Paul's Lifesong of Joy and Unity Nov 29 2019 When Paul and Silas were in prison in Philippi, they burst into singing. Paul looked at life with a joyful song. He found delight when believers lived in harmony. The theme of this Bible study is Paul's Life-Song. Hear his song in the letter he wrote to Philippi, even while in another prison. Some strains explode with joy, while other stanzas carry a minor melody to encourage or warn the people he loved. Study his messages and learn how to apply Paul's attitudes regardless of his circumstances. This Bible study is rich with insights into the Hebrew and Greek and covers themes Paul brings from the Old Testament or other New Testament teachings. Dive deeper into those themes by taking important excursions into the background of the topics. This in-depth verse-by-verse investigation is valuable for individuals or groups. Enjoy the commentary while completing the workbook and applying the messages to everyday situations. Determine your timeframe for the study as you discover what the Lord Jesus wants to do in your life through Paul. I've had the privilege of knowing Sharon Gresham as a teacher/speaker for many years and now as a writer. Her commitment to in-depth study and application of the Bible is refreshing. The Philippians study equips the pastor/teacher with a resource much needed in the church today. I am excited to teach this study both in our church and as we minister internationally. Darrel Auvenshine, pastor of Southside City Church, Fort Worth, Texas With a gift for accurately communicating God's Word in a relevant and personal way, Sharon Gresham's in-depth study of Philippians will delight and thrill any serious student of the Scriptures. I highly recommend it! Scott Whitson, director of missions, Southwest Metroplex Baptist Association and former missionary to Tanzania

Now, in *A Thousand Names for Joy*, she encourages us to discover the freedom that lives on the other side of inquiry. Stephen Mitchell-the renowned translator of the Tao Te Ching-selected provocative excerpts from that ancient text as a stimulus for Katie to talk about the most essential issues that face us all: life and death, good and evil, love, work, and fulfillment. Joy & Pain Sep 27 2019 Navigating one's way through everyday life is akin to riding a rollercoaster: We 'ooh' and 'ah' through all the twists and turns, laughing loudly along the way. Out of nowhere there is a reality check waiting for passengers at ride's end—the inevitable big drop! Laughs turn to screams; we hold on for dear life and hope the safety equipment is in proper working order. The coaster stops, we touch ground safely, and move on with our lives. In a nutshell, life is the ultimate roller coaster filled with loads of twists and turns, coupled with its highs and lows. We are all moved through life by emotions that, at times, dictate how we live. However, it isn't healthy to live on emotions alone. Sometimes we have to use common sense and take a step back to get a better view of what lies ahead. When we learn to control our emotions, the better equipped we become to handle what falls our way. Joy & Pain/Life Happens is a compilation of my personal views on how to deal with life's ups and downs. I hope you, the reader, find it enjoyable, interesting, and insightful.

The Joy of SET Jun 24 2019 "Have you ever played the addictive card game SET? Have you ever wondered about the connections between games and mathematics? . . . The Joy of SET takes readers on a fascinating journey into this seemingly simple card game and reveals its surprisingly deep and diverse mathematical dimensions. Absolutely no mathematical background is necessary to enjoy this book - all you need is a sense of curiosity and adventure. Originally invented in 1974 by Marsha Falco and officially released in 1991, SET has gained a widespread, loyal following. SET's eighty-one cards consist of one, two, or three symbols of different shapes (diamond, oval, squiggle), shadings (solid, striped, open), and colors (green, purple, red). In order to win, players must identify 'sets' of three cards for which each characteristic is the same - or different - on all the cards. SET's strategic and unique design opens connections to a plethora of mathematical disciplines, including geometry, modular arithmetic, combinatorics, probability, linear algebra, and computer simulations. The Joy of SET looks at these areas as well as avenues for further mathematical exploration. As the authors show, the relationship between SET and mathematics runs in both directions - playing this game has generated new mathematics, and the math has led to new questions about the game itself."--Provided by publisher.
