culture. This book traverses the ancient world's three great centers of cultural exchange--Babylonian Nineveh, Egyptian Memphis, and Iranian Persepolis--to situate classical Greece in its proper historical place, at the Western margin of a more comprehensive Near Eastern-Aegean cultural community that emerged in the Bronze Age and expanded westward in the first millennium B.C. In concise and inviting fashion, Walter Burkert lays out the essential evidence for this ongoing reinterpretation of Greek culture. In particular, he points to the critical role of the development of writing in the ancient Near East, from the achievement of cuneiform in the Bronze Age to the rise of the alphabet after 1000 B.C. From the invention and diffusion of alphabetic writing, a series of cultural encounters between "Oriental" and Greek followed. Burkert details how the Assyrian influences of Phoenician and Anatolian intermediaries, the emerging fascination with Egypt, and the Persian conquests in Ionia make themselves felt in the poetry of Homer and his gods, in the mythic foundations of Greek cults, and in the first steps toward philosophy. A journey through the fluid borderlines of the Near East and Europe, with new and shifting perspectives on the cultural exchanges these produced, this book offers a clear view of the multicultural field upon which the Greek heritage that formed Western civilization first appeared.

Italy and the Classical Tradition Aug 19 2021 Italy's original fascination with its cultural origins in Greece and Rome first created what is now known as 'the Classical tradition' - the pervasive influence of ancient art and thought on later times. In response to a growing interest in Classical reception, this volume provides a timely reappraisal of the Greek and Roman legacies in Italian literary history. There are fresh insights on the early study of Greek and Latin texts in post-classical Italy and reassessments of the significance attached to ancient authors and ideas in the Renaissance, as well as some innovative interpretations of canonical Italian authors, including Dante, Petrarch and Alberti, in the light of their ancient influences and models. The wide range of essays in this volume - all by leading specialists - should appeal to anyone with an interest in Italian literature or the Classical tradition. Italy's early fascination with its Hellenic and Roman origins created what is now called 'the classical tradition'. This book focuses on the role of the Greek and Latin languages and texts in Italian humanist thought and Renaissance poetry: how ancient languages were mastered and used, and how ancient texts were acquired and appropriated. Fresh perspectives on the influences of Aristotle, Plutarch and Virgil accompany innovative interpretations of canonical Italian authors - including Dante, Petrarch and Alberti - in the light of their classical models. Treatments of more specialized forms of writing, such as the cento and commentary, and some opening chapters on linguistic history also prompt reassessment of Renaissance perceptions of both Greece and Rome in relation to early modern Latin and vernacular culture. The collection as a whole highlights the importance of Italy's unique legacy of antiquity for the history of ideas and philology, as well as for literary history. The essays in this volume, all by leading specialists, are supplemented by a detailed introduction and a subject bibliography.

Mystic Cults in Magna Graecia Apr 02 2020 In Vergil's Aeneid, the poet implies that those who have been initiated into mystery cults enjoy a blessed situation both in life and after death. This collection of essays brings new insight to the study of mystic cults in the ancient world, particularly those that flourished in Magna Graecia (essentially the area of present-day Southern Italy and Sicily). Implementing a variety of methodologies, the contributors to *Mystic Cults in Magna Graecia* examine an array of features associated with such "mystery religions" that were concerned with individual salvation through initiation and hidden knowledge rather than civic cults directed toward Olympian deities usually associated with Greek religion. Contributors present contemporary theories of ancient religion, field reports from recent archaeological work, and other frameworks for exploring mystic cults in general and individual deities specifically, with observations about cultural interactions throughout. Topics include Dionysos and Orpheus, the Goddess Cults, Isis in Italy, and Roman Mithras, explored by an international array of scholars including Giulia Sfameni Gasparro ("Aspects of the Cult of Demeter in Magna Graecia") and Alberto Bernabé ("Imago Inferorum Orphica"). The resulting volume illuminates this often misunderstood range of religious phenomena.

Medioevo letto, scavato, rivalutato. Studi in onore di Paolo Peduto Oct 09 2020 Il volume raccoglie una serie di scritti inediti in onore del prof. Paolo Peduto, di cui alcuni Amici, Colleghi ed ex-Allievi dell'Università di Salerno hanno voluto fargli omaggio in occasione del suo pensionamento. Il titolo rispecchia la diversificazione dei contributi, che interessano la lettura di 'documenti' e 'monumenti' nella loro accezione più ampia e multidisciplinare. I testi spaziano dai ricordi giovanili, affidati ad Amici che hanno condiviso l'esperienza pionieristica degli scavi di Capaccio o le prime ricerche sui castelli, legate entrambe alle origini dell'Archeologia Medievale in Italia, all'approfondimento di fonti scritte, dall'indagine su contesti o aspetti insediativi, anche molto differenziati e geograficamente distanti, all'analisi descrittiva di manufatti. I soggetti scelti dagli Autori hanno dato luogo ad una 'miscellanea' nel vero senso del termine, che rende pienamente conto della vastità dei problemi affrontati dagli studiosi del Medioevo negli ultimi decenni.
