*Social Networks at Work* Feb 01 2020 *Social Networks at Work* provides the latest thinking, from top-notch experts, on social networks as they apply to industrial and organizational (I/O) psychology. Each chapter provides an in-

depth review along with discussions of future research and managerial implications of the social network perspective. Altogether, the volume illustrates the importance of adding a social capital perspective to the traditional human capital focus of I/O psychology. The volume is organized into two groups of chapters: the first seven chapters focus on specific network concepts (such as centrality, affect, negative ties, multiplexity, cognition, and structural holes) applied across a variety of topics. The remaining eight chapters focus on common I/O topics (such as personality, creativity, turnover, careers, person-environment fit, employment, teams, and leadership) and examine each from a network perspective, applying a variety of network concepts to the topic. This volume is suited for students and academics interested in applying a social network perspective to their work, as well as for practicing managers. Each topic area provides a useful review and guide for future research, as well as implications for managerial action.

Understanding the Tacit Jul 08 2020 This book outlines a new account of the tacit, meaning tacit knowledge, presuppositions, practices, traditions, and so forth. It includes essays on topics such as underdetermination and mutual understanding, and critical discussions of the major alternative approaches to the tacit, including Bourdieu's habitus and various practice theories, Oakeshott's account of tradition, Quentin Skinner's theory of historical meaning, Harry Collins's idea of collective tacit knowledge, as well as discussions of relevant cognitive science concepts, such as non-conceptual content, connectionism, and mirror neurons. The new account of tacit knowledge focuses on the fact that in making the tacit explicit, a person is not, as many past accounts have supposed, reading off the content of some sort of shared and fixed tacit scheme of presuppositions, but rather responding to the needs of the Other for understanding.

Management Jul 20 2021 "This course and this book are about management and managers. Managers are one thing that all organizations--no matter the size, kind, or location--need. And there's no doubt that the world managers face has changed, is changing, and will continue to change. The dynamic nature of today's organizations means both rewards and challenges for the individuals who will be managing those organizations. Management is a dynamic subject, and a textbook on it should reflect those changes to help prepare you to manage under the current conditions. We've written this 14th edition of Management to provide you with the best possible understanding of what it means to be a manager confronting change and to best prepare you for that reality. But not every student aspires to a career in management. And even if you do, you may be five or ten years away from reaching a managerial position. So you might rightly feel that taking a course in management now may be getting ahead of the game. We hear you. In response to these concerns, we've added new material to this book that is important and relevant to everyone working in an organization--manager and non-manager alike. Our "Workplace Confidential" pages identify, analyze, and offer suggestions for dealing with the major challenges that surveys indicate frustrate employees the most. You should find these pages valuable for helping you survive and thrive in your workplace. Surprisingly, this topic has rarely been addressed in business programs. Inclusion in an introductory management course appeared to us to be a logical place to introduce these challenges and to provide guidance in handling them"--
