[Network World](#) Jun 04 2020 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

[Practical Pathology Informatics](#) Nov 29 2019 Practical Pathology Informatics introduces and demystifies a variety of topics in the broad discipline of pathology informatics with a focus on issues of particular relevance to the practicing anatomic pathologist. Early chapters contain basic information about computers and databases which is applicable to any discipline, with the later chapters containing more anatomic pathology specific topics. Chapters can be read in any order and are divided into short sections. Organized in an easy-to-read format, the book is aimed at providing pathologists and pathology residents with the practical information they need to make intelligent, informed decisions about the deployment and use of information technology tools in their day-to-day practice, and ultimately, better position themselves for informed decision making and intelligent communication with the information systems groups at their institutions. John Sinard, MD, PhD is Associate Professor of Pathology in the Department of Pathology and Director, Pathology Informatics Program at Yale University School of Medicine in New Haven, Connecticut.

[IT Essentials](#) Oct 01 2022 IT Essentials: PC Hardware and Software Companion Guide, Fifth Edition IT Essentials: PC Hardware and Software Companion Guide, Fifth Edition, supports the Cisco Networking Academy IT Essentials: PC Hardware and Software version 5 course. The course is designed for Cisco Networking Academy students who want to pursue careers in IT and learn how computers work, how to assemble computers, and how to safely and securely troubleshoot hardware and software issues. As CompTIA Approved Quality Content, the course also helps you prepare for the CompTIA A+ certification exams 220-801 and 220-802. CompTIA A+ 220-801 covers the fundamentals of computer technology, installation and configuration of PCs, laptops, related hardware, and basic networking. CompTIA A+ 220-802 covers the skills required to install and configure PC operating systems and configure common features, such as network connectivity and email for Android and Apple iOS mobile operating systems. Students must pass both exams to earn the CompTIA A+ certification. The features of the Companion Guide are designed to help you study and succeed in this course: -- Chapter objectives—Review core concepts by answering the focus questions listed at the beginning of each chapter. -- Key terms—Refer to the updated lists of networking vocabulary introduced, and turn to the highlighted terms in context. -- Course section numbering—Follow along with the course heading numbers to easily jump online to complete labs, activities, and quizzes referred to within the text. -- Check Your Understanding Questions and Answer Key—Evaluate your readiness with the updated end-of-chapter questions that match the style of questions you see on the online course quizzes. -- Glossary in the back of the book to define Key Terms The lab icon in the Companion Guide indicates when there is a hands-on Lab or Worksheet to do. The Labs and Worksheets are compiled and published in the separate book, IT Essentials: PC Hardware and Software Lab Manual, Fifth Edition. With more than 1300 pages of activities, including Windows 7, Windows Vista, and Windows XP variations covered in the CompTIA A+ exam objectives, practicing and performing these tasks will reinforce the concepts and help you become a successful PC technician.

[Advances in Automotive Production Technology – Theory and Application](#) May 28 2022 This volume of the series ARENA2036 compiles the outcomes of the first Stuttgart Conference on Automotive Production (SCAP2020). It contains peer-reviewed contributions from a theoretical as well as practical vantage point and is topically structured according to the following four sections: It discusses (I) Novel Approaches for Efficient Production and Assembly Planning, (II) Smart Production Systems and Data Services, (III) Advances in Manufacturing Processes and Materials, and (IV) New Concepts for Autonomous, Collaborative Intralogistics. Given the restrictive circumstances of 2020, the conference was held as a fully digital event divided into two parts. It opened with a pre-week, allowing everyone to peruse the scientific contributions at their own pace, followed by a two-day live event that enabled experts from the sciences and the industry to engage in various discussions. The conference has proven itself as an insightful forum that allowed for an expertly exchange regarding the pivotal Advances in Automotive Production and Technology.

How to Be a Power Connector: The 5+50+100 Rule for Turning Your Business Network into Profits Dec 23 2021 Create a personal "power grid" of influence to spark professional and personal success "Other people have the answers, deals, money, access, power, and influence you need to get what you want in this world. To achieve any goal, you need other people to help you do it." -- JUDY ROBINETT As anyone in business knows, strategic planning is critical to achieving long-term success. In *How to Be a Power Connector*, super-networker Judy Robinett argues that strategic relationship planning should be your top priority. When you combine your specific skills and talents with a clear, workable path for creating and managing your relationships, nothing will stop you from meeting your goals. With high-value connections, you'll tap into a dynamic "power grid" of influence guaranteed to accelerate your personal and professional success. Robinett uses her decades of experience connecting the world's highest achievers with one another to help you build high-value relationships. She reveals all the secrets of her trade, including proven ways to: Find and enter the best network "ecosystem" to meet your goals Reach even the most unreachable people quickly and effectively Get anyone's contact information within 30 seconds Create a "3-D connection" that adds value to multiple people at the same time Access key influencers through industry and community events Subtly seed conversation with information about interests and needs Use social media to your best advantage Robinett has based her methods on solid research proving that social groups begin to break up when they become larger than 150 people, and that 50 members is the optimal size for group communication. As such, she has developed what she calls the "5+50+100" method: contact your top 5 connections daily, your Key 50 weekly, and your Vital 100 monthly. this is your power grid, and it will work wonders for your career. Nothing will stop you when you learn *How to Be a Power Connector*. PRAISE FOR HOW TO BE A POWER CONNECTOR: "Unlike many books in this genre, this one is written by a woman who has lived it... . Judy Robinett offers guidance on how to form authentic relationships that bring mutual benefits." -- ADAM GRANT, Wharton professor and New York Times bestselling author of *Give and Take* "How to Be a Power Connector is like an MBA in networking: an advanced course in finding and developing quality relationships with the people who can make the biggest difference in your professional success." -- IVAN MISNER, founder and chairman of BNI "Talk about power! Follow Judy Robinett's logical, straightforward, and helpfully detailed advice, and you can be a 'Power Connector' yourself! Great ideas, well presented, with no 'wasted space' in her argument!" -- DON PEPPERS, coauthor of *Extreme Trust: Honesty as a Competitive Advantage* "Absolutely brilliant. A step-by-step guide to building a network that will be both invaluable to you and just as valuable to those whose lives you will now have the opportunity to touch. I can't imagine a more powerful book for one who truly desires to be a Power Connector." --

BOB BURG, coauthor of *The Go-Giver* and author of *Adversaries into Allies* "In the C-Suite or in your personal life everything comes down to the quality of your relationships. Raspberry Pi 3 Home Automation Projects Jan 30 2020 "With futuristic homes on the rise, learn to control and automate the living space with intriguing IoT projects." About This Book Build exciting (six) end-to-end home automation projects with Raspberry Pi 3, Seamlessly communicate and control your existing devices and build your own home automation system, Automate tasks in your home through projects that are reliable and fun Who This Book Is For This book is for all those who are excited about building home automation systems with Raspberry Pi 3. It's also for electronic hobbyists and developers with some knowledge of electronics and programming. What You Will Learn Integrate different embedded microcontrollers and development boards like Arduino, ESP8266, Particle Photon and Raspberry Pi 3, creating real life solutions for day to day tasks and home automation Create your own magic mirror that lights up with useful information as you walk up to it Create a system that intelligently decides when to water your garden and then goes ahead and waters it for you Use the Wi-fi enabled Adafruit ESP8266 Huzzah to create your own networked festive display lights Create a simple machine learning application and build a parking automation system using Raspberry Pi Learn how to work with AWS cloud services and connect your home automation to the cloud Learn how to work with Windows IoT in Raspberry Pi 3 and build your own Windows IoT Face Recognition door locking system In Detail Raspberry Pi 3 Home Automation Projects addresses the challenge of applying real-world projects to automate your house using Raspberry Pi 3 and Arduino. You will learn how to customize and program the Raspberry Pi 3 and Arduino-based boards in several home automation projects around your house, in order to develop home devices that will really rejuvenate your home. This book aims to help you integrate different microcontrollers like Arduino, ESP8266 Wi-Fi module, Particle Photon and Raspberry Pi 3 into the real world, taking the best of these boards to develop some exciting home automation projects. You will be able to use these projects in everyday tasks, thus making life easier and comfortable. We will start with an interesting project creating a Raspberry Pi-Powered smart mirror and move on to Automated Gardening System, which will help you build a simple smart gardening system with plant-sensor devices and Arduino to keep your garden healthy with minimal effort. You will also learn to build projects such as CheerLights into a holiday display, a project to erase parking headaches with OpenCV and Raspberry Pi 3, create Netflix's "The Switch" for the living room and lock down your house like Fort Knox with a Windows IoT face recognition-based door lock system. By the end of the book, you will be able to build and automate the living space with intriguing IoT projects and bring a new degree of interconnectivity to your world. Style and approach End to end home automation projects with Raspberry Pi 3.
