Sonic Histories of Occupation Aug 06 2020 This open access book examines how auditory environments in different contexts have contributed to understanding foreign occupation and colonialism, and how they have given rise to historical music cultures. How are sound and music implicated in the control and discipline of people under occupation? Exploring case studies of foreign occupation and colonialism from around the world, *Sonic Histories of Occupation* seeks to answer these questions and more. Examining how an emphasis on auditory culture adds complexity and nuance to understanding the relationship between occupation and the bodily senses, this book is structured around three conceptual themes: voice and occupation; memory, sound and occupation; and auditory responses to occupation and colonialism. Highlighting case studies in Asia, North Africa, North America and Europe, contributors employ a range of theoretical approaches to examine histories of imperialism and foreign occupation, and the auditory legacies they created, and contribute to a wider dialogue about the relationship between sound and imperial projects across political and temporal boundaries. The open access edition of this book is available under a CC-BY-NC-ND 4.0 license on www.bloomsburycollections.com. Ancient Egyptian Imperialism Jul 25 2019 Offers a broad and unique look at Ancient Egypt during its long age of imperialism Written for enthusiasts and scholars of pharaonic Egypt, as well as for those interested in comparative imperialism, this book provides a look at some of the most intriguing evidence for grand strategy, low-level insurgencies, back-room deals, and complex colonial dynamics that exists for the Bronze Age world. It explores the actions of a variety of Egypt's imperial governments from the dawn of the state until 1069 BCE as they endeavored to control fiercely independent mountain dwellers in Lebanon, urban populations in Canaan and Nubia, highly mobile Nilotic pastoralists, and predatory desert raiders. The book is especially valuable as it foregrounds the reactions of local populations and their active roles in shaping the trajectory of empire. With its emphasis on the experimental nature of imperialism and its attention to cross-cultural comparison and social history, this book offers a fresh perspective on a fascinating subject. Organized around central imperial themes—which are explored in depth at particular places and times in Egypt's history—Ancient Egyptian Imperialism covers: Trade Before Empire—Empire Before the State (c. 3500-2686); Settler Colonialism (c. 2400-2160); Military Occupation (c. 2055-1775); Creolization, Collaboration, Colonization (c. 1775-1295); Motivation, Intimidation, Enticement (c. 1550-1295); Organization and Infrastructure (c. 1458-1295); Outwitting the State (c. 1362-1332); Conversions and Contractions in Egypt's Northern Empire (c. 1295-1136); and Conversions and Contractions in Egypt's Southern Empire (c. 1550-1069). Offers a wider focus of Egypt's experimentation with empire than is covered by general Egyptologists Draws analogies to tactics employed by imperial governments and by dominated peoples in a variety of historically documented empires, both old world and new Answers questions such as “how often and to what degree did imperial blueprints undergo revisions?” Ancient Egyptian Imperialism is an excellent text for students and scholars of history, comparative history, and ancient history, as well for those interested in political science, anthropology, and the Biblical World.

Multinationals as Agents of Imperialism Feb 21 2022 Multinationals are without doubt the most controversial of all non-state actors. In the eyes of many critics they act as the motor of capitalism in the contemporary markets, accused of toppling elected governments, exploiting under-developed countries, engaging in illegal activities, ignoring human rights, and willfully damaging the environment. At the same time, defenders of multinational corporations portray them as engines of progress, innovative in research and development, a modernizing force in international relations, and the best hope for overcoming the chronic under-development and poverty in the Third World. Against this background, the aim of this work, however, is to examine the character and function of multinationals as agents of imperialism. It tries to provide empirical validation for the basic Marxist thesis that the serious problems of third world countries can be linked to the operations of imperialist forces whose most powerful catalysts are the multinational enterprises

Hobson and Imperialism Dec 10 2020 The year 2002 sees the centenary of J. A. Hobson's *Imperialism: A Study*, the most influential critique of British imperial expansion ever written. P. J. Cain marks the occasion by evaluating, for the first time, Hobson's writings on imperialism from his days as a journalist in London to his death in 1940. The early chapters chart Hobson's progress from complacent imperialist in the 1880s to

radical critic of empire by 1898. This is followed by an account of the origins of Imperialism and a close analysis of the text in the context of contemporary debates. Two chapters cover Hobson's later writings, showing their richness and variety, and analysing his decision to republish *Imperialism* in 1938. The author discusses the reception of *Imperialism* and its emergence as a 'classic' by the late 1930s and ends with a detailed discussion of the relevance of the arguments of *Imperialism* to present-day historians.

Views of Ancient Egypt Since Napoleon Bonaparte Nov 08 2020 This book addresses some of the main themes of the study of Egypt during the nineteenth and twentieth centuries. In a combination of case studies and discursive chapters, the status of Egypt as an important example of traditional Asian scholarship, and as an ancient model of imperialism itself, is examined. Contributions range from studies of nineteenth century antiquarianism, and the collecting of Egyptian antiquities as an extension of the territorial ambitions and rivalries of the European powers, to explorations of how Egypt is understood and interpreted in contemporary societies. *Views of Ancient Egypt* also considers the way in which Ancient Egypt has been adopted by less privileged members of some societies as a cultural icon of past greatness.

Violence and Colonial Order Nov 01 2022 This is a pioneering, multi-empire account of the relationship between the politics of imperial repression and the economic structures of European colonies between the two World Wars. Ranging across colonial Africa, Southeast Asia and the Caribbean, Martin Thomas explores the structure of local police forces, their involvement in colonial labour control and the containment of uprisings and dissent. His work sheds new light on broader trends in the direction and intent of colonial state repression. It shows that the management of colonial economies, particularly in crisis conditions, took precedence over individual imperial powers' particular methods of rule in determining the forms and functions of colonial police actions. The politics of colonial labour thus became central to police work, with the depression years marking a watershed not only in local economic conditions but also in the breakdown of the European colonial order more generally.

Colonial Encounters in the Age of High Imperialism Jul 29 2022 *Colonial Encounters in The Age of High Imperialism* is the first book in the new HarperCollins World History Series, edited by Michael Adas. This title examines the world-transforming experience of Western imperialism during the period from 1870 to 1914. Case studies focusing specifically on Belgium and the Congo, Hawaii and the United States, and India and Britain examine the experiences of both colonizers and colonized, men and women, elite officials and faceless laborers. An introductory overview makes the study of imperialism relevant for today's students by showing them how the past relates to the present. Chapter-ending conclusions summarize important material, and suggested in-depth readings direct students to sources for further exploration. The case studies provide detailed examination of particular places and moments and invite comparison with imperialism in other parts of the world. Discussions of broader topics and larger issues, such as population redistribution, the spread of technology, military invasion, and the role of guns and medicine build upon the case studies.

How Europe Underdeveloped Africa Oct 08 2020 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Sources and Methods in Histories of Colonialism Jun 15 2021 *Sources and Methods in Histories of Colonialism* encourages readers to think more critically and analytically about the archives in which they work as well as about their research methods, their sources and their conceptual approaches. This volume provides an in-depth and critical survey of the now substantial and influential scholarly literatures on the functions and scope of the 'imperial archive' and on the relationships between the archive, knowledge and power. It allows readers to develop a deeper understanding of the challenges of working with a range of specific source genres within imperial and colonial archives. It explores the ways in which newer approaches to, and ways of thinking about, the past have challenged more traditional views of 'the archive', provoking new questions about what archives are and where their conceptual, geographical and chronological boundaries might lie. And, it assesses the implications of these shifts for those interested in researching and writing about colonial and postcolonial societies. Focusing on the period from the late eighteenth century to the present, the authors examine issues, themes and case studies pertaining to a broad range of modern empires including those established by Britain, France, the Netherlands, Spain and the United States. The source genres discussed illustrate and exemplify a range of core themes and debates regarding the writing of colonial and postcolonial histories, covering a range of subjects including government papers, censuses, petitions, case-files, and orality. Many of the chapters combine an overview of the current state of research and writing about a particular source genre or conceptual theme with a case study. This combination of overview and case study will enable readers to explore and examine the issues in a grounded, hands-on and applied fashion.

Value Chains Jan 29 2020 Award-winning book showcases case studies uncovering the exploitation of labor and class in the Global South Winner of the 2018 Paul M. Sweezy—Paul A. Baran Memorial Award for original work regarding the political economy of imperialism, *Value Chains* examines the exploitation of labor in the Global South. Focusing on the issue of labor within global value chains, this book offers a deft empirical analysis of unit labor costs that is closely related to Marx's own theory of exploitation. *Value Chains* uncovers the concrete processes through which multinational corporations, located primarily in the Global North, capture value from the Global South. We are brought face to face with various state-of-the-art corporate strategies that enforce "economical" and "flexible" production, including labor management methods, aimed to reassert the imperial dominance of the North, while continuing the dependency of the Global South and polarizing the global economy. Case studies of Indonesian suppliers exemplify the growing burden borne by the workers of the Global South, whose labor creates the surplus value that enriches the capitalists of the North, as well as the secondary capitals of the South. Today, those who control the value chains and siphon off the profits are primarily financial interests with vast economic and political power—the power that must be broken if the global working class is to liberate itself. Suwandi's book depicts in concrete detail the relations of unequal exchange that structure today's world economy. This study, up-to-date and richly documented, puts labor and class back at the center of our understanding of the world capitalist system.

Projecting Empire Nov 20 2021 Popular cinema is saturated with images and narratives of empire. With "Projecting Empire", Chapman and Cull have written the first major study of imperialism and cinema for over

thirty years. This welcome text maps the history of empire cinema in both Hollywood and Britain through a series of case studies of popular films including biopics, adventures, literary adaptations, melodramas, comedies and documentaries, from the 1930s and "The Four Feathers" to the present, with "Indiana Jones" and "Three Kings". The authors consider industry-wide trends and place the films in their wider cultural and historical contexts. Using primary sources that include private papers, they look at the presence of particular auteurs in the cinema of Imperialism, including Korda, Lean, Huston and Attenborough, as well as the actors who brought the stories to life, such as Elizabeth Taylor and George Clooney. At a time when imperialism has a new significance in the world, this book will fulfil the needs of students and interested filmgoers alike.

Imperialism and the Developing World May 27 2022 How did Western imperialism shape the developing world? In *Imperialism and the Developing World*, Atul Kohli tackles this question by analyzing British and American influence on Asia, Africa, the Middle East, and Latin America from the age of the British East India Company to the most recent U.S. war in Iraq. He argues that both Britain and the U.S. expanded to enhance their national economic prosperity, and shows how Anglo-American expansionism hurt economic development in poor parts of the world. To clarify the causes and consequences of modern imperialism, Kohli first explains that there are two kinds of empires and analyzes the dynamics of both. Imperialism can refer to a formal, colonial empire such as Britain in the 19th century or an informal empire, wielding significant influence but not territorial control, such as the U.S. in the 20th century. Kohli contends that both have repeatedly undermined the prospects of steady economic progress in the global periphery, though to different degrees. Time and again, the pursuit of their own national economic prosperity led Britain and the U.S. to expand into peripheral areas of the world. Limiting the sovereignty of other states-and poor and weak states on the periphery in particular-was the main method of imperialism. For the British and American empires, this tactic ensured that peripheral economies would stay open and accessible to Anglo-American economic interests. Loss of sovereignty, however, greatly hurt the life chances of people living in Asia, the Middle East, Africa, and Latin America. As Kohli lays bare, sovereignty is an economic asset; it is a precondition for the emergence of states that can foster prosperous and inclusive industrial societies.

The Acquisition of Africa (1870-1914) Dec 30 2019 In the 'Scramble for Africa' during the Age of New Imperialism (1870-1914), European States and non-State actors mainly used treaties to acquire territory. The question is raised whether Europeans did or did not on a systematic scale breach these treaties in their expansion of empire.

Sino-African Relations of Oil. Win-win Or Chinese Neo-imperialism? Aug 25 2019 Bachelor Thesis from the year 2017 in the subject Politics - International Politics - Region: Africa, grade: 24.0, Lancaster University, course: Politics and International Relations, language: English, abstract: This report differs from previous studies of Sino-African relations, for one the paper successfully theorizes the relations and demonstrates that studying the relationship must be carried out based on China and individual countries, rather than China and Africa as a continent. And secondly, the core purpose of this paper is understanding how China interacts with African countries, and understanding the basic elements inherent in their interactions. This research presents a holistic study of Sino-African relations with the case studies of Nigeria and Sudan, with a focus on the three factors of politics, economics, and socio-environmental implications. Framing the paper in this manner allows the researcher to develop a theory for the study, and allows for the critical development of literature that helps to explain if the relations contains elements of neo-imperialism, or if indeed, the economic interaction is one that can be described as a win-win. Basically, this paper seeks to use literature to establish Sino-African relations as neo-colonial or neo-imperial, or as a win-win South-South cooperation.

Resistance and Colonialism Jun 23 2019 This volume offers a critical re-examination of colonial and anti-colonial resistance imageries and practices in imperial history. It offers a fresh critique of both pejorative and celebratory readings of 'insurgent peoples', and it seeks to revitalize the study of 'resistance' as an analytical field in the comparative history of Western colonialisms. It explores how to read and (de)code these issues in archival documents - and how to conjugate documental approaches with oral history, indigenous memories, and international histories of empire. The topics explored include runaway slaves and slave rebellions, mutiny and banditry, memories and practices of guerrilla and liberation, diplomatic negotiations and cross-border confrontations, theft, collaboration, and even the subversive effects of nature in colonial projects of labor exploitation.

Imperialism with Reference to Syria Nov 28 2019 This extended essay investigates the meaning of imperialism in Syria, providing a valuable addition to the ongoing debate on the Syrian crisis through the lens of imperialism, modern warfare, and geopolitics. It offers a detailed analysis of how the Syrian war has been the product of imperialist ambitions. The author begins by situating the Syrian conflict in the regional historical continuum, positing that the modern imperialist war visited upon Syria is both a production domain intrinsic to capital, and an application of the law of value assuming a highly destructive form. Such processes, particularly the measure of war as a component of accumulation by waste and militarism, are peculiar to the imperialism of the United States, which the author argues is the sole imperialist power at play in Syria, and globally. With so many international forces vying with one another in this country, and some prominent Western scholars equally ascribing imperialism to the US, Russia and China, defining "who the imperialist is" can help to clear some of the fog in the war of positions, as a misplaced or ideologically motivated assessment can provide the wrong party with a justification for prolonging the war. This book will be of interest to academics in the social sciences and Middle Eastern studies, but will also appeal to all readers with an interest in patterns of global development, postcolonialism and neoliberal imperialism.

Neo-Colonialism and the Poverty of 'Development' in Africa Jun 03 2020 Langan reclaims neo-colonialism as an analytical force for making sense of the failure of 'development' strategies in many African states in an era of free market globalisation. Eschewing polemics and critically engaging the work of Ghana's first President - Kwame Nkrumah - the book offers a rigorous assessment of the concept of neo-colonialism. It then demonstrates how neo-colonialism remains an impediment to genuine empirical sovereignty and poverty reduction in Africa today. It does this through examination of corporate interventions; Western aid-giving; the emergence of 'new' donors such as China; EU-Africa trade regimes; the securitisation of development; and the UN Sustainable Development Goals. Throughout the chapters, it becomes clear that the current challenges of African development cannot be solely pinned on so-called neo-patrimonial elites. Instead it becomes imperative to fully acknowledge, and interrogate, corporate and donor interventions which lock many poorer countries into neo-colonial patterns of trade and production. The book provides an original contribution to studies of African political economy, demonstrating the on-going relevance of the concept of neo-colonialism, and reclaiming it for scholarly analysis in a global era.

News and the British World Jan 11 2021 Revealed to contemporaries by the South African War, the basis on which the system would develop soon became the focus for debate. Commercial organizations, including newspaper combinations and news agencies such as Reuters, fought to protect their interests, while "constructive imperialists" attempted to enlist the power of the state to strengthen the system. Debate culminated in fierce controversies over state censorship and propaganda during and after World War I. Based on extensive archival research, this study addresses crucial themes, including the impact of empire on the press, Britain's imperial experience, and the idea of a "British world".

Indefensible Jul 17 2021 Using an analysis of imperialism and case studies of Syria, Iran, Iraq, Bosnia, Russia and Ukraine, *Global Democracy and the Crisis of Anti-Imperialism* shows that the purported anti-imperialism of many self-professed socialists amounts to explicit or implicit support for totalitarianism, fascism, Islamist theocracy and imperialism. The analysis shows that the Russian revolution was followed by a counter-revolution, and resulted in state capitalism and the revival of Russian imperialism under cover of the Soviet Union. Thus the Cold War was actually a prolonged period of inter-imperialist rivalry between the United States and Russia. A large section of socialists who call themselves anti-imperialists oppose only Western imperialism and the despots it supports, not Russian imperialism and despots like Bashar al-Assad who are supported by it. As Russia has moved further and further to the right under Putin, they have effectively defected to the far right. They and other socialists also mistakenly believe that political democracy is organically connected to capitalism and therefore need not be defended, whereas, on the contrary, democracy is only established by mass struggles, and is an indispensable resource in the fight against exploitation and oppression. Finally, these socialists fail to understand that without internationalism, it is impossible to defeat global capitalism and its neoliberal policies. All the case studies in this book represent attempts to carry out democratic revolutions, which are supported by genuine socialist internationalists but opposed by pseudo-anti-imperialists. The book ends by suggesting steps that can be taken to promote democracy and end mass slaughter.

Colonialism and Its Forms of Knowledge Sep 18 2021 Bernard Cohn's interest in the construction of Empire as an intellectual and cultural phenomenon has set the agenda for the academic study of modern Indian culture for over two decades. His earlier publications have shown how dramatic British innovations in India, including revenue and legal systems, led to fundamental structural changes in Indian social relations. This collection of his writings in the last fifteen years discusses areas in which the colonial impact has generally been overlooked. The essays form a multifaceted exploration of the ways in which the British discovery, collection, and codification of information about Indian society contributed to colonial cultural hegemony and political control. Cohn argues that the British Orientalists' study of Indian languages was important to the colonial project of control and command. He also asserts that an arena of colonial power that seemed most benign and most susceptible to indigenous influences--mostly law--in fact became responsible for the institutional reactivation of peculiarly British notions about how to regulate a colonial society made up of "others." He shows how the very Orientalist imagination that led to brilliant antiquarian collections, archaeological finds, and photographic forays were in fact forms of constructing an India that could be better packaged, inferiorized, and ruled. A final essay on cloth suggests how clothes have been part of the history of both colonialism and anticolonialism.

The British Army 1815-1914 Aug 18 2021 This collection of essays examines the evolution of the British Army during the century-long Pax Britannica, from the time Wellington considered its soldiers 'the scum of the earth' to the height of the imperial epoch, when they were highly-respected 'soldiers of the Queen'. The British Army during this period was a microcosm and reflection of the larger British society. As a result, this study of the British Army focuses on its character and composition, its officers and men, efforts to improve its efficiency and effectiveness and its role and performance on active service while an instrument of British Government policy.
