*Planetary Praxis & Pedagogy* Jan 14 2021 “Good books make important points because their authors have something worthwhile to say. This book is more than a good book because its authors not only make important points but they do so in ways that exemplify the transdisciplinarity the authors write about. In eight interesting and insightful chapters the book connects pedagogy, marketing, development, immanence, race, resilience, technology, and the commons in ways that show the necessity and importance of transdisciplinary thinking. This is a book for those who seek deeper and more creative connections to a sustainable way of life, a way of life that opens up imaginative acts of hope.” – John Novak, Professor in the Department of Graduate and Undergraduate Studies in Education at Brock University; his research interests include: Philosophy of education, Invitational theory and practice, Educational leadership, and Social-cultural contexts of education

**A Little Manual for Knowing** Aug 21 2021 In refreshing challenge to the common presumption that knowing involves amassing information, this book offers an eight-step approach that begins with love and pledge and ends with communion and shalom. Everyday adventures of knowing turn on a moment of insight that transforms and connects knower and known. No matter the field--science or art, business or theology, counseling or athletics--this little manual offers a how-to for knowing ventures. It offers concrete guidance to individuals or teams, students or professionals, along with plenty of exercises to spark the process of discovery, design, artistry, or mission.

**Sustainable Farmland Management** Apr 04 2020 Examining the relationship between sustainability and farmland management in differing temporal, spatial and production contexts, this book considers farmland multifunctionality, systems and systemic thinking, debate over information and knowledge, and ethical aspects. It suggests productive ways of proceeding to enhance integrated thinking on the subject, and will be essential reading for researchers and students in agriculture, rural studies, environmental management, geography, sociology, ecology and conservation.

**Closing the Knowledge-Implementation Gap in Conservation Science** Jul 20 2021 This book aims to synthesize the state of the art on biodiversity knowledge exchange practices to understand where and how improvements can be made to close the knowledge-implementation gap in conservation science and advance this interdisciplinary topic. Bringing together the most prominent scholars and practitioners in the field, the book looks into the various sources used to produce biodiversity knowledge - from natural and social sciences to Traditional Ecological Knowledge and Citizen Science - as well as knowledge mobilization approaches to highlight the key ingredients that render successful conservation action at a global scale. By doing so, the book identified major current challenges and opportunities in the field, for different sectors that generate, mobilize, and use biodiversity knowledge (like academia, boundary organizations, practitioners, and policy-makers), to further develop cross-sectorial knowledge mobilization strategies and enhance evidence-informed decision-making processes globally.

**The Knitter's Book of Knowledge** Sep 09 2020 Debbie Bliss is one of the world's most respected knitwear designers, authors, and teachers--and The Knitter's Book of Knowledge is the distillation of her decades of experience into a single, indispensable reference. With information on everything from needles and yarns to tensioning and casting on, from basic stitches to buttonholes and beading, from cabling and entrelac to finishing embellishments, it's the ultimate guide for beginners and experienced knitters alike.

*Cybersecurity Capabilities in Developing Nations and Its Impact on Global Security* Aug 28 2019 Developing nations have seen many technological advances in the last decade. Although beneficial and progressive, they can lead to unsafe mobile devices, system networks, and internet of things (IoT) devices, causing security vulnerabilities that can have ripple effects throughout society. While researchers attempt to find solutions, improper implementation and negative uses of technology continue to create new security threats to users. *Cybersecurity Capabilities in Developing Nations and Its Impact on Global Security* brings together research-based chapters and case studies on systems security techniques and current methods to identify and overcome technological vulnerabilities, emphasizing security issues in developing nations. Focusing on topics such as data privacy and security issues, this book is an essential reference source for researchers, university academics, computing professionals, and upper-level students in developing countries interested in the techniques, laws, and training initiatives currently being implemented and adapted for secure computing.

**Evidence Discovery and Assessment in Social Work Practice** Mar 04 2020 Social workers play a crucial part in contemporary society by ensuring that individuals are able to address, overcome, and manage obstacles in their daily lives. In an effort to better serve their clients, many practitioners have turned to evidence-based practice. *Evidence Discovery and Assessment in Social Work Practice* provides practitioners with the tools necessary to locate, analyze, and apply the latest empirical research findings in the field to their individual practice. This premier reference work provides insights and support to professionals and researchers working in the fields of social work, counseling, psychotherapy, case management, and psychology.

**Understanding and Using Research in Social Work** Jul 08 2020 How do social work students learn to use research to underpin their practice decisions? How do they learn that research is not an activity unconnected to their professional role and responsibilities, but rather acts as a foundation for their knowledge? By using the examples drawn from evidence-based practice (e.g. what is known to work and what we know about social work processes), the authors deliver a text that will help support students to appraise and then integrate research into both their daily practice decisions and their assignments and assessments. It will do this by defining key concepts like 'knowledge' and 'evidence' and then look at how these concepts include component parts - from law and legislation to practice knowledge and reflective and critical practice. Case examples are used to illustrate how a clear understanding of these component parts can build to a substantial evidence base from which to draw upon.

Identifying relevant research and appraising its quality are core aspects of the book. Later chapters show students how robust knowledge of evidence-based practice can develop into a clear and confident approach to their workloads and their daily practice dilemmas.

**ICICKM2014-Proceedings of the 11th International Conference on Intellectual Capital, Knowledge Management and Organisational Learning** Sep 21 2021 These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

**Resilient Structures and Infrastructure** Jul 28 2019 This book discusses resilience in terms of structures’ and infrastructures’ responses to extreme loading conditions. These include static and dynamic loads such as those generated by blasts, terrorist attacks, seismic events, impact loadings, progressive collapse, floods and wind. In the last decade, the concept of resilience and resilient-based structures has increasingly gained in interest among engineers and scientists. Resilience describes a given structure’s ability to withstand sudden shocks. In other words, it can be measured by the magnitude of shock that a system can tolerate. This book offers a valuable resource for the development of new engineering practices, codes and regulations, public policy, and investigation reports on resilience, and provides broad and integrated coverage of the effects of dynamic loadings, and of the modeling techniques used to compute the structural response to these loadings.

*The Knowledge* Oct 03 2022 If the world as we know it ended tomorrow, how would you survive? A nuclear war, viral pandemic or asteroid strike. The world as we know it has ended. You and the other survivors must start again. What knowledge would you need to start rebuilding civilisation from scratch? How do you grow food, generate power, prepare medicines, or get metal out of rocks? Could you avert another Dark Ages, or take shortcuts to accelerate redevelopment? Living in the modern world, we have become disconnected from the basic processes and key fundamentals of science that sustain our lives. Ingenious and groundbreaking, *The Knowledge* explains everything you need to know about everything, revolutionising your understanding of the world. ‘A glorious compendium of the knowledge we have lost in the living...the most inspiring book I’ve read in a long time’ Independent ‘A terrifically engrossing history of science and technology’ Guardian <http://the-knowledge.org/> **Advances in Information and Communication** Dec 25 2021 The book "Advances in Information and Communication Networks - Proceedings of the 2022 Future of Information and Communication Conference (FICC)" aims in presenting the latest research advances, sharing expert knowledge and exchanging ideas with the common goal of shaping the future of Information and Communication. The conference attracted 402 submissions, of which, 131 submissions (including six poster papers) have been selected through a double-blind review process by an international panel of expert referees. This book discusses on aspects of Communication, Data Science, Ambient Intelligence, Networking, Computing, Security and Internet of Things, from classical to intelligent scope. The intention is to help academic pioneering researchers, scientists, industrial engineers, and students become familiar with and stay abreast of the ever-changing technology surrounding their industry. We hope that readers find the volume interesting and valuable; it gathers chapters addressing state-of-the-art intelligent methods and techniques for solving real world problems along with a vision of the future research

**Entrepreneurial Knowledge, Technology and the Transformation of Regions** Jun 18 2021 In recent years, policy makers have given much credence to the role of entrepreneurship in the transformation of regions. As a result, a new set of policy responses have emerged that focus on the support of new venture creation, small business growth and idea generation and commercialization. While there is a wealth of research about entrepreneurship in general, less attention has been given to the development of new tools and programs in support of entrepreneurial activities, and to the ways in which the emergence, the character and the types of entrepreneurship policies might differ between countries. In particular, the transatlantic perspective is of special interest because of the pioneering role of the United States in this area, and also due to the European Union's focus on economic competitiveness. The contributions included in this book explore the emergence of entrepreneurship policies from a transatlantic comparative perspective and address different aspects of entrepreneurship policies including local entrepreneurship policies and the relationship between knowledge-based industries and entrepreneurship policies.

*EBOOK: Interpreting Statistical Findings: A Guide For Health Professionals And Students* Aug 01 2022 This book is aimed at those studying and working in the field of health care, including nurses and the professions allied to medicine, who have little prior knowledge of statistics but for whom critical review of research is an essential skill. The book will provide support for those conducting literature-based projects which require the student to review evidence generated through empirical investigations. Evidence-based projects or assignments have, for several years formed the basis of a final year independent study for most honours degrees, and increasing numbers of masters programmes, in health care. Working from practical examples, exercises and illustrations, explanations will be given in (relatively) straightforward conceptual terms. This book is intended as a practical guide and reference book. Bullet points and illustrations will be used wherever possible, and dense text avoided. A detailed glossary of statistical concepts and terms will be provided as an additional resource for learning. The emphasis throughout will be to enable the student to transfer their learning to the research reports they are reading. Using fundamental criteria and aided by a list of key questions, students will be able to make an informed judgement about the quality of the research findings. The examples used will be based closely on actual research data, but essential details will be changed. This approach is intended to avoid problems of copyright and overcome the ethical problem of challenging published research in a forum where there is no right of the authors to reply. As follow-up exercises, students will be directed to references where they can test out their learning on ‘real’ examples, guided by key questions.

**Mastering Hidden Costs and SocioEconomic Performance** May 30 2022 This volume is a first for the Research in Management Consulting series. As research and theory building in management consulting have grown rapidly during the past several years, the series is dedicated to capturing the latest thinking from applied scholars and

scholarly practitioners in this field. Complexity and uncertainty in today’s fastpaced business world have prompted a growing number of organizations—profit and notforprofit alike—to seek guidance in their concomitant change efforts. External and internal consultants and change agents have become increasingly visible in most, if not all, organizational change initiatives. Individual consultants and consulting firms have become increasingly involved in not only providing organizational clients with advice and new ideas but in implementing those ideas and solutions as well. While the series will continue to seek out and explore emerging trends, innovative perspectives, and new insights into the world of management consulting, it is also useful to look back— especially in different countries and cultures—to recapture and revisit past frameworks, intervention models and contributions. This volume is a translation and modest updating of Henri Savall and Véronique Zardet’s original work on mastering “hidden costs,” initially published in French in 1987.

**Enterprise Software Security** May 06 2020 **STRENGTHEN SOFTWARE SECURITY BY HELPING DEVELOPERS AND SECURITY EXPERTS WORK TOGETHER** Traditional approaches to securing software are inadequate. The solution: Bring software engineering and network security teams together in a new, holistic approach to protecting the entire enterprise. Now, four highly respected security experts explain why this “confluence” is so crucial, and show how to implement it in your organization. Writing for all software and security practitioners and leaders, they show how software can play a vital, active role in protecting your organization. You’ll learn how to construct software that actively safeguards sensitive data and business processes and contributes to intrusion detection/response in sophisticated new ways. The authors cover the entire development lifecycle, including project inception, design, implementation, testing, deployment, operation, and maintenance. They also provide a full chapter of advice specifically for Chief Information Security Officers and other enterprise security executives. Whatever your software security responsibilities, Enterprise Software Security delivers indispensable big-picture guidance—and specific, high-value recommendations you can apply right now. **COVERAGE INCLUDES:** • Overcoming common obstacles to collaboration between developers and IT security professionals • Helping programmers design, write, deploy, and operate more secure software • Helping network security engineers use application output more effectively • Organizing a software security team before you’ve even created requirements • Avoiding the unmanageable complexity and inherent flaws of layered security • Implementing positive software design practices and identifying security defects in existing designs • Teaming to improve code reviews, clarify attack scenarios associated with vulnerable code, and validate positive compliance • Moving beyond pentesting toward more comprehensive security testing • Integrating your new application with your existing security infrastructure • “Ruggedizing” DevOps by adding infosec to the relationship between development and operations • Protecting application security during maintenance

**Summary of The Knowledge – [Review Keypoints and Take-aways]** Jun 30 2022 The summary of The Knowledge – How to Rebuild Our World from Scratch presented here include a short review of the book at the start followed by quick overview of main points and a list of important take-aways at the end of the summary. The Summary of The book "The Knowledge" from 2014 is a how-to manual for surviving the end of the world. These ideas explain not only how to live through a terrible disaster, but also how to start over after it and build a self-sufficient life and a new civilization. The Knowledge summary includes the key points and important takeaways from the book The Knowledge by Lewis Dartnell. Disclaimer: 1. This summary is meant to preview and not to substitute the original book. 2. We recommend, for in-depth study purchase the excellent original book. 3. In this summary key points are rewritten and recreated and no part/text is directly taken or copied from original book. 4. **Qualitative Research in STEM** Dec 01 2019 Qualitative Research in STEM examines the groundbreaking potential of qualitative research methods to address issues of social justice, equity, and sustainability in STEM. A collection of empirical studies conducted by prominent STEM researchers, this book examines the experiences and challenges faced by traditionally marginalized groups in STEM, most notably culturally and linguistically diverse students and women. Investigations into these issues, as well as the high dropout rate among engineering students and issues of academic integrity in STEM, come with detailed explanations of the study methodologies used in each case. Contributors also provide personal narratives that share their perspectives on the benefits of qualitative research methodologies for the topics explored. Through a variety of qualitative methodologies, including participatory action research, Indigenous research, and critical ethnography, this volume aims to reveal and remedy the inequalities within STEM education today.

**Database Systems for Advanced Applications** Feb 24 2022 This book constitutes the workshop proceedings of the 17th International Conference on Database Systems for Advanced Applications, DASFAA 2012, held in Busan, South Korea, in April 2012. The volume contains five workshops, each focusing on specific area that contributes to the main themes of the DASFAA conference: The Second International Workshop on Flash-based Database Systems (FlashDB 2012), the First International Workshop on Information Technologies for Maritime and Logistics (ITEMS 2012), the Third International Workshop on Social Networks and Social Media Mining on the Web (SNSMW 2012), the Second International Workshop on Spatial Information Modeling, Management and Mining (SIM3 2012), and the Fifth International Workshop on Data Quality in Integration Systems (DQIS 2012).

**Procedural and Declarative Information in Software Manuals** Mar 28 2022 People who use software manuals want to get something done. Procedural information directly supports this goal, but the use of declarative information in manuals has often been under discussion. Current research gives rise to the expectation that manual users tend to skip declarative information most of the time. Also, no effects of declarative information in software manuals have yet been found. In this study, information use and information effects in software manuals are investigated in three experiments, thereby taking different user types, different task types and different information arrangements into account. A new technique was applied: the click&read method. This technique enables the software user to use the manual and carry out software tasks at the same time while information selection and times are recorded automatically in logfiles. For the first time, quantitative data are presented about the amounts of procedural and declarative information that were selected and the times that were spent using these information types. Although procedural information is selected more often and used longer, declarative information appears to be a substantial part of the information selection. Moreover, the results show that using declarative information positively affects performance on future tasks, performance on reasoning tasks and factual knowledge.

**Managing successful projects with PRINCE2** Jun 06 2020 This book provides a universally applicable project management method - the principles, processes and techniques that enable individuals and organisations successfully to deliver their projects within time, cost and quality constraints. This new edition has been designed to place more emphasis on the principles that underpin successful project management and to provide clear guidance on how to apply these principles to the organisational context within which projects are operating.
