Harrison's Principles of Internal Medicine: Cardinal manifestations and presentation of diseases Aug 01 2022 "Harrison's is intended for learners throughout their careers. For students, Part 1, Chapter 1 begins with an overview of "The Practice of Medicine". In this introductory chapter, the editors continue the tradition of orienting clinicians to the science and the art of medicine, emphasizing the values of our profession while incorporating new advances in technology, science, and clinical care. Part 2, "Cardinal Manifestations and Presentation of Diseases" is a signature feature of Harrison's. These chapters eloquently describe how patients present with common clinical conditions, such as headache, fever, cough, palpitations, or anemia, and provide an overview of typical symptoms, physical findings, and differential diagnosis. Mastery of these topics prepares students for subsequent chapters on specific diseases they will encounter in courses on pathophysiology and in clinical clerkships"--

Ebook: Coaching from the Inside: The Guiding Principles of Internal Coac hing Jun 26 2019 This book highlights some of the unique challenges that are faced when coaching inside your own organization. In comparison to existing coaching literature, which typically focuses on external coaching, this book provides a toolkit specifically for internal coaches. J. Val Hastings draws on over 20 years' of experience, in addition to international interviews with current internal coaches in a range of industries, to explore the questions that create the foundation of strong internal coaching practice: • How do you manage potential conflicts of interest as an internal coach? • How do you coach when you have a vested interest in the outcome? • How do you seamlessly change roles as an internal coach? • How do you help leaders understand what coaching is, as well as its value - and yours - to the organization? • How do you coach the system? Important reading for all internal coaches and coaches in training, this book provides a key set of guiding principles and puts practical resources into the hands of the people who need them. "Only a masterful and insightful coach as Val Hastings could put together a book which teaches how to really deal with this scenario. This one is to be studied once, twice... again, again and again." Juliana de Lacerda Camargo, Master Certified Coach, Partner of R122 and Representative of C4TL in Brazil "Val shares some great insights and ideas on changing the culture of organisations so that colleagues listen more than they fix. Coaching from the Inside makes transformation more accessible for everyone!" Claire Pedrick MCC, Author of Simplifying Coaching "Coaching from the Inside is a masterpiece that reminds leaders that it will bring out the best in individuals, teams, and organizations when developing a coaching culture." HiRho Y. Park, PhD., DMin., PCC, Vice President for International Relations and Advancement, Huree University, Mongolia J. Val Hastings, MCC, is the founder of Coaching4Today'sLeaders and Coaching4Clergy and has been coaching for over 20 years. A coach trainer, coach, mentor-coach, ICF credential assessor, author, and pastor, Val trains coaches across the globe, partnering with them to create internal coaching programs.

Principles of Internal Fixation of the Craniomaxillofacial Skeleton Jul 20 2021 Traditionally, each specialty involved in craniomaxillofacial trauma and orthognathic surgery had its own areas of interest and expertise. This introductory textbook is different in that it presents the combined and focused expertise and competence of the different specialties on the entire craniofacial skeleton. The principles described in this textbook represent the evolution of craniomaxillofacial buttress reconstruction over the last 60 years. In addition to standard procedures, techniques representing recent surgical advances and new developments are introduced as well. This textbook not only provides an overview on current concepts of craniomaxillofacial trauma care and orthognathic surgery, but also helps to understand the complexity of the craniofacial skeleton and its related soft tissues for an efficient and successful reconstruction of the face following trauma and congenital deformities.
