Small Business Planning Sep 02 2022 How many times have you heard or read that you must write a Business Plan for your new business? This is a myth, because a formal Business Plan as discussed in all forms of the media is rarely required of any small business. There is a vast difference between business planning and writing a Business Plan, and Foster's book not only explains that difference, but shows the reader why ongoing planning is necessary, and how to best approach the entire planning process. With this book you will be able to: Understand the vital importance of business planning. Learn why you should NOT write a "Business Plan." Demystify how best to share your planning. Learn about the best approach to investors. Gain an understanding of "planning" vs. a "Business Plan." All of this is from the entrepreneur's point of view-not from an investor's, business guru's, or academic's lofty views. This book is one of Foster's Small Business Primer Series, where a "Primer" is defined as any book of elementary principles.

Leadership in Planning Aug 01 2022 Being an effective city planner means being an effective leader. You need to be prepared to convince people that good planning matters. Often a well-written, thoughtful and inclusive plan doesn't result in meaningful action, because planners don't show leadership skills. At some point, some city planners become cynical and worn down, wondering why no one listens to them but not doing the self-reflection about how that could change. Leadership in Planning explains how to get support for planning initiatives so they don't just fade from memory. It will guide city planners to think less about organizational charts and more about: - being a respected voice within your organization, both with staff and with your boss; - being a good communicator with people outside your organization; and - being able to understand how and when to push for good planning ideas to turn them into actions. Along the way, case studies bring these concepts to the real world of municipal planning. In addition, past planning figures' actions are explored to see what they did right and what mistakes they made.
