*Modelling with the Master Equation* Nov 23 2021 This book presents the theory and practical applications of the Master equation approach, which provides a powerful general framework for model building in a variety of disciplines. The aim of the book is to not only highlight different mathematical solution methods, but also reveal their potential by means of practical examples. Part I of the book, which can be used as a toolbox, introduces selected statistical fundamentals and solution methods for the Master equation. In Part II and Part III, the Master equation approach is applied to important applications in the natural and social sciences. The case studies presented mainly hail from the social sciences, including urban and regional dynamics, population dynamics, dynamic decision theory, opinion formation and traffic dynamics; however, some applications from physics and chemistry are treated as well, underlining the interdisciplinary modelling potential of the Master equation approach. Drawing upon the author's extensive teaching and research experience and consulting work, the book offers a valuable guide for researchers, graduate students and professionals alike.

**Concepts and Models of a Quantitative Sociology** Jul 08 2020 While the volumes hitherto published in the Springer Series in Synergetics have been devoted almost exclusively to the self-organized formation of structures in physics, chemistry and biology, the present monograph by Weidlich and Haag deals with the formation of "structures" (or "patterns") in society. At first glance it would seem a daring enterprise to deal with the complex processes in society using concepts and methods first developed in physics. But over the past decade it has been shown that there is a large class of phenomena in a variety of fields to which unifying concepts can be applied. This is particularly true of situations in which a system composed of many parts or individuals acquires a new structure on macroscopic scales. Indeed, this is the definition of synergetics which I formulated more than a decade ago, and which formed the basis of my survey on the profound analogies in the behaviour of complex systems, including those of sociology (H. Haken: Synergetics. An Introduction, Volume 1 of this series). As I have pointed out on many occasions, the universal validity of these concepts is neither accidental nor is it caused by a mere extension of physical rules to other fields, but is instead a consequence of deep-rooted structural properties of systems of interacting parts which are due to rigorous mathematical laws. Generally speaking, concepts and methods originally used in physics can be applied to sociological phenomena in two ways.

**NL ARMS Netherlands Annual Review of Military Studies 2020** Jan 02 2020 This open access volume surveys the state of the field to examine whether a fifth wave of deterrence theory is emerging. Bringing

together insights from world-leading experts from three continents, the volume identifies the most pressing strategic challenges, frames theoretical concepts, and describes new strategies. The use and utility of deterrence in today's strategic environment is a topic of paramount concern to scholars, strategists and policymakers. Ours is a period of considerable strategic turbulence, which in recent years has featured a renewed emphasis on nuclear weapons used in defence postures across different theatres; a dramatic growth in the scale of military cyber capabilities and the frequency with which these are used; and rapid technological progress including the proliferation of long-range strike and unmanned systems. These military-strategic developments occur in a polarized international system, where cooperation between leading powers on arms control regimes is breaking down, states widely make use of hybrid conflict strategies, and the number of internationalized intrastate proxy conflicts has quintupled over the past two decades. Contemporary conflict actors exploit a wider gamut of coercive instruments, which they apply across a wider range of domains. The prevalence of multi-domain coercion across but also beyond traditional dimensions of armed conflict raises an important question: what does effective deterrence look like in the 21st century? Answering that question requires a re-appraisal of key theoretical concepts and dominant strategies of Western and non-Western actors in order to assess how they hold up in today's world. Air Commodore Professor Dr. Frans Osinga is the Chair of the War Studies Department of the Netherlands Defence Academy and the Special Chair in War Studies at the University Leiden. Dr. Tim Sweijis is the Director of Research at The Hague Centre for Strategic Studies and a Research Fellow at the Faculty of Military Sciences of the Netherlands Defence Academy in Breda.

**Shooting Incident Reconstruction** May 18 2021 Forensic scientists, law enforcement, and crime scene investigators are often tasked with reconstruction of events based on crime scene evidence, and the subsequent analysis of that evidence. The use and misuse of firearms to perpetrate crimes from theft to murder necessitates numerous invitations to reconstruct shooting incidents. The discharge of firearms and the behavior of projectiles create many forms of physical evidence that, through proper testing and interpretation by a skilled forensic scientist, can establish what did and what did not occur. This book is generated from the authors' numerous years of conducting courses and seminars on the subject of shooting incident reconstruction. It seeks to thoroughly address matters from simple to complex in providing the reader an explanation of the factors surrounding ballistics, trajectory, and shooting scenes. The ultimate objectives of this unique book are to assist investigators, crime scene analysts, pathologists, ballistics experts, and lawyers to understand the terminology, science, and factors involved in reconstructing shooting incident events to solve forensic cases. The book will cover the full range of related topics including the range from which a firearm was discharged, the sequence of shots in a multiple discharge shooting incident, the position of a firearm at the moment of discharge, the position of a victim at the moment of impact, the probable flight path of a projectile, the manner in which a firearm was discharged and much more. Written by the most well-respected shooting scene and ballistics experts in the world Contains over 200 full-color diagrams and photographs that support and illustrate key concepts Case studies illustrate real-world application of technical concepts

Managing Information Systems Dec 01 2019 Information systems (IS)/Information technology(IT) has become an essential part and a major resource of the organization. IS/IT is a major resource that can radically affect the structure of an organisation, the way it serves customers, and the way it helps people in organisations to communicate both internally and externally, and the way an organisation runs its business. Managing information and information systems effectively and efficiently have become an essential part of the life of 21st century managers. This book is about Managing information and information systems and focuses on relationships between information, information systems/information technology, people and business. The impacts, roles, risks, challenges as well as emerging trends of information systems will be an important element of the book. At the same time, many strategic and contemporary uses of information systems such as implementing enterprise planning systems for improving internal operation, adopting customer relationship management systems and supply chain management systems to enhance relations with customers and suppliers/partners respectively, and establishing knowledge management systems for better managing organizational knowledge resources as well as using different information systems for supporting managers' decision making in all levels will be an integral part of the book. In addition, essential and critical information systems management skills including using information systems for competitive advantages, planning and evaluating information systems, system development & implementing information systems, and managing information systems operations will be a critical part of the book.

**Management Information Systems for the Information Age** Aug 01 2022 Flexibility. Choice. Strength. Flow. Imagine choosing the best mix of chapters in a text, the order you'll teach them, then the extended learning items to reinforce the chapters. The text will match your curriculum perfectly as if you had created it yourself. That's what we've developed MIS for the Information Age, 3/c/e to do. This text provides the best total solution for MIS. Core chapters focus on the key principles, while Extended Learning Modules take you deeper into the most important and innovative technology solutions. And Skills Modules provide additional hands-on learning: An object-oriented text for the MIS course!

Social Informatics Sep 21 2021 This book constitutes the proceedings of the 4th International Conference on Social Informatics, SocInfo 2012, held in Lausanne, Switzerland, in December 2012. The 21 full papers, 18 short papers included in this volume were carefully reviewed and selected from 61 submissions. The papers are organized in topical sections named: social choice mechanisms in the e-society, computational models of social phenomena, social simulation, web mining and its social interpretations, algorithms and protocols inspired by human societies, socio-economic systems and applications, trust, privacy, risk and security in social contexts.

**Affective Dialogue Systems** Jan 14 2021 Human conversational partners are able, at least to a certain extent, to detect the speaker's or listener's emotional state and may attempt to respond to it accordingly. When instead one of the interlocutors is a computer a number of questions arise, such as the following: To what extent are dialogue systems able to simulate such behaviors? Can we learn the mechanisms of emotional behaviors from observing and analyzing the behavior of human speakers? How can emotions be automatically recognized from a user's mimics, gestures and speech? What possibilities does a dialogue system have to express emotions itself? And, very importantly, would emotional system behavior be desirable at all? Given the state of ongoing research into incorporating emotions in dialogue systems we found it timely to organize a Tutorial and Research Workshop on Affective Dialogue Systems (ADS2004) at Kloster Irsee in Germany during June 14-16, 2004. After two successful ISCA Tutorial and Research Workshops on Multimodal Dialogue Systems at the same location in 1999 and 2002, we felt that a workshop focusing on the role of affect in dialogue would be a valuable continuation of the workshop series. Due to its interdisciplinary nature, the workshop attracted submissions from researchers with very different backgrounds and from many different research areas, working on, for example, dialogue processing, speech recognition, speech synthesis, embodied conversational agents, computer graphics, animation, user modelling, tutoring systems, cognitive systems, and human-computer interaction.

*New Perspectives: Portfolio Projects for Business Analysis* Nov 11 2020 Portfolio Projects for Business Analysis is designed to help students practice and perfect technology skills. This companion text is ideal for students taking a variety of different courses from Communications, Marketing, and Accounting to Introduction to Business courses. Portfolio Projects for Business Analysis includes 15 projects based on real-world business scenarios, allowing students to compile a comprehensive portfolio of business analysis examples to use during the interview process. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Business Driven Technology** Jan 26 2022 BDT takes a business-first approach, improving students' perception of the value of IS within the business discipline. This perspective allows instructors to more easily demonstrate how technology and systems support business performance and growth. The adaptive chapter/plugin organization enables the instructor to adjust content according to their business or technical preferences.

*Simnet Mis* Aug 28 2019 SimNet MIS is a new computer-based tutorial program for the Management Information Systems course (MIS). It is based on McGraw-Hill's award-winning SimNet Xpert but has had 14 new features developed expressly for the MIS course. SimNet MIS is designed to work perfectly alongside any McGraw-Hill MIS textbook. When this valuable tool is used in conjunction with a MIS textbook, students benefit by having a learning device that allows them to practice and study their skills at home or in the school lab, at their own pace.

*Inferno Decoded* Mar 16 2021 An all-inclusive guide to key concepts and details about Dan Brown's novel *Inferno*—featuring black-and-white illustrations. Go deep into the provocative and always compelling world of Dan Brown's novel, *Inferno*. Delivering crucial background on the characters, codes, symbols, secrets, and setting of the novel, *Inferno Decoded* also offers a wealth of fascinating details about the historical and cultural background and the questions it raises. As in Michael Haag's previous bestseller, *The Rough Guide to The Da Vinci Code*, the author illuminates the life and work of Dante Alighieri and the world of medieval Florence. Also included: an overview of Dante and his work, along with the other themes of Brown's thriller; a guide to its sources and Tuscan locations; and a look back at the earlier career of Brown's hero, Harvard Professor of Symbology, Robert Langdon.

**Business Information Systems** Feb 24 2022 This textbook offers students a systematic guide to how information systems underpin organisational activity in today's global information society, covering everything from ICT infrastructure and the digital environment to electronic marketing, mobile commerce and design thinking. While academically rigorous and underpinned by the author's deep knowledge of the subject, an engaging writing style combined with extensive pedagogical features, cases and innovative examples from around the world ensure that the text remains accessible to those approaching the topic for the first time. Taking an approach that views businesses as complex systems, the book illustrates how valuable systems thinking can be in our everyday working lives, while theoretical ideas are always supported by examples of their application in the real world. This text is the ideal course companion for all students studying business information systems or management information systems modules at undergraduate, postgraduate or MBA level. New to this Edition: - New coverage of key contemporary topics, including big data, analytics, cloud computing, the internet of things, blockchain and bitcoin, green IS, ethics, and cyber security. - Brand new chapters on Mobile Commerce and Social Media, and Designing Digital Organisation (design thinking). - A revised concluding chapter considering contemporary technological trends, as well as reflections and predictions for future innovations.

**Information Systems for Industry 4.0** Sep 09 2020 This book provides a selection of the best papers presented at the 18th Conference of the Portuguese Association for Information Systems (CAPSI), which was held in 2018. The focus of the conference and of these proceedings lies on the interplay between information systems and Industry 4.0. All contributions, which include original research, review papers and case studies, were peer-reviewed in a double blind process.

*Principles of Information Systems* Aug 09 2020 Now thoroughly streamlined and revised, PRINCIPLES OF INFORMATION SYSTEMS, Ninth Edition, retains the overall vision and framework that made the previous editions so popular while eliminating outdated topics and updating information, examples, and case studies. In just 600 pages, accomplished authors Ralph Stair and George Reynolds cover IS principles and their real-world applications using timely, current business examples and hands-on activities. Regardless of their majors, students can use this book to understand and practice IS principles so they can function more effectively as workers, managers, decision makers, and organizational leaders. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Loose-Leaf Management Information Systems for the Information Age Sep 02 2022 The Ninth Edition of *Management Information Systems for the Information Age* provides you the ultimate in flexibility to tailor content to the exact needs for your MIS or IT course. The nine chapters and thirteen Extended Learning Modules may be presented in logical sequence, or you may choose your own mix of technical topics and business/managerial topics. Chapters cover what instructors want students to know about MIS while Extended Learning Modules (XLMs) show students what they can do with MIS. A contemporary writing style and a wealth of examples engage students in the content. Arranged with chapter opening cases that highlight how an organization has successfully implemented many of the chapter's concepts and chapter closing cases that help students apply what they just learned gives students the hands-on knowledge that is applicable in both their personal and professional experiences.

**Information Systems Essentials** Apr 28 2022 A concise, four-color IS concepts book with a lively, contemporary writing style at a student-friendly price. *Information Systems Essentials* comes with more and better ancillaries than any other essentials text. An additional unique feature is the opening unit, explaining the benefit and impact of IS on each business career. This chapter addresses the frequently-cited problem of effectively showing students the relevance of this course. *Information Systems Essentials* includes the first nine chapters from Haag MIS 5e, representing what introductory MIS students should definitely know. An appendix includes the two XLMs from Haag MIS 5e: hardware/software and telecommunications.

**Business Driven Information Systems** Sep 29 2019 *Business Driven Information Systems* 2nd edition takes a contemporary approach by discussing how business initiatives should ultimately drive technology choices. This edition offers an impressive variety of new case studies - real world examples of MIS in action- including coverage of Wikileaks, Myki and Apple innovations. Integrated coverage of mobile technologies, cloud computing and social networking reflects the emerging business environments that await today's business graduate. *Business Driven Information Systems* provides the foundation that will enable students to achieve excellence in business, whether they major in operations management, manufacturing, sales, marketing, finance, human resources, accounting, or virtually any other business discipline.

**Management Information Systems** Aug 21 2021 *Management Information Systems* provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

*Multivalency* Mar 04 2020 Connects fundamental knowledge of multivalent interactions with current practice and state-of-the-art applications. Multivalency is a widespread phenomenon, with applications spanning supramolecular chemistry, materials chemistry, pharmaceutical chemistry and biochemistry. This advanced textbook provides students and junior scientists with an excellent introduction to the fundamentals of multivalent interactions, whilst expanding the knowledge of experienced researchers in the field. *Multivalency: Concepts, Research & Applications* is divided into three parts. Part one provides background knowledge on various aspects of multivalency and cooperativity and presents practical methods for their study. Fundamental aspects such as thermodynamics, kinetics and the principle of effective molarity are described, and characterisation methods, experimental methodologies and data treatment methods are also discussed. Parts two and three provide an overview of current systems in which multivalency plays an important role in chemistry and biology, with a focus on the design rules, underlying chemistry and the fundamental principles of multivalency. The systems covered range from chemical/materials-based ones such as dendrimers and sensors, to biological systems including cell recognition and protein binding. Examples and case studies from biochemistry/bioorganic chemistry as well as synthetic systems feature throughout the book. Introduces students and young scientists to the field of multivalent interactions and assists experienced researchers utilising the methodologies in their work. Features examples and case studies from biochemistry/bioorganic

chemistry, as well as synthetic systems throughout the book Edited by leading experts in the field with contributions from established scientists Multivalency: Concepts, Research & Applications is recommended for graduate students and junior scientists in supramolecular chemistry and related fields, looking for an introduction to multivalent interactions. It is also highly useful to experienced academics and scientists in industry working on research relating to multivalent and cooperative systems in supramolecular chemistry, organic chemistry, pharmaceutical chemistry, chemical biology, biochemistry, materials science and nanotechnology.

**(Dis)content** Oct 30 2019 I hate. I thought I hated before the letter, before the werewolves, but now I understand that was nothing more than a chip on my shoulder. The urbat took what was mine. And, they will pay. Isabelle leads a very normal life...for an emotional syphon. If not for Ethan and his bar, she would have lost her sanity long ago. But everything changes with the crash of her fighting cage and a man who transforms into a wolf. There's something about Carlos—when he's not growling at her—that makes her do things she wouldn't normally do, like sigh and daydream. Attraction aside, she is faced the very real evidence that werewolves and urbat exist, and the urbat are after her. And the only way she can keep Ethan safe is to join with the werewolves and Carlos. It's a race against time to stop a war, fight for love, and find the last Judgement.

**Management Information Systems for the Information Age** May 30 2022 This text provides a clearly focused overview of information systems, and is best suited to an MIS course where students have a lot of hands-on, problem-solving projects. It also examines the themes of electronic commerce and the way in which organizations use information systems.

**Introduction to Business Information Systems** Feb 01 2020 After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

**Design Ethnography** Apr 04 2020 This open access book describes methods for research on and research through design. It posits that ethnography is an appropriate method for design research because it constantly orients itself, like design projects, towards social realities. In research processes, designers acquire project-specific knowledge, which happens mostly intuitively in practice. When this knowledge becomes the subject of reflection and explication, it strengthens the discipline of design and makes it more open to interdisciplinary dialogue. Through the use of the ethnographic method in design, this book shows how design researchers can question the certainties of the everyday world, deconstruct reality into singular aesthetic and semantic phenomena, and reconfigure them into new contexts of signification. It shows that design ethnography is a process in which the epistemic and creative elements flow into one another in iterative loops. The goal of design ethnography is not to colonize the discipline of design with a positivist and objectivist scientific ethos, but rather to reinforce and reflect upon the explorative and searching methods that are inherent to it. This innovative book is of interest to design researchers and professionals, including graphic artists, ethnographers, visual anthropologists and others involved with creative arts/media.

**The New Era of Enterprise Business Intelligence** Jun 26 2019 A complete blueprint for creating winning business intelligence strategies and infrastructure, and maximizing the value of information \* \*Practical techniques for planning strategy, and exceptional real-world guidance on BI evaluation. \*Fully reflects radical shifts in the BI marketplace, including new platform suites (e.g., Cognos, SAP/BOBJ) and appliances (e.g., Netezza), which add complexity to decisionmaking and planning. \*Contains realistic solutions to the BI pitfalls enterprises encounter most often. Enterprises recognize the immense potential of business intelligence, but it's not easy to transform BI's potential into real business value. In Enterprise Business Intelligence , top IBM BI expert Mike Biere presents realistic start-to finish guidance and practical checklists for every planner, strategist, and implementer. Drawing on thousands of hours working with enterprise customers, Biere addresses both strategy and infrastructure, helping decisionmakers choose amongst today's unprecedented spectrum of options -- including the latest BI suites and appliances. Coverage includes: \* \*Understanding the evolving scope of potential BI solutions. \*Assessing new options such as SaaS and cloud-based technologies. \*Creating successful Proofs of Concept. \*Setting realistic expectations. \*Avoiding 'project killing' pitfalls in enterprise BI implementation. \*Setting up competency centers and planning for skills development. \*Establishing the right staffing roles throughout the enterprise. \*Selecting the right tools for development and other tasks. \*Working with advanced analytics, text analytics, data mining, dashboards, scoreboards, and KPIs Effective BI has never been more crucial to the success of the enterprise. Its importance means that it now requires scrutiny at higher levels of the organization than ever before. This book will give senior decision-makers and their teams the insights they need to make the best decisions - and get best results

**Women, Work and Computerization** Apr 16 2021 ELLENBALKKA Simon Fraser University ebalka@Sfu. ca 1. INTRODUCTION In developing the call for papers for the 7th International Federation of Information Processors (IFIP) Women, Work and Computerization Conference, we sought to cast our net widely. We wanted to encourage presenters to think broadly about women, work and computerization. Towards this end, the programme committee developed a call for papers that, in its final form, requested paper submissions around four related themes. These are (1) Setting the Course: Taking Stock of Where We Are and Where We're Going; (2) Charting Undiscovered Terrain: Creating Models, Tools and Theories; (3) Navigating the Unknown: Sex, Time, Space and Place, and (4) Taking the Helm: Education and Pedagogy. Our overall conference theme, 'Charting a Course to the Future' was inspired in part by Vancouver's geography, which is both coastal and mountainous. As such, navigation plays an important part in the lives of many as we seek to enjoy our environs. In addition, as the first Women, Work and Computerization conference of the new millennium, we hoped to encourage the broad community of scholars that has made past Women, Work and Computerization conferences a success to actively engage in imagining--and working towards-- a better future for women in relation to computers. The contributions to this volume are both a reflection of the hard work undertaken by many to improve the situation of women in relation to computerization, and a testament to how much work is yet to be done.
