*A Synthesis of Research on Second Language Writing in English* Mar 25 2022 'I applaud the authors for this sizeable undertaking, as well as the care exercised in selecting and sequencing topics and subtopics. A major strength and salient feature of this volume is its range: It will serve as a key reference tool for researchers working in L2 composition and in allied fields.' – John Hedgcock, Monterey Institute for International Studies Synthesizing twenty-five years of the most significant and influential findings of published research on second language writing in English, this volume promotes understanding and provides access to research developments in the field. Overall, it distinguishes the major contexts of English L2 learning in North America, synthesizes the research themes, issues, and findings that span these contexts, and interprets the methodological progression and substantive findings of this body of knowledge. Of particular interest is the extensive bibliography, which makes this volume an essential reference tool for libraries and serious writing professionals, both researchers and practitioners, both L1 and L2.

This book is designed to allow researchers to become familiar with the most important research on this topic, to promote understanding of pedagogical needs of L2 writing students, and to introduce graduate students to L2 writing research findings.

Into the Country of Standing Men Aug 06 2020 We all dream of a better future and of a better relationship. We all dream of a better family and of a better life. But how do we go about realizing these dreams? Is the degree of our dreams directly proportional to the degree of sacrifice required to achieve them? When physical separation from the husband, and separation from an only child is demanded of us, is it still worth pursuing that dream? Is not the nearness of a husband, the nearness of a son, the nearness of our family, the nearness of loved ones--a most wonderful dream? Is this not enough?

Kaleidoscope May 15 2021 • A comprehensive resource for understanding the various components of spiritual direction • The first such resource written entirely by spiritual directors of color Early mystics of the Near East and northern Africa created the monastic traditions and

were the first psychologists, exploring various practices to test the human capacity. In medieval times, spiritual direction was common in the Roman Catholic monastic traditions. It extended significantly into Protestant Christianity in the late twentieth century by predominantly white and affluent organizations. Spiritual direction has progressively become a global, multi-religious and interfaith practice. This book is a comprehensive and concise text from a spiritual director of color, offering inclusive resources and tools to spiritual directors of many faiths and for people of diverse cultures and traditions. Core skills such as deep listening, hospitality, and discernment are presented with cutting-edge lessons on internal liberation, systemic trauma, and imaginative discovery. Spiritual direction is taught by more than 100 educational institutions and spirituality centers in the US alone, but typical curriculum generally does not reflect current cultural reality and growing diversity. This is a textbook for anyone who studies spiritual direction as both preparation for and deepening of their calling.

**Cultivated vegetables of the world: a multilingual onomasticon** Nov 20 2021 Vegetables make up a major portion of the diet of humans and are critical for good health. With the world population predicted to reach 9 billion people by 2050, they will play an increasingly important role in food availability. *Decentering Citizenship* Aug 25 2019 *Decentering Citizenship* follows three groups of Filipina migrants' struggles to belong in South Korea: factory workers claiming rights as workers, wives of South Korean men claiming rights as mothers, and hostesses at American military clubs who are excluded from claims—unless they claim to be victims of trafficking. Moving beyond laws and policies, Hae Yeon Choo examines how rights are enacted, translated, and challenged in daily life and ultimately interrogates the concept of citizenship. Choo reveals citizenship as a language of social and personal transformation within the pursuit of dignity, security, and mobility. Her vivid ethnography of both migrants and their South Korean advocates illuminates how social inequalities of gender, race, class, and nation operate in defining citizenship. *Decentering Citizenship* argues that citizenship emerges from negotiations about rights and belonging between South Koreans and migrants. As the promise of equal rights and full membership in a polity erodes in the face of global inequalities, this decentering illuminates important contestation at the margins of citizenship.

**Immigrant Children in Transcultural Spaces** Jul 29 2022 Grounded in both theory and practice, with implications for both, this book is about children's perspectives on the borders that society erects, and their actual, symbolic, ideational and metaphorical movement across those borders. Based on extensive ethnographic data on children of immigrants (mostly from Mexico, Central America and the Philippines) as they interact with undergraduate students from diverse linguistic, cultural and racial/ethnic backgrounds in the context of an urban play-based after-

school program, it probes how children navigate a multilingual space that involves playing with language and literacy in a variety of forms. *Immigrant Children in Transcultural Spaces* speaks to critical social issues and debates about education, immigration, multilingualism and multiculturalism in an historical moment in which borders are being built up, torn down, debated and recreated, in both real and symbolic terms; raises questions about the values that drive educational practice and decision-making; and suggests alternatives to the status quo. At its heart, it is a book about how love can serve as a driving force to connect people with each other across all kinds of borders, and to motivate children to engage powerfully with learning and life.

Language and Linguistic Diversity in the US Apr 13 2021 This highly engaging textbook presents a linguistic view of the history, society, and culture of the United States. It discusses the many languages and forms of language that have been used in the US – including standard and nonstandard forms of English, creoles, Native American languages, and immigrant languages from across the globe – and shows how this distribution and diversity of languages has helped

shape and define America as well as an American identity. The volume introduces the basic concepts of sociolinguistics and the politics of language through cohesive, up-to-date and accessible coverage of such key topics as dialectal development and the role of English as the majority language, controversies concerning language use in society, languages other than English used in the US, and the policies that have directly or indirectly influenced language use. These topics are presented in such a way that students can examine the inherent diversity of the communicative systems used in the United States as both a form of cultural enrichment and as the basis for socio-political conflict. The author team outlines the different viewpoints on contemporary issues surrounding language in the US and contextualizes these issues within linguistic facts, to help students think critically and formulate logical discussions. To provide opportunities for further examination and debate, chapters are organized around key misconceptions or questions ("I don't have an accent" or "Immigrants don't want to learn English"), bringing them to the forefront for readers to address directly. Language and Linguistic Diversity in the US is a fresh and unique take on a widely taught topic. It is ideal for students from a variety of disciplines or with no prior knowledge of the field, and a useful text for introductory courses on language in the US, American English, language variation, language ideology, and sociolinguistics.

*Journeys of Asian Diaspora* Feb 09 2021 Asians make up the largest and most dispersed people of the world, and Christians make up a sizable proportion of this demographic. Asian Christians are more likely to emigrate, and many have continued to embrace Christian faith at their diasporic places of settlement. They are quick to establish distinctively Asian churches all over

the world and infuse diversity, revival, and missionary consciousness into their adopted communities. They preserve the ties and cultures of their ancestral homelands while assimilating and adapting into the new setting. They have become a recognizable force in the transformation and advancement of Christianity itself at the beginning of the twenty-first century. The dozen essays in this volume are written by leading scholars of Asian backgrounds situated in various diasporic locations. The authors trace the contours of their dispersion and highlight diverse missiological themes, including the scattering (diaspora) and the gathering (ekklesia) of Asian Christians around the world. This volume traces the origins and destinations of major Asian migration and diaspora communities from a variety of perspectives and geographical locations. It is pan-Asian in scope and multidisciplinary in nature. It also provides the latest data and infographics on Asian diasporas worldwide.

2021 Several factors have resulted in increased intra- and inter-state migration. This has led to an increase in the enrollment of students with diverse linguistics backgrounds, placing more academic demands on educators. Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum. Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse

classrooms. While English has become the world language, most communities remain, and are becoming more and more multicultural, multilingual, and diverse. The Handbook of Research on Teaching in Multicultural and Multilingual Contexts moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires. It examines the phenomenon of language use, language teaching, multiculturalism, and multilingualism in different learning areas, giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations. Covering topics such as Indigenous languages, multilingual deaf communities, and intercultural competence, this major reference work is an essential resource for educators of both K-12 and higher education, pre-service teachers, educational psychologists, linguists, education administrators and policymakers, government officials, researchers, and academicians.
