Material Agency Jun 01 2020
Thus far an 'agent' in the social sciences has always meant someone whose actions bring about change. In this volume, the editors challenge this position and examine the possibility that agency is not a solely human property. Instead, this collection of archaeologists, anthropologists, sociologists and other social scientists explores the symbiotic relationships between humans and material entities (a key opening a door, a speed bump raising a car) as they engage with one another.

[Intrinsic Motivation](#) Jan 20 2022 As I begin to write this Preface, I feel a rush of excitement. I have now finished the book; my gestalt is coming into completion. Throughout the months that I have been writing this, I have, indeed, been intrinsically motivated. Now that it is finished I feel quite competent and self-determining (see Chapter 2).

A Human Perspective 7th Edition Nester Pdf File Free

Whether or not those who read the book will perceive me that way is also a concern of mine (an extrinsic one), but it is a wholly separate issue from the intrinsic rewards I have been experiencing. This book presents a theoretical perspective. It reviews an enormous amount of research which establishes unequivocally that intrinsic motivation exists. Also considered herein are various approaches to the conceptualizing of intrinsic motivation. The book concentrates on the approach which has developed out of the work of Robert White (1959), namely, that intrinsically motivated behaviors are ones which a person engages in so that he may feel competent and self-determining in relation to his environment. The book then considers the development of intrinsic motivation, how behaviors are motivated intrinsically, how they relate to and how intrinsic motivation is extrinsically motivated behaviors, affected by extrinsic rewards and controls.

Summarizing the classical and recent research in successful human adaptation, adjustment and well-being of the soul and body he shows the many faces of individual human happiness. Moreover, the book opens the perspective into the directions of social, cultural and biological evolution. What I like most in the book, is its usefulness. academics and practitioners", Howie Giles, Distinguished Professor Communication, University of California, Santa Barbara, USA & Honorary Professor of Psychology, University of Queensland, Australia "This book by Professor Larsen is very enjoyable reading and covers the many challenges humans face across the lifespan. The focus is on positive psychology as supportive solutions are offered for the many challenges of living. This is also a relatively rare book that evaluates adaptation from a socio-cultural perspective since most books today emphasize cognitive aspects of coping and development. I especially appreciated how Professor Larsen weaved his salient knowledge of cross-cultural psychology into this important work on human adaptation. In the book the author discusses the issue of adaptation in its varying aspects of human life and through the prism of cultural influence on personality and behavior.", Askar Jumageldinov, Ph.D.

What strikes the reader is the very personal narrative that illustrates the many points of struggling with the challenges of being human. The book combines the best of classical literature along with very current and meaningful research. The whole human journey is evaluated from identity and finding meaning, through optimizing health in midlife to facing the final existential questions related to both death and longevity. Genesis, Science, and the Beginning Oct 05 2020

Christian apologist Ben Smith believes that the creation account in Genesis 1 can be read literally and historically as a real week of seven normal days without contradicting modern astronomy and geology regarding the age of the universe and Earth. Many Christians are divided over how to reconcile Genesis with modern science, and this book evaluates all of the major options, ultimately concluding that the Bible allows for an old universe and Earth in a way that is also scientifically accurate. A former Young Earth creationist, Smith now believes that the age of creation is not specified.

Ethical Values and the Integrity of the Climate

Change Regime Jul 02 2020

This book investigates the ethical values that inform the global carbon integrity system, and reflects on alternative norms that could or should do so. The global carbon integrity system comprises the emerging international architecture being built to respond to the climate change. This architecture can be understood as an 'integrity system'- an inter-related set of institutions, governance arrangements, regulations and practices that

performs its role faithfully and effectively. This volume investigates the ways ethical values impact on where and how the integrity system works, where it fails, and how it can be improved. With a wide array of perspectives across many disciplines, including ethicists, philosophers, lawyers, governance experts and political theorists, the chapters seek to explore the positive values driving the global climate change processes, to offer an understanding of the motivations justifying the creation of the regime and the way that social norms impact upon the operation of the integrity system. The collection focuses on the nexus between ideal ethics and real-world implementation through institutions and laws. The book will be of interest to policy makers, climate change experts, carbon taxation regulators, academics, legal practitioners and researchers.

Queer Theory and Communication: From Disciplining Queers to Queering the Discipline(s) is a conversation starter, sparking smart talk about sexuality in the communication discipline and beyond. Edited by members of "The San Francisco Radical Trio," the book integrates current queer theory, research, and interventions to create a critical lens with which to view the damaging effects of heteronormativity on personal, social, and cultural levels, and to see the possibilities for change through social and cultural transformation. Queer Theory and Communication represents a commitment to positive social change by imagining different social realities and sharing ideas, passions, and lived experiences.
