[Case Studies in Nursing Theory](#) Jul 28 2019

[Case Studies in Breastfeeding](#) Feb 12 2021 With a consultative framework, this text presents illustrative case studies to increase the practitioner's knowledge about managing complex breastfeeding cases.

[Case Studies in Community Health Nursing Practice](#) Dec 13 2020

Community health nurses are confronted with unique problems throughout their career. Students learning from CASE STUDIES IN COMMUNITY HEALTH NURSING PRACTICE are prepared for these challenges. This unique text and workbook teaches students to think critically and apply knowledge to solve problems. As students explore each case in detail, they use problem-based learning techniques to apply their knowledge, ask the right questions, gather supporting data, sort through options, and determine optimal solutions with rationales and possible consequences. The problem-based learning approach in this text will help students develop creative and critical thinking skills and demonstrate problem-solving abilities. * Includes 18 case studies representing various community health issues. Each case teaches students to apply what they already know and gather new information to determine solutions to real world and complex problems. * Provides questions to guide case analysis that take the student through the steps of the problem-solving process. * Employs a workbook-type layout in a lay-flat binding that allows ample room to take notes and write solutions to the cases. * Supports individual, small group, or classroom use with its format and case-study approach.

[Clinical Case Studies for the Family Nurse Practitioner](#) Mar 28 2022

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

Psychiatric Case Studies for Advanced Practice Oct 30 2019

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. "This book will help students and clinicians gain a complete understanding of psychiatric assessment, become familiar with the symptoms that make up the major DSM-5 diagnoses, and formulate treatment planning by using actual clinical situations. It transforms difficult clinical concepts into clear examples, illustrating the process of assessment, diagnosis, and treatment planning." --Candice Knight, PhD, EdD, APN, PMHNP-BC Get much-needed exposure to real-world clinical scenarios and psychiatric evaluations, with this invaluable guide to positive, effective psychiatric advance practice nursing care. For an expert guide to providing patient-centered, evidence-based psychiatric care, keep Psychiatric Case Studies for Advanced Practice by your side. Practical and easy-to-follow, these more than 50 case scenarios clearly display the complaints, diagnoses, and treatments of the most common psychiatric disorders, supporting the critical decision-making skills of nurses practicing in a broad range of settings. Psychiatric, family, emergency, and general practice nurse practitioners of all experience levels will find this an invaluable aid for creating an informed, holistic practice. Follow the real-life cases and

expert analysis of psychiatric patients of a wide variety of ages, backgrounds, and conditions . . . Real-world child, adolescent, adult, and geriatric inpatient and outpatient psychiatric case studies that emphasize problem-based learning and an evidence-based practice Current diagnostic content from the Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), that includes DSM-5's newer diagnoses--gender dysphoria, binge eating disorder, and autism spectrum, plus current treatments for alcohol and opiate addiction Sample routine screening tools that offer convenient checklists and handouts to support patient treatment Content presented in a simple format--organized by age and indexed by diagnostic category for quick reference Each case presented in a standard format: chief complaint, history, mental status, diagnosis, differential diagnosis, treatment plan, and rationale for treatment prescribed--with questions at the end that guide you to create a diagnosis using the DSM-5 Cases addressing a wide range of disorders and supporting all experience levels in a variety of treatment settings--counseling centers, correctional facilities, homeless shelters, inpatient psychiatric units, and hospital consultation and liaison services Treatments and rationales that represent current, evidence-based research--treatment sections divided into psychopharmacology, diagnostic tests, referral, psychotherapy, and psychoeducation Supplemental teaching tool for graduate psychiatric nurse practitioner/APN programs About the Authors Kathleen M. Prendergast, MSN, RN, APN, PMHNP-BC, is a former Instructor in Clinical Nursing, Columbia University School of Nursing, New York; a Psychiatric Consultant at Seton Hall University Counseling and Psychological Services; and a Psychiatric Nurse Practitioner at Caldwell University Counseling Center in Caldwell, New Jersey. Kasey Jackman, PhD, RN, PMHNP-BC, is Postdoctoral Research Fellow in Nursing at Columbia University School of Nursing in New York City, and has taught courses in the psychiatric-mental health nurse practitioner program. Dr. Jackman is a psychiatric nurse practitioner at a psychiatric hospital and has previously worked in out-patient, partial hospital, and private practices [Maternity Nursing Case Studies](#) Jun 26 2019

[Case Studies in Primary Care - E-Book](#) Feb 01 2020

Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback. Real-world scenarios offer the opportunity to analyze clinical situations likely to be encountered in today's primary care settings, providing practice in clinical reasoning skills. Day in the Office format presents cases hour by hour, in the way a typical clinical day might unfold. Emphasis on problem-based learning helps you to think critically and analyze clinical situations — such as ear infections, diarrhea, and coughing and fever — in order to provide appropriate primary care. Six NEW cases are included (for a total of 50), with three focusing on older clients with more complex health challenges, one addressing unplanned pregnancy, and two addressing practice management issues. NEW! Emphasis on follow-up care addresses patients coming to the primary care setting from retail clinics, rehabilitation settings, or acute-care settings, and underscores the

importance of interprofessional collaboration. NEW! Enhanced patient diversity includes cases for all age groups, and reflects a more contemporary appreciation of cultural diversity and gender/gender identity. NEW! Updates to all cases ensure that case studies and feedback are consistent with the latest research evidence, clinical practice guidelines, and national and international treatment standards. NEW! Online answer submission allows you to write Assessment and Plan answers in the printed book, then submit answers online for grading and feedback. NEW! Grading rubrics are provided on the companion Evolve website to help you develop your answers. NEW! Introduction explains how to get the most out of the book.

Case Studies in Nursing Ethics Aug 21 2021 Case Studies in Nursing Ethics presents basic ethical principles and specific guidance for applying these principles in nursing practice through analysis of over 150 actual ethical case study conflicts that have occurred in the practice of nursing. Each case study allows readers to develop their own approaches to the resolution of ethical conflict and to reflect on how the traditions of ethical thought and professional guidelines apply to the situation.

Orthopedic and Sports Medicine Case Studies for Advanced Practice Nurses Aug 09 2020 This one-of-a-kind book delivers challenging, clinically relevant case-based learning tools regarding orthopedics and sports medicine for advanced practicenursing students and practitioners. Written by nurse practitioner/educators, it fills a gap in information and guidelines for treatment of this population in primary and acute care environments. Cases across the lifespan cover areas of orthopedics and sports medicine most likely to be encountered. Cases are described in depth to foster a comprehensive learning experience and to facilitate inductive and deductive critical reasoning. Each follows a template that encompasses the context for the case, chief patient complaints and history along with physical assessment findings, diagnostic evaluation, interventions, evaluation of care and outcome, and references for additional information. An accompanying teaching guide aids instructors in accelerating critical thinking. Key Features: Fills an identified gap in available literature Reflects both primary care and acute care across the lifespan Includes referral red flags and scope of practice for each case Formats cases for both inductive and deductive reasoning Offers focused instructor manual to facilitate meaningful learning

Case Studies in Nursing Ethics Sep 21 2021 Rev. ed. of: Case studies in nursing ethics / Robert M. Veach, Sara T. Fry. 1987.

Case Studies in Primary Care Dec 25 2021 Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback.

Case Studies in Gerontological Nursing for the Advanced Practice Nurse Apr 04 2020 As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, Case Studies in Gerontological Nursing for the Advanced Practice Nurse presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized into six units covering cases related to ageism, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, Case Studies in Gerontological Nursing for the Advanced Practice Nurse is a key resource for all those dedicated to improving care for older adults.

Case Studies in Global Health Policy Nursing Jun 30 2022 "Dorman and De Chesnay...offer a wealth of valuable information students and other healthcare providers would normally not receive until they were in the trenches of their global experience...[They] deliver...nuances of ideology about care and disease from a number of different countries, what global health policy entails and means to healthcare providers traveling the world, along with case studies from a number of guides/experienced global experts." -Lorna Kendrick, PhD, APRN, PMHCNS-BC Professor

and Director, School of Nursing, California State University San Marcos From the Foreword Case Studies in Global Health Policy Nursing unpacks key global health issues and analyzes the surrounding health care policies and their impact through case studies. Designed specifically for graduate nursing students, this text explores the implications of global initiatives designed to eradicate disease and promote physical and mental health. As globalization takes a front row seat in the digital age and political dynamics shift more rapidly than ever, possibilities and opportunities for health care have arisen beyond the hospital-based focus, especially for diseases and trends that cross continental divides. Every case study contains a multidisciplinary perspective, featuring contributions by expert nurses, public health professionals, and policy researchers. Presented in a consistent format for ease of use, each case study includes an overview, background, relevant research, and in-depth information on its significance as a critical global issue. This text covers critical, current topics such as health care for transgender individuals, refugees, and patients on the autism spectrum, as well as ongoing problems like access to clean water, HIV/AIDS, and human trafficking. End-of-chapter exercises reinforce content and supplementary instructor materials are available. Key Features: Delivers topical, in-depth examination of key global issues for graduate-level nursing students Provides consistent format for each case study for ease of use Presents an interdisciplinary approach with content from expert nurses, public health professionals, and policy researchers

Nursing Case Studies on Improving Health-Related Quality of Life in Older Adults Jun 06 2020 This globally focused resource integrates sound research evidence, real-life case scenarios, and effective, practical strategies to address a key health care initiative of the 21st century--optimal quality of life for older adults. Distinguished by its broad and global outlook, the book includes contributions from an international cadre of widely published scholars and is designed for easy integration into traditional nursing education curricula. The book explores the experiences of older adults at home, and in acute and primary care, assisted living, nursing home and hospice environments and examines their needs for dealing with multiple, differentiated health, spiritual, and emotional considerations.

Case Studies in Maternity and Pediatric Nursing Jan 14 2021 Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity and Pediatric Nursing provides 80 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

Fundamentals of Nursing Case Studies May 30 2022 Annotation. Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. Clinical Cases: Fundamentals of Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision.

Nursing Research Using Case Studies Oct 03 2022 Once considered to be a lesser pedagogical method, the case study is indeed a powerful, in-depth tool with which to examine evidence-based practice around patient care, family dynamics, professional roles, and organizational systems. Here is a unique how-to guide to conducting research using case studies. Focusing on leading and newer methodologies, the text describes the philosophical basis and state of the art for using this qualitative method. The peer-reviewed designs (including interviews, physiological measurements, psychological tests, and analysis of patients diaries and journals) are accompanied by an in-depth research plan, a discussion of appropriate methods, and ethical considerations. The text provides clear directives bolstered by nursing examples--on how to solve practical problems a researcher may encounter. Examples from international scholars who have published research using case studies are included along with coaching designed to support the new researcher in making decisions and facing challenges. Also included are book and chapter

objectives, competencies, review questions, critical thinking exercises, and web links to additional information. The text is part of a series of eight concise volumes addressing a variety of methods for conducting qualitative research. Conceived and edited by a noted expert in qualitative research, the book is designed for both novice and practicing researchers seeking to develop or expand their competency, health institution research divisions, in-service educators and students, and graduate nursing educators and students. Key Features: Explains clearly and concisely how to conduct research using case studies Reviews the philosophical basis for using case studies Focuses on solving practical problems related to conducting research Offers rich nursing exemplars and coaching from international health/mental health contributors Includes objectives, critical thinking exercises, competencies, resources, and review material for each book. "

Clinical Cases: Fundamentals of nursing case studies Jul 20 2021

Perfect for: • Bachelor of Nursing Students • Diploma of Nursing Students Apply theory to practice with the Clinical Cases textbook series! Get to know the fundamentals of nursing with this nursing textbook, which offers nursing students insightful case studies based on real-life situations that you are likely to encounter in a practical environment. Benefit from Scully and Wilson's Clinical Cases: Fundamentals of Nursing Case Studies nursing textbook, which has been written to assist with exam preparation and revision thanks to its collection of multiple choice questions and answers. Clinical Cases: Fundamentals of Nursing Case Studies is clearly structured to maximise your learning. Each case study begins with an introduction of the presenting condition and its symptoms. As the scenario develops, information concerning the patient's condition, tests and medications are provided. At the close of each case study, the patient outcomes are explored in addition to a discussion of the most significant considerations of the scenario. It is strongly recommended that nursing students enrolled in the Diploma and Bachelor Nursing courses use Fundamentals of Nursing Case Studies alongside Potter and Perry's Fundamentals of Nursing, 4th Edition by Jackie Crisp, Catherine Taylor and Geraldine Rebeiro. This enables you to maximise your learning and develop a very strong understanding of core nursing concepts. Other titles in this series: • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. • Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-fundamentals/id620500072?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering pertinent nursing topics, including Vital Signs, Skin Integrity, Medication Therapy and Pain Management. • Multiple choice questions to test your knowledge throughout the textbook. • Explanations provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Clinical Cases: Medical-surgical nursing case studies Sep 02 2022 Perfect for: • Bachelor of Nursing Students. • Diploma of Nursing students. Apply theory to practice with the Clinical Cases textbook series! Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is part of the Clinical Cases textbook series, which offers nursing students a collection of scenarios that are common in a variety of practical settings. Some of the topics covered in Medical-Surgical Nursing Case Studies include: Cardiovascular, Gastrointestinal, Musculoskeletal and Respiratory in relation to medical-surgical nursing. The Medical-Surgical Nursing Case Studies textbook is complete with multiple choice questions throughout the chapters so you can revise and test your knowledge as you progress through the text. Best of all, use Bothe's nursing textbook alongside Lewis' Medical-Surgical Nursing, 3rd Edition by Diane Brown and Helen Edwards to really excel at your Diploma and Bachelor of Nursing courses. Benefit from the logical structure of this nursing textbook. Medical-Surgical Nursing Case Studies features a clear introduction that explores an existing condition and outlines its symptoms. Further details are then provided to help you form a more complete context, including: patient's conditions, tests, medications and other considerations. Each case study within this nursing textbook provides a thorough conclusion that examines patient outcomes and the case's key points. If you enjoy learning from real life cases, the Clinical Cases textbook series is the perfect educational suite to support your nursing education. Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision. Browse other titles in this series to enhance your knowledge of core nursing skills and theories. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson • Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov Other Formats This book is also available as an App via the Apple App Store

(<https://itunes.apple.com/au/app/clinical-cases-medical-surgical/id666477607?mt=8>) • Easy-to-understand, logical layout. • 22 case studies covering the body systems. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.
Case Studies in Gerontological Nursing for the Advanced Practice Nurse Jun 18 2021 As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, Case Studies in Gerontological Nursing for the Advanced Practice Nurse presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized into six units covering cases related to ageism, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, Case Studies in Gerontological Nursing for the Advanced Practice Nurse is a key resource for all those dedicated to improving care for older adults.

Nursing Care Case Studies Nov 04 2022 Annotation. Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. Clinical Cases: Nursing Care Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision.

Case Studies in Emergency Nursing Jan 02 2020

Case Studies in Critical Care Nursing Mar 16 2021 Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

Clinical Case Studies in Home Health Care Oct 11 2020 Home health care is an important aspect of community health and a growing area of

healthcare services. Clinical Case Studies in Home Health Care uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs.

[Nursing Health Assessment](#) Jul 08 2020

Unfolding Health Assessment Case Studies for the Student Nurse

Nov 23 2021 Mastering critical thinking skills can be challenging for student nurses. Case studies help but can be flat and predictable.

Instead, this book uses unfolding case studies that provide new information as the reader goes along, teaching critical skills and the knowledge to apply what is learned in nursing school to real-life on-the-job situations.

[Nursing Case Studies](#) Aug 01 2022 Med-Surg Success in the Palm of Your Hand Master the art of critical thinking and clinical reasoning with this book designed to help you develop and utilize the nursing process and prioritization in real to life case studies surrounding the most commonly seen and tested patient diagnosis. After Reading This Book You Will Improve your clinical reasoning skills Develop confidence in answering difficult Med-Surg questions Become familiar with the most common patient disorders Learn how to answer hard NCLEX(r) style questions Improve prioritization skills Master the nursing process in clinical settings Case Study Layout Client case presentation Questions regarding client background Case progression Additional critical thinking questions Rational Each case study includes 8-15 questions that require you to think beyond the most simple rational. Case studies also include highly detailed and in depth rationales (over 500 words) to insure that you are learning as much as possible about the disease process. Disease Processes Covered in this Book Congestive Heart Failure Ischemic Stroke Pneumothorax Hypertensive Crisis End Stage Renal Disease Cirrhosis Acute MI (STEMI) Hypothyroidism End Stage Renal Disease COPD Seizure Disorder Sepsis CABG Pancreatitis Respiratory Acidosis The selection process for the 15 diseases covered in this book included drawing on my experience as a CCRN in a large metropolitan ICU, speaking with other nurses in various specialties, referring to a mountain of NCLEX(r) prep books, reviewing CCRN study materials, speaking with physicians, and reviewing NIH (National Institute of Health) data regarding the most commonly presenting conditions in hospitals. Scroll up to buy!

Case Studies in Psychiatric Nursing Sep 29 2019 This unique resource contains 40 psychiatric nursing case studies and questions, based on real-life client situations. Organized by difficulty level, the cases in this book and questions about each case history help to keep the focus on the client and the nursing process. Questions and answers are designed to address the need for empathy, attitude adjustment, open-mindedness, trust building, maintaining confidentiality, limit setting, delegating appropriately, collaborating with other professionals and making decisions. Each scenario is practical and realistic. Critical problems arising in psychiatric nursing are addressed throughout the book, including those both common and rare. The user has an opportunity to decide appropriate nursing action if encountering each of the problems presented, to reflect on whether the nursing staff in the scenario made the best decision, and to provide a rationale for his or her answer. The user can then consult the suggested answer/rationale for remediation, and find what a reasonable and prudent psychiatric nurse would do in that particular situation. Legal and ethical concerns are addressed throughout the cases, which simulate concerns arising in similar real-life situations that nurses find while practicing. Clients with psychiatric problems are encountered in a variety of settings - such as medical or community- so nurses not specializing in psychiatric nursing are represented in some of the cases.

[THINK Like a Nurse!](#) Aug 28 2019 About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of

building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include: Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!

Nursing Research Using Case Studies Apr 28 2022 Once considered to be a lesser pedagogical method, the case study is indeed a powerful, in-depth tool with which to examine evidence-based practice around patient care, family dynamics, professional roles, and organizational systems. Here is a unique "how-to" guide to conducting research using case studies. Focusing on leading and newer methodologies, the text describes the philosophical basis and state of the art for using this qualitative method. The peer-reviewed designs (including interviews, physiological measurements, psychological tests, and analysis of patients' diaries and journals) are accompanied by an in-depth research plan, a discussion of appropriate methods, and ethical considerations. The text provides clear directives—bolstered by nursing examples—on how to solve practical problems a researcher may encounter. Examples from international scholars who have published research using case studies are included along with coaching designed to support the new researcher in making decisions and facing challenges. Also included are book and chapter objectives, competencies, review questions, critical thinking exercises, and web links to additional information. The text is part of a series of eight concise volumes addressing a variety of methods for conducting qualitative research. Conceived and edited by a noted expert in qualitative research, the book is designed for both novice and practicing researchers seeking to develop or expand their competency, health institution research divisions, in-service educators and students, and graduate nursing educators and students. Key Features: Explains clearly and concisely how to conduct research using case studies Reviews the philosophical basis for using case studies Focuses on solving practical problems related to conducting research Offers rich nursing exemplars and coaching from international health/mental health contributors Includes objectives, critical thinking exercises, competencies, resources, and review material for each book.

Nursing and Globalization in the Americas Apr 16 2021 Nursing is vital to millions of people worldwide. This book details the ebb and flow of its fascinating history and politics through case studies from Brazil, Argentina, Chile, Colombia, Mexico, Canada, and the United States. Authors from across the Americas share findings and explore new thinking about Western hemisphere-specific issues that affect nursing and health care. Using economic globalization as an overarching framework, these cross-national case studies show the strengths and contradictions in nursing, elucidating common themes and examining successes. The partnership of authors shapes a collective understanding of nursing in the Americas and forms a basis for enduring hemisphere-wide academic exchange. Thus, the book offers a new platform for understanding the struggles and obstacles of nursing in a climate of globalization, as well as for understanding nursing's richness and accomplishments. Because politics, economics, health, and nursing are inextricably linked, this volume critically explores the intersections among political economies and nursing and health care systems. The historical and contextual background allows readers to make sense of how and why nursing in the Americas has taken on its present form.

Clinical Cases: Nursing care case studies - InKling Feb 24 2022 Perfect for: • Diploma of Nursing Students. Apply theory to practice with the Clinical Cases textbook series! Clinical Cases: Nursing Care Studies is the perfect textbook for nursing students completing their Diploma. This nursing book offers a variety of case studies based on common real-life examples that you are likely to encounter in practice. Written by Margaret Webb and Ellie Kirov, Nursing Care Studies focusses on key nursing care topics, including: Vital Signs, Skin Integrity and Wound Care, Community-based Care, General Health Assessment, Medications

and Palliative Care. Benefit from the logical structure of this nursing book, where each case study begins with an introduction of the presenting condition and associated symptoms. As the scenario develops, more information is provided, such as the patient's condition, medications, tests and other important factors. Best of all, the conclusion of each case study emphasises patient outcomes and emphasises key points, providing you a great summary to reflect on. Make the most of Clinical Cases: Nursing Care Studies by using it in conjunction with Tabbner's Nursing Care: Theory and Practice, 6th Edition by Gabby Koutoukidis, Kate Stainton and Jodie Hughson as you progress through your Diploma of Nursing. Used together, these nursing textbooks provide a strong foundation for your knowledge of important themes and issues in nursing care. Support your nursing education by purchasing the other great titles available in the Clinical Cases textbook series. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson. • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-nursing-care/id659030265?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering key topics in nursing care. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Case Studies in Palliative and End-of-Life Care Mar 04 2020 Case Studies in Palliative and End-of-Life Care uses a case-based approach to provide students and practitioners with an important learning tool to improve critical thinking skills and encourage discussion toward improving experiences for patients and their families. The book is organized into three sections covering subjects related to communication, symptom management, and family care. Each case is presented in a consistent, logical format for ease of use, highlighting key evidence-based concepts including the case history, care setting, diagnosis and prognosis, assessment, treatment considerations, and family support. A key reference, Case Studies in Palliative and End-of-Life Care is an invaluable resource for clinicians who provide palliative care to patients with life-limiting illnesses and those at the end of life along with their families.

Case Studies in Nursing Fundamentals Sep 09 2020 Connect nursing theory to clinical practice with 46 in-depth, real-world case studies. For each case study, answer questions that call on you to recall facts, understand nursing concepts, apply critical thinking, and sharpen your clinical reasoning skills in common clinical situations.

Cross-cultural Perspectives in Medical Ethics May 18 2021 Cross-Cultural Perspectives in Medical Ethics, Second Edition, is an anthology of the latest and best readings on the medical ethics of as many of the major religious, philosophical, and medical traditions that are available today.

Mental Health Nursing at a Glance Dec 01 2019 Everything you need to know about Mental Health Nursing...at a Glance! From the publishers of the market-leading at a Glance series comes the perfect companion for study and revision for pre-registration mental health nursing students. This brand new nursing title is the perfect accompaniment for pre-registration nursing courses, and is the revision aid that you have been waiting for! Divided into three sections, this book first explores the essential clinical skills needed by nurses, using the NMC Essential Skills Clusters as an organising framework. The second section goes on to look at common disorders and approaches. The third section then discusses the leadership and organisational skills required by nurses, again derived from the NMC standards. Key features: Breaks down complex aspects of mental health care in an accessible and un-intimidating way The perfect revision and consolidation textbook Linked closely with the NMC standards for pre-registration nursing education, and the essential skills

clusters framework Explores a broad range of mental health disorders, from care of children right up to care of older people Looks at mental health nursing in all settings, including acute, forensic and community Highly visual colour presentation Includes boxes, summary boxes, reflective opportunities and case studies to improve the learning experience

Case Studies in Community Health Nov 11 2020 Case Studies in Public and Community Health presents 14 classroom-tested case study scenarios, including background information and discussion questions. The overall purpose of the book is to help students understand that public health practice occurs in a social context, and is subject to all the complexities of a social environment. The book can be used as a textbook supplement to Jo Fairbanks William H Wiese's, The Public Health Primer (SAGE, 1997); it can also be used on its own, or as a supplement to other textbooks in the field.

Case Studies in Critical Care Nursing May 06 2020 Containing detailed and up-to-date case studies on critical care conditions with accompanying questions and answers for applied learning of the practice of critical care nursing, this resource allows the reader to hone vital skills that are necessary in a critical care environment.

Gerontology Nursing Case Studies, Second Edition Oct 23 2021 Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars —Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice." —The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to "gray area" situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises
