Portrait of a Young Painter Feb 01 2020 In *Portrait of a Young Painter*, the distinguished historian Mary Kay Vaughan adopts a biographical approach to understanding the culture surrounding the Mexico City youth rebellion of the 1960s. Her chronicle of the life of painter Pepe Zúñiga counters a literature that portrays post-1940 Mexican history as a series of uprisings against state repression, injustice, and social neglect that culminated in the student protests of 1968. Rendering Zúñiga's coming of age on the margins of formal politics, Vaughan depicts midcentury Mexico City as a culture of growing prosperity, state largesse, and a vibrant, transnationally-informed public life that produced a multifaceted youth movement brimming with creativity and criticism of convention. In an analysis encompassing the mass media, schools, politics, family, sexuality, neighborhoods, and friendships, she subtly invokes theories of discourse, phenomenology, and affect to examine the formation of Zúñiga's persona in the decades leading up to 1968. By discussing the influences that shaped his worldview, she historicizes the process of subject formation and shows how doing so offers new perspectives on the events of 1968.

In one beautiful book, long-time Road & Truck magazine chief photographer John Lamm, along with other top motoring contributors, gives the reader illustrated profiles of every sports car you've ever dreamed of driving! Now, imagine if you could drive a different sports car—any sports car—every single day for a year. Which would you choose?

Mopar Muscle May 18 2021 Now in paperback, this book covers Chrysler's incredible series of muscle cars. In 1955 Chrysler introduced the first of its famed 300 "letter series" cars. The company designed a stylish, sporty car, stuffed in one of its potent Hemi engines, and gave birth to the American muscle car. The C-300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race. When the Detroit performance wars began in earnest during the 1960s, Chrysler was well positioned to build the most outrageous, bodacious cars of an outrageous, bodacious era, cars like the famed Charger, Hemi Cuda, Road Runner, Superbird, and Challenger T/A. These cars dominated the dragstrips as well as the NASCAR ovals, and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly, they ruled the streets of America; they ruled not just the streets, bu the drive ins and parking lots. Nothing was cooler than Mopar muscle. Over the years these legendary Mopar muscle cars were the fastest, baddest assed, most outrageous machines to rip up American pavement. "This lavishly produced book is definitely a feast for all fans of this line of cars: the photography (by David Newhardt) is absolutely stunning. Not only are the pictures big, and of the highest quality, but the thought that has gone into their composition is plain for all to see. It could be argued that given the striking nature of these cars, and the wonderful backdrops, it would be hard to go wrong, but Newhardt went the extra mile here, and it shows. The story is also very comprehensive, listing all of the cars from the line, and taking time to tell the story in a well-researched, yet caring way. It is

obvious that Robert Genat knows the subject well and loves it even more. . . . This book is a must-have for all lovers of American muscle, and thanks to the sheer depth of its coverage and drop-dead-gorgeous photography, the asking price of £34.99 is something of a bargain." - Classic Car Weekly (UK)

The Cars of American Motors Aug 09 2020 Though American Motors never approached the size of Detroit's Big Three, it produced a long series of successful cars that were distinctive, often innovative and in many cases influential. This history examines AMC's cars from the company's formation in 1954 through its absorption by Chrysler in 1987. The Gremlin, Pacer and Eagle vehicles are examined in detail, as are the AMC custom cars of George Barris and Carl Green. The text details AMC's 1980s involvement with the French firm Renault and the design legacy of that joint venture, which includes the Hummer. The evolution of Jeep is covered from the 1960s through the 2000s. Features include some 225 photographs; a listing of AMC / Rambler clubs, organizations and business entities, with contact details; tables of detailed specifications and performance data; data on technical devices, trim packages and all model variations; a comprehensive account of AMC / Rambler appearances in film, television and cartoons.

[Incredible Barn Finds](#) May 06 2020 While some of the stories actually are about cars found in barns

or sheds, author Wyss has taken the liberty of expanding the definition of "barn find" to include any collector car found derelict, ignored, in pieces, or generally found in circumstances belying its stature. This could include cars parked in fields, found in cellars, left in parking garages, or even found under a pile of cars in a junkyard. What the cars do have in common is that they are valuable and exotic and have histories chock full of unimaginable twists and turns. Take, for instance the Two Rotor Corvette, a car that cost GM \$2 million to build and then they flat gave it away to the first guy that asked. Same thing for a GT40 roadster, one of four built, and Ford goes and hands the keys to a movie car customizer who kept it for decades and never quite got it up on the big screen. That car today is worth \$4 million. So, if you're into collector cars and love the thrill of the hunt, then you'll truly appreciate the 50 stories Wyss has selected for this first in the series.
