Reset Jan 28 2020 "Behaviour change is a hot topic in many fields nowadays, from public health to marketing to web design to architecture and public policy. However, there is little consensus about how to approach it: there are over 100 change theories in health psychology alone, and the field of behavioural economics has over 100 'nudges' for inspiring behaviour change as well (just to mention the two most

prominent fields dealing with this topic). The proposed book is about a new, generic way of approaching behaviour change called 'Behaviour Centred Design' (BCD). It provides a theory-based framework for designing behaviour change programs in any field. Further, BCD is based on more fundamental sources of theory than alternatives: evolutionary biology and neuroscience - basically because these are more reliable sources of ideas about behaviour than the cognitive psychology that other methodologies have traditionally depended on"--

Integrated Audio Amplifiers in BCD Technology Aug 29 2022 Integrated Audio Amplifiers in BCD Technology is the first book to describe the design at Audio Amplifiers using a Bipolar CMOS DMOS (BCD) process. It shows how the combination of the 3 processes, made available by advances in process technology, gives rise to the design of more robust and powerful audio amplifiers which can be more easily implemented in digital and mixed-signal circuits. Integrated Audio Amplifiers in BCD Technology starts with an introduction to audio amplifiers which includes a comparison of amplifier classes, general design considerations and a list of specifications for integrated audio power amplifiers. This is followed by an extensive discussion of the properties of DMOS transistors which are the key components in BCD technologies. Then the theory and the design of chargepump circuits is considered. In most BCD technologies only n-type DMOS transistors are available. Therefore a boosted supply voltage is required to achieve rail-to-rail output capability which can be generated with a chargepump. The new solutions that are found can also be used for many applications where DC-DC conversion with low output ripple is needed. Finally the design of audio power amplifier in BCD technology is discussed. The design concentrates on a new quiescent control circuit with very high ratio between quiescent current and maximum output current and on the output stage topologies. The problem of controlling the DMOS output transistors over a wide

range of currents either saturated or non saturated requires a completely new design of the driving circuits that utilize of the special properties of the DMOS transistor. Integrated Audio Amplifiers in BCD Technology is essential reading for practising analog design engineers and researchers in the field. It is also suitable as a text for an advanced course on the subject. With a foreword by Ed van Tuijl.

Tactics, Techniques, and Procedures (TTP) for the Battlefield Coordination Detachment (BCD) (FM 100-13-1) Aug 17 2021 This manual provides a snapshot of the current status of the automated Battlefield Coordination Detachment (BCD) initiative. It provides a detailed explanation of the command, control, communications, computers, and intelligence (C4I) systems described in FM 100-13, and their application to the BCD's mission within an automated architecture. It is a requirements document for functionality required but not yet available on fielded systems. The BCD accomplishes its mission with organic unit equipment and JAOC-provided systems. It task-organizes its systems to meet operational constraints (personnel, working space) and theater-specific requirements.

Sharpening the Haze May 14 2021 This volume presents ten visual essays that reflect on the historical, cultural and socio-political legacies of empires. Drawing on a variety of visual genres and forms, including photographs, illustrated advertisements, stills from site-specific art performances and films, and maps, the book illuminates the contours of empire's social worlds and its political legacies through the visual essay. The guiding, titular metaphor, sharpening the haze, captures our commitment to frame empire from different vantage points, seeking focus within its plural modes of power. We contend that critical scholarship on empires would benefit from more creative attempts to reveal and confront empire. Broadly, the essays track a course from interrogations of imperial pasts to subversive reinscriptions of imperial images in the present, even as both projects inform each author's intervention.
