Which Book and Why Dec 22 2021 We want all children to love reading, and *Which Book and Why* demonstrates how effective guided reading for children in Foundation Stage and Key Stage 1 can help teachers make this happen. Balancing theory and practice, this book explores how schools and teachers can implement guided reading more confidently and more effectively. *Which Book and Why* draws together the teaching pedagogy underpinning guided reading. The book demonstrates how to develop word-reading skills, reading for meaning, and reading for information. Building on the success and strong foundations of *Book Bands for Guided Reading* (Baker, Bickler and Bodman, 2007), *Which Book and Why*: • supports the effective delivery of guided reading for young children in the early stages of learning to read; • helps teachers to choose the right book at the right time, based on focused assessments; • explains how guided reading fits with current theoretical understanding of how children learn; • demonstrates how guided reading works in practice; • outlines how practice may vary, depending on the choice of text, teaching objectives, and the needs of the child; • provides guidance for school subject leaders and senior managers, and for teachers' self-study. *Which Book and Why* includes in the accompanying CD-ROM a fully searchable database to support schools and teachers in choosing the most appropriate books at the right level for each group in a class. The database includes a full listing of colour-banded titles, including those from recently published series, allowing teachers to use their existing libraries more effectively while also informing decision-making about new resources. In parallel, teachers can search the database for texts that will complement the teaching progression of mainstream phonic programmes, review programmes that are available, and search for a text to consolidate teaching of particular phonemes. *Which Book and Why* offers professional development resources in each section; self-study activities for teachers – including student teachers, newly qualified teachers, and staff new to guided reading; resources for literacy subject coordinators; and resources for senior management and leadership teams to support the implementation of high-quality and effective guided reading lessons.

Pedagogy and Practice May 27 2022 This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners, and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning, through new ways of relating, and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings, and the role of the teacher in this sociocultural view of learning. By illustrating the mediated nature of agency and identity, the chapters (re)conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and from out-of-school to institutionally-based and work place situations. Curricular aspects represented include popular culture, critical literacy, multimodality, the arts, and new technologies. Teachers and student teachers, as learners, are also represented in the accounts assembled. The book takes a sociocultural view of learning and considers the pedagogical implications of this view. It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities. The contributions challenge ways of thinking about practice, both teaching and assessment, and argue for practices that bridge between learners' worlds, their communities and educational institutions. Drawing on the international literature, this book will be essential reading for students of curriculum learning and assessment in all sectors from pre-primary to further and higher education. It is suitable as a core text for masters and taught doctorate programmes. It will also be of interest to a wide range of professionals involved with curriculum, learning and the practice of teaching and assessment. This book is relevant to those in work-based and professional education and training, and in informal educational settings, as well as traditional educational institutions at all levels. A unique collection in a field that is underrepresented, it will also be of interest to an academic audience.
