Financial Instrument Pricing Using C++ Apr 01 2020 An integrated guide to C++ and computational finance This complete guide to C++ and computational finance is a follow-up and major extension to Daniel J. Duffy's 2004 edition of Financial Instrument Pricing Using C++. Both C++ and computational finance have evolved and changed dramatically in the last ten years and this book documents these improvements. Duffy focuses on these developments and the advantages for the quant developer by: Delving into a detailed account of the new C++11 standard and its applicability to computational finance. Using de-facto standard libraries, such as Boost and Eigen to improve developer productivity. Developing multiparadigm software using the object-oriented, generic, and functional programming styles. Designing flexible numerical algorithms: modern numerical methods and multiparadigm design patterns. Providing a detailed explanation of the Finite Difference Methods through six chapters, including new developments such as ADE, Method of Lines (MOL), and Uncertain Volatility Models. Developing applications, from financial model to algorithmic design and code, through a coherent approach. Generating interoperability with Excel add-ins, C#, and C++/CLI. Using random number generation in C++11 and Monte Carlo simulation. Duffy adopted a spiral model approach while writing each chapter of Financial Instrument Pricing Using C++ 2e: analyse a little, design a little, and code a little. Each cycle ends with a working prototype in C++ and shows how a given algorithm or numerical method works. Additionally, each chapter contains non-trivial exercises and projects that discuss improvements and extensions to the material. This book is for designers and application developers in computational finance, and assumes the reader has some fundamental experience of C++ and derivatives pricing. HOW TO RECEIVE THE SOURCE CODE Once you have purchased a copy of the book please send an email to the author dduffyATdatasim.nl requesting your personal and non-transferable copy of the source code. Proof of purchase is needed. The subject of the mail should be "C++ Book Source Code Request". You will receive a reply with a zip file attachment.

The Long Good Buy Sep 30 2022 PRAISE FOR THE LONG GOOD BUY: "Oppenheimer offers brilliant insights, sage advice and entertaining anecdotes. Anyone wishing to understand how financial markets behave – and misbehave – should read this book now." Stephen D. King, economist and author of Grave New World: The End of Globalisation, the Return of History "Peter has always been one of the masters of dissecting financial markets performance into an understandable narrative, and in this book, he pulls together much of his great thinking and style from his career, and it should be useful for anyone trying to understand what drives markets, especially equities." Lord Jim O'Neill, Chair, Chatham House "A deeply insightful analysis of market cycles and their drivers that really does add to our practical understanding of what moves markets and long-term investment returns." Keith Skeoch, CEO, Standard Life Aberdeen "This book eloquently blends the author's vast experience with behavioural finance insights to document and understand financial booms and busts. The book should be basic reading for any student of finance." Elias Papaioannou, Professor of Economics, London Business School "This is an excellent book, capturing the insights of a leading market practitioner within the structured analytical framework he has developed over many years. It offers a lively and unique perspective on how markets work and where they are headed." Huw Pill, Senior Lecturer, Harvard Business School "The Long Good Buy is an excellent introduction to understanding the cycles, trends and crises in financial markets over the past 100 years. Its purpose is to help investors assess risk and the probabilities of different outcomes. It is lucidly written in a simple logical way, requires no mathematical expertise and draws on an amazing collection of historical data and research. For me it is the best and most comprehensive introduction to the subject that exists." Lord Brian Griffiths, Chairman - Centre for Enterprise, Markets and Ethics, Oxford
