Breaking The Chain Jul 28 2019 All of my days are full and happy now, but before the 'now' that is my new life, there was another life, full of days that were very different. I never stop being thankful for this new life, for being able to leave all of the bad times behind me, where they belong. In the past...

Crimes of Globalization Sep 09 2020 This book addresses immensely consequential crimes in the world today that, to date, have been almost wholly neglected by students of crime and criminal justice: crimes of globalization. This term refers to the hugely harmful consequences of the policies and practices of international financial institutions – principally in the global South. A case is made for characterizing these policies and practices specifically as crime. Although there is now a substantial criminological literature on transnational crimes, crimes of states and state-corporate crimes, crimes of globalization intersect with, but are not synonymous with, these crimes. Identifying specific reasons why students of crime and criminal justice should have an interest in this topic, this text also identifies underlying assumptions, defines key terms, and situates crimes of globalization within the criminological enterprise. The authors also define crimes of globalization and review the literature to date on the topic; review the current forms of crimes of globalization; outline an integrated theory of crimes of globalization; and identify the challenges of controlling the international financial institutions that perpetrate crimes of globalization, including the role of an emerging Global Justice Movement. The authors of this book have published widely on white collar crime, crimes of states, state-corporate crime and related topics. This book will be essential reading for academics and students of crime and criminal justice who, the authors argue, need to attend to emerging forms of crime that arise specifically out of the conditions of globalization in our increasingly globalized, rapidly changing world.

Towards a Victimology of State Crime Nov 23 2021 State crime victimization often leaves a legacy of unrecognized victims that are ignored, forgotten, or negated the right to be labeled as such. Victims are often glossed over, as the focus is on a state's actions or inactions rather than the subsequent victimization and victims. *Towards a Victimology of State Crime* serves to highlight the forgotten victims, processes and cases of revictimization within a sociological, criminological framework. Contributors include expert scholars of state crime and victimology from North America, Europe, Africa, and Latin America to provide a well-rounded focus that can address and penetrate the issues of victims of state crime. This includes a diverse number of case study examples of victims of state crime and the systems of control that facilitate or impede addressing the needs of victims. Additionally, with the inclusion of a section on controls, this volume taps into an area that is often overlooked: the international level of social control in relation to a victimology of state criminality.

Queen of the Dawn Jun 30 2022 There was war in Egypt and Egypt was rent in two. At Memphis in the north, at Tanis, and in all the rich lands of the Delta where by many mouths the Nile flows down to the sea, a usurping race held power, that whose forefathers, generations before, had descended upon Egypt like a flood, destroyed its temples and deposed its gods, possessing themselves of the wealth of the land. At Thebes in the south the descendants of the ancient Pharaohs still ruled precariously, again and again attempting to drive out the fierce Semitic or Bedouin kings, named the Shepherds, whose banners flew from the walls of all the northern cities.

Dawn of D-Day Nov 04 2022 An "unforgettable . . . magnificently stirring" account of the Normandy Landings—stories of the men in the first wave of the Allied Invasion (The New York Times). June 6, 1944, is one of the most famous dates in world history, and, as David Howarth shows, a defining date in countless personal histories. In this intimate chronicle, the 7,000 vessels, 12,000 aircraft, and 750,000 men committed on D-Day are taken for granted. Instead, we see D-Day through the eyes of the men on the ground as Howarth weaves together the larger story of the beginning of the battle of Normandy with the stories of the beachhead itself. The scope of Howarth's vision—focusing on England and France, on sky, beach, and hedgerow, on divisions and squads—makes *Dawn of D-Day* a franker portrayal than any other turning points of the war on the Western Front, and the greatest amphibious operation in history.

Sensing Law Apr 28 2022 A rich collection of interdisciplinary essays, this book explores the question: what is to be found at the intersection of the sensorium and law's empire? Examining the problem of how legal rationalities try to grasp what can only be sensed through the body, these essays problematize the Cartesian framework that has long separated the mind from the body, reason from feeling and the human from the animal. In doing so, they consider how the sensorium can operate, variously, as a tool of power or as a means of countering the exercise of regulatory force. The senses, it is argued, operate as a vector for the implication of subjects in legal webs, but also as a powerful site of resistance to legal definition and determination. From the sensorium of animals to technologically mediated perception, the ways in which the law senses and the ways in which senses are brought before the law invite a questioning of the categories of liberal humanism. And, as this volume demonstrates, this questioning opens up the both interesting and important possibility of imagining other sensual subjectivities.

Dawn May 06 2020 A vital and eloquent portrait of modern Turkey drawn from the lives of its ordinary citizens Written in prison, the stories in *Dawn* offer an unfamiliar glimpse of Turkey and the Middle East. They capture the experiences of the people behind the headlines, the voices that so often go unheard. The young cleaning woman whose bus to work gets caught in a violent protest; the little girl fleeing across the Mediterranean from Syria with her mother; the illegal underage workers building jails; the victim of an 'honour killing'. Tragedy collides vividly with sharp humour and political satire as inmates

have their letters vetted by committee and a bus driver tricks a young idealist. The first fiction from the imprisoned progressive politician, former leader of the pro-Kurdish Peoples' Democratic Party and presidential candidate Selahattin Demirtas, this collection is essential reading. With warmth, wit and brutal insight, he illuminates everyday existence in Turkey and brings his characters to startling life.

Crimes of the Powerful May 30 2022 As politicians and the media perpetuate the stereotype of the "common criminal," crimes committed by the powerful remain for the most part invisible, or are reframed as a "bad decision" or a "rare mistake." This is a topic that remains marginalized within the field of criminology and criminal justice, yet crimes of the powerful cause more harm, perpetuate more inequalities, and result in more victimization than street crimes. *Crimes of the Powerful: An Introduction* is the first textbook to bring together and show the symbiotic relationships between the related fields of state crime, white-collar crime, corporate crime, financial crime, organized crime, and environmental crime. Dawn L. Rothe and David Kauzlarich introduce the many types of crimes, methodological issues associated with research, theoretical relevance, and issues surrounding regulations and social controls for crimes of the powerful. Themes covered include: media, culture, and the Hollywoodization of crimes of the powerful; theoretical understanding and the study of the crimes of the powerful; a typology of crimes of the powerful with examples and case studies; victims of the crimes of the powerful; the regulation and resistance of elite crime. An ideal introductory text for both undergraduate and postgraduate students taking modules on the crimes of the powerful, white-collar crime, state crime, and green criminology, this text includes chapter summaries, activities and discussion questions, and lists of additional resources including films, websites, and additional readings.

Credit and Consumer Society Jul 20 2021 The language of credit and debt is almost ubiquitous in daily life. In advanced modern societies, financial institutions and other organizations have become increasingly active in lending money to consumers, and consumers apparently more than willing to take advantage. This groundbreaking new book offers an analysis of this important phenomenon, arguing that we have entered an era in which credit and debt are sanctioned, delivered and collected through new cultural and economic mechanisms. Written in an accessible and straightforward style, the book takes a multi-disciplinary approach, examining consumer credit and debt in both societal and economic contexts. It explores key topics such as: the historical context of credit and debt current theories of a consumer-centred society the credit industry attempts at government regulation. *Credit and Consumer Society* establishes the wider analysis of consumer credit and debt as a discipline in its own right. It is important reading for students and researchers in business and management, finance, public policy and sociology, as well as for policy makers and consumer groups working directly in this field.

Gnosis and Hermeticism from Antiquity to Modern Times Jun 06 2020 This volume introduces what has sometimes been called "the third component of western culture". It traces the historical development of those religious traditions which have rejected a world view based on the primacy of pure rationality or doctrinal faith, emphasizing instead the importance of inner enlightenment or gnosis: a revelatory experience which was typically believed to entail an encounter with one's true self as well as with the ground of being, God. The contributors to this book demonstrate this perspective as fundamental to a variety of interconnected traditions. In Antiquity, one finds the gnostics and hermetics; in the Middle Ages several Christian sects. The medieval Cathars can, to a certain extent, be considered part of the same tradition. Starting with the Italian humanist Renaissance, hermetic philosophy became of central importance to a new religious synthesis that can be referred to as Western Esotericism. The development of this tradition is described from Renaissance hermeticists and practitioners of spiritual alchemy to the emergence of Rosicrucianism and Christian theosophy in the seventeenth century, and from post-

enlightenment aspects of Romanticism and occultism to the present-day New Age movement.

Mission-Based Policing Jan 14 2021 The research revolution in police work has uncovered a multitude of data, but this contemporary knowledge has done very little to change the way things are done in most police departments across the U.S., where the prevalent form of policing is based on the traditional model of district assignments and random preventive patrol. Mission-Based Policing unveils a new paradigm that transitions policing away from practices that while long-held, have inadequately dealt with serious crime. Drawn from the work of scholars on the cutting edge of police research, this volume argues for a radical shift in the way policing is approached. It provides concrete recommendations for the fundamental reorganization of the policing institution and presents a comprehensive planning regimen for urban problems that encompasses security, urban reinvestment, and public planning. Introducing an innovative, practical model for problem-oriented policing in high crime areas, the book uncovers: Contemporary problems in urban policing today Counter-insurgency strategy and how it might contribute to successful policing The five central principles of mission-based policing: focus, effectiveness, deployment, integrity, and mission's end The concept of logical lines of operation (LOOs): planning, security, establishing/restoring essential services, and rebuilding Strategies for police department reorganization guided by principles of mission-based policing Potential issues raised by the concept or applications of mission-based policing, including practicality, command problems, and perceived risks Outlining a specific methodology for police redeployment, the book highlights the importance of hot spot presence, command integrity, and fundamental organizational change that has as its end goal long term reduction in crime statistics through effective crime prevention practices.

Smart Urbanism Sep 21 2021 Smart Urbanism (SU) – the rebuilding of cities through the integration of digital technologies with buildings, neighbourhoods, networked infrastructures and people – is being represented as a unique emerging 'solution' to the majority of problems faced by cities today. SU discourses, enacted by technology companies, national governments and supranational agencies alike, claim a supremacy of urban digital technologies for managing and controlling infrastructures, achieving greater effectiveness in managing service demand and reducing carbon emissions, developing greater social interaction and community networks, providing new services around health and social care etc. Smart urbanism is being represented as the response to almost every facet of the contemporary urban question. This book explores this common conception of the problematic of smart urbanism and critically address what new capabilities are being created by whom and with what exclusions; how these are being developed - and contested; where is this happening both within and between cities; and, with what sorts of social and material consequences. The aim of the book is to identify and convene a currently fragmented and disconnected group of researchers, commentators, developers and users from both within and outside the mainstream SU discourse, including several of those that adopt a more critical perspective, to assess 'what' problems of the city smartness can address The volume provides the first internationally comparative assessment of SU in cities of the global north and south, critically evaluates whether current visions of SU are able to achieve their potential; and then identifies alternative trajectories for SU that hold radical promise for reshaping cities.
