Cosmos & Culture May 06 2020 From GPO Bookstore's Website: Authors with diverse backgrounds in science, history, anthropology, and more, consider culture in the context of the cosmos. How does our knowledge of cosmic evolution affect terrestrial culture? Conversely, how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos? Are life, mind, and culture of fundamental significance to the grand story of the cosmos that has generated its own self-understanding through science, rational reasoning, and mathematics? Book includes bibliographical references and an index.

Sewing Success? Aug 21 2021 The end of the MFA was followed by rising apparel exports, falling prices, and a reallocation of production and employment between countries. There were also significant changes within countries. The first main finding of this report is that export and employment patterns after the MFA/ATC did not necessarily match predictions. While many predicted that production would shift to low-wage countries, this book shows that only 13 percent of variation in export changes post-MFA can be explained by the differences in wage levels. Second, changes in exports are usually, but not always, good indicators of what happens to wages and employment within countries. This is especially important for policy because it shows that simply using exports as a metric of 'success' in terms of helping the poor is not sufficient. Third, the Book identifies the specific ways that changes in the global apparel market affected earnings. The Book shows that wage premiums change in predictable ways: rising (in most cases) in countries that were proactive in adapting to the MFA phase-out and expanded their market shares, and falling in countries that failed to respond in a timely fashion to the changing environment. The Book shows that promoting 'upgrading' (defined as shifting to higher-value goods, shifting up the value chain, or 'modernizing' production techniques) seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor. Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind. Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial. Otherwise, less-skilled workers could miss out on opportunities to gain valuable work experience in manufacturing.

[Lloyd's Register of Shipping 1927 Steamers](#) Dec 13 2020 The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Uveitis Jul 08 2020 Written as a practical guide for the diagnosis and treatment of uveitis, this text provides uveitis specialists, practicing ophthalmologists, ophthalmology residents and fellows with the appropriate diagnostic testing and evidenced-based therapeutic options for managing patients afflicted with these conditions. Written and edited by leaders in the fields of ophthalmology, rheumatology, internal medicine, infectious disease, and oncology, each chapter addresses the latest advances in the field: from the advent of PCR technology, intraocular depot steroid implants, neoplastic and infectious diseases masquerading as uveitis, and the use of systemic immunomodulatory therapies (including biologic agents/humanized monoclonal antibodies).

Exploration of the Physiological Effects of Exercise in Cardiovascular Diseases Apr 16 2021 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Japanese and Chinese Immigrant Activists Dec 25 2021 Japanese and Chinese immigrants in the United States have traditionally been characterized as hard workers who are hesitant to involve themselves in labor disputes or radical activism. How then does one explain the labor and Communist organizations in the Asian immigrant communities that existed from coast to coast between 1919 and 1933? Their organizers and members have been, until now, largely absent from the history of the American Communist movement. In Japanese and Chinese Immigrant Activists, Josephine Fowler brings us the first in-depth account of Japanese and Chinese immigrant radicalism inside the United States and across the Pacific. Drawing on multilingual correspondence between left-wing and party members and other primary sources, such as records from branches of the Japanese Workers Association and the Chinese Nationalist Party, Fowler shows how pressures from the Comintern for various sub-groups of the party to unite as an “ American ” working class were met with resistance. The book also challenges longstanding stereotypes about the relationships among the Communist Party in the United States, the Comintern, and the Soviet Party.
