A Touch of Doubt Dec 13 2020 What can we know about ourselves and the world through the sense of touch and what are the epistemic limits of touch? Scepticism claims that there is always something that slips through the epistemologist's grasp. A Touch of Doubt explores the significance of touch for the history of philosophical scepticism as well as for scepticism as an embodied form of subversive political, religious, and artistic practice. Drawing on the tradition of scepticism within nineteenth- and twentieth-century continental philosophy and psychoanalysis, this volume discusses how the sense of touch uncovers contradictions within our knowledge of ourselves and the world. It questions 1) what we can know through touch, 2) what we can know about touch itself, and 3) how our experience of touching the other and ourselves throws us into a state of doubt. This volume is intended for students and scholars who wish to reconsider the experience of touching in intersections of philosophy, religion, art, and social and political practice.

Touch Oct 23 2021 An essay on the importance of touch to children's growth and development and to the physical and mental well-being of people of all ages. The first sensory input in life comes from the sense of touch while a baby is still in the womb, and touch continues to be the primary means of learning about the world throughout infancy, well into childhood. Touch is critical for children's growth, development, and health, as well as for adults' physical and mental well-being. Yet American society, claims Tiffany Field, is dangerously touch-deprived. Field, a leading authority on touch and touch therapy, begins this accessible book with an overview of the sociology and anthropology of touching and the basic psychophysical properties of touch. She then reports recent research results on the value of touch therapies, such as massage therapy, for various conditions, including asthma, cancer, autism, and eating disorders. She emphasizes the need for a change in societal attitudes toward touching, particularly among those who work with children.
