Quantitative Methods for Decision Making Using Excel Oct 27 2019 Quantitative Methods for Decision Making is a comprehensive guide that provides students with the key techniques and methodology they will need to successfully engage with all aspects of quantitative analysis and decision making; both on their undergraduate course, and in the larger context of their future business environments. Organized in accordance with the enterprise functional structure where the decision making takes place, the textbook encompasses a broad range of functions, each detailed with clear examples illustrated through the single application tool Microsoft Excel. The authors approach a range of methods which are divided into major enterprise functions such as marketing, sales, business development, manufacturing, quality control and finance; illustrating how the methods can be applied in practice and translated into a working environment. Each chapter is packed with short case studies to exemplify the practical use of techniques, and contains a wealth of exercises after key sections and concepts, giving students the opportunity to monitor their own progress using the solutions at the back of the book. An Online Resource Centre accompanies the text and includes: For students: - Numerical skills workbook with additional exercises, questions and content - Data from the examples and exercises in the book - Online glossary of terms - Revision tips - Visual walkthrough videos covering the application of a range of quantitative methods - Appendices to the book For lecturers: - Instructor's manual including solutions from the text and a guide to structuring lectures and seminars - PowerPoint presentations - Test bank with questions for each chapter - Suggested assignment and examination questions Promadata, Promotion, Marketing & Advertising Data Nov 28 2019 Includes index.

Hybrid Warfare and the Gray Zone Threat Dec 30 2019 Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 141, Hybrid Warfare and the Gray Zone Threat, considers the mutation of the international security environment brought on by decades of unrivaled U.S. conventional military power. The term "hybrid warfare" encompasses conventional warfare, irregular warfare, cyberwarfare, insurgency, criminality, economic blackmail, ethnic warfare, "lawfare", and the application of low-cost but effective technologies to thwart high-cost technologically advanced forces. This volume is divided into five sections covering different aspects of this topic, each of which is introduced by expert commentary written by series editor Douglas C. Lovelace, Jr. This volume contains thirteen useful documents exploring various facets of the shifting international security environment, including a detailed report on hybrid warfare issued by the Joint Special Operations University and a White Paper on special operations forces support to political warfare prepared by the U.S. Army Special Operations Command, as well as a GAO report and a CRS report covering similar topics. Specific coverage is also given to topics such as cybersecurity and cyberwarfare, the efficacy of sanctions in avoiding and deterring hybrid warfare threats, and the intersection of the military and domestic U.S. law enforcement.

Advanced Excel for Scientific Data Analysis Aug 18 2021 This guide to Excel focuses on three areas--least squares, Fourier transformation, and digital simulation. It illustrates the techniques with detailed examples, many drawn from the scientific literature. It also includes and describes a number of sample macros and functions to facilitate common data analysis tasks. De Levie is affiliated with Bowdoin College. Annotation : 2004 Book News, Inc., Portland, OR (booknews.com).
