**Requirements Engineering** Jan 11 2021 Requirements Engineering Processes and Techniques Why this book was written The value of introducing requirements engineering to trainee software engineers is to equip them for the real world of software and systems development. What is involved in Requirements Engineering? As a discipline, newly emerging from software engineering, there are a range of views on where requirements engineering starts and finishes and what it should encompass. This book offers the most comprehensive coverage of the requirements engineering process to date - from initial requirements elicitation through to requirements validation. How and Which methods and techniques should you use? As there is no one catch-all technique applicable to all types of system, requirements engineers need to know about a range of different techniques. Tried and tested techniques such as data-flow and object-oriented models are covered as well as some promising new ones. They are all based on real systems descriptions to demonstrate the applicability of the approach. Who should read it? Principally written for senior undergraduate and graduate students studying computer science, software engineering or systems engineering, this text will also be helpful for those in industry new to requirements engineering. **Blow Your Little Tin Whistle** Mar 13 2021 This book is a biography of Richard Clarke Sommerville, an educator, amateur actor, and artist, whose life spanned the last quarter of the nineteenth century and six decades of the twentieth century. His dedication to the fine arts was not just a passing interest, but was central to his definition of the right way to live. Education was the key to his positive attitude. He held definite views about what an education should do for the individual. His education within the home environment, his experiences within the educational settings of his day, and his ultimate acceptance of his own lot in life helped him, in part, to formulate these views. Many of his views are as timely today as they were then. His message is to all students from a very special teacher. Contents: 'The Jewel on the South Branch'; The Hampden-Sydney Years; The Restless Young Man; A Return to the Classroom; A Return to Virginia; 'As a Man Thinketh...'; The Professional and the Employee; 'Friend of the Student'; The Man and His Art; The Emeritus Years.
